She Left, All Right.

Mrs. Allen's new servant came to her the morning after her irrival and said:

"I'm goin' to lave yez, mum, today. I'll not stay any longer."

"Going to leave!" cried Mrs. Allen in amazement. "Why in the world are you going to leave so soon?

"Well, mum," said the girl, "when I came yesterday mornin' you gave me the keys to yer trunks and drawers and jewel case to kape fer yez."

"Why, yes, so I did, said the mistress; "that showed that I trusted you. What is the matter."

"Well, yer see, mum," said the servant, "they don't one of 'em fit. —Chicago News.

W. L. DOUGLAS SHOES
Men's $2.00 $2.50 $3.00 $3.50 $4 & $4.50
Women's $2 $2.50 $3 $3.50 & $4
Misses, Boys, Children $1.50 $1.75 $2 $2.50 $3
YOU CAN SAVE MONEY
by wearing the W. L. Douglas Shoes because for 31 years I have guaranteed their value by having my name and price stamped on the sole before the shoes leave the factory. I also protect you against high prices for inferior shoes. These are a few reasons why I am the largest maker of $3.50 and $4.00 shoes in the world.
Take No Substitute
$1,006,279 INCREASE
in the sales of the W. L. Douglas shoes in 1913 over 1912. The reason for the enormous increase in the sales of the W. L. Douglas shoes is because of their extra value, excellent style, easy fit and long wear.
Ask your dealer to show you the kind of W. L. Douglas shoes he is selling for $2.00, $2.50, $3.00, $3.50, $4.00 and $4.50. If the W. L. Douglas shoes are not for sale in your vicinity, order direct from factory. Shoes for every member of the family at all prices, postage free. Write for illustrated catalog showing how to order by mail.
W. L. DOUGLAS, 210 Spark Street, Brockton, Mass.

Easily Accomplished.

Judge Hanington, when leader of the opposition in the New Brunswick legislature, representing the county of Westmoreland, was once delivering a vigorous address in the house against some measure of the government, then led by Mr. Blair.

"Oh, that my constituents in Westmoreland could hear me now!" exclaimed the opposition leader in violent tones.

Mr. Blair motioned to an attendant.

"Open the windows," he said.—Louisville Courier-Journal.

The equivalent of one school year for more than 400 children is lost because of contact with minor contagious diseases, according to figures recently compiled for Pittsburg.

Not His Fault.

The new foreman was a hustler. Nothing escaped his eagle eye, and whenever he saw a workman suffering from a tired feeling he quickly woke him up.

So when he discovered a bricklayer snatching a quiet pipe behind a wheelbarrow his wrath arose mightily.

"What do you think you're paid for? Get on with your job, if you don't want to get fired pretty sharp."

"All right, boss," rejoined the workman. "Keep your 'air on. Rome wasn't built in a day, you know."

"That may be," rejoined the hustler, "but I wasn't foreman of that job."—New York Globe.

Didn't Have the Key.

The red-haired office boy was whistling a late popular air, but he didn't carry the tune very well.

"You will break into song occasionally, will you?" remarked his employer.

"Sometimes," answered the auburn-haired youth.

"If you'd get the key you wouldn't need to break in," retorted the boss.—National Monthly.

Wright's Indian Vegetable Pills are sold with and without soluble sugar coating. They regulate the bowels, invigorate the liver and purify the blood. Adv.

Poorly Located.

Waverly had just returned from an extended eastern trip.

"Were you in many of the old New England towns?" asked Marcella.

"Nearly all of them of any size."

"And did you see Plymouth Rock?"

"Had my picture taken standing on it."

"What did you think of the rock?"

"Oh, it's all very well in its way, but why on earth do they have it in such a dinkey little town?"—Youngstown Telegram.

Try It in Your Eyes and in Baby's Eyes for Scaly Eyelids and Granulation.

Everybody's Doing It.

The chief was berating a patrolman.

"Why did you let that crook get away from you?" he demanded. "You saw him enter the house?"

"Yes, chief."

"And you saw him come out?"

"Yes, chief."

"Then why didn't you dance right after him?"

"I did dance after him," protested the patrloman, "but you see he was doing the tango and I was using the hestitation."—Judge.

Putnam Fadeless Dyes are the brightest and fastest.

Quick Results.

Two men were talking of the hard times.

"Does your wife ever grieve because she threw over a wealthy man in order to marry you?" queried Hall.

"Well, she started it once," was the reply, "but I cured her of it without delay."

"I wish you would tell me how," said Hall.

"I started right in grieving with her," replied the other; "and I grieved harder and longer than she did."—Lippincott's Magazine.

RESINOL WILL SURELY STOP THAT ITCHING
My, what relief! The moment that resinol ointment touches itching skin, the itching stops and healing begins. That is why doctors have prescribed it successfully for nineteen years in even the severest cases of eczema, tetter, ringworm, rashes and other tormenting, unsightly skin-eruptions. With the help of warm baths with resinol soap, resinol ointment restores the skin or scalp to perfect health and comfort, quickly, easily and at little cost.
Resinol is also a perfect household remedy wherever a soothing, healing application is needed. It contains nothing of a harsh or injurious nature, and can be used on the tenderest or most irritated surface, where you wouldn't dare use most other skin remedies. Every druggist sells resinol ointment (50c and $1), and resinol soap (25c).

Getting Monotonous.

Little John was full of mischief and during his first year at school hardly a day passed that he was not sent to stand in the corner.

When the schoolhouse burned down and a new one was immediately begun the little boy went to his father, who was county superintendent.

"Don't you think we could get the carpenter to build a round schoolhouse this time, father," he said.

"Why, son?" his father asked, in astonishment.

"Because," the little fellow answered, "I'm getting very tired of corners."—Atlanta Journal.

Quick Action Getting The Blood in Order
There's Bounding, Pulsating Life in Every Drop of Great Remedy.

Let S. S. S. Hustle Impurities Outward.
Impurities lodge so deeply in the tissues that they cannot be reached by any ordinary method. Mercury and other dangerous mineral drugs may check a disease, but to get right down into where the blood is vitiated requires S. S. S., the greatest blood purifier known. Its action is pronounced.
In a very brief time S. S. S. has the reconstructive process so under control that remarkable changes are observed. All eruptive places heal, mysterious pains and aches have disappeared, and from head to foot there is conscious sensation of renewed health.
The extraordinary manner in which S. S. S. drives impurities out of the blood is due to its catalytic force in the blood cells, contains one ingredient, the active purpose of which is to stimulate the tissues to the healthy selection of its own essential nutriment and the medicinal elements of this matchless blood purifier are just as essential to well balanced health as the nutritious elements of the meats, grains, fats and sugars of our daily food.
Not only this, but if from the presence of some disturbing poison there is a local or general interference of nutrition to cause boils, carbuncles, abscesses and kindred troubles, S. S. S. so directs the local cells that this poison is rejected and eliminated from their presence.
From the fact that S. S. S. is purely a botanical preparation, it is accepted by the weakest stomach and has great tonic influence. Not one drop of drugs or mineral is used in its preparation. Ask for S. S. S. and insist upon having it. And if you desire skillful advice upon any matter concerning the blood and skin write to The Swift Specific Co., 224 Swift Bldg., Atlanta, Ga. Do not allow some zealous clerk to larrup the atmosphere in eloquence over something "just as good" as S. S. S. Beware of all counterfeits.

HUERTA ORDERS PORT BLOCKADED

Would Close Tampico to Prevent Landing of Munitions.

Determination of Dictator Likely to Force Hostilities Between United States and Mexico.

Washington, D. C. (Later)—General Huerta's order Tuesday suspending the order to blockade Tampico against the delivery of ammunition by the steamer Antilla to the constitutionalists dispelled apprehension over a new crisis between the United States and the Huerta government, which had threatened mediation of Mexican affairs.

Although the Washington officials expressed satisfaction over Huerta's action, it was persistently suggested outside of official circles that the blockade had been suspended only conditionally as a result of conferences between the South American mediators and the Mexican and American delegates at Niagara Falls, and that the Antilla's cargo of arms might not be delivered at Tampico at this time. It was said the Antilla might be diverted in her course through an agreement with officials of the Ward line, her owners, an American corporation.

Representatives of the constitutionalists in Washington were inclined to the belief that the ammunition would be landed at Tampico, but divulged no direct information upon which to base such an opinion.

Washington, D. C.—A new crisis in the Mexican situation faced the Washington government Sunday night. It was a situation fraught with perils for mediation and with possibilities that might precipitate war between the United States and Mexico.

General Huerta brought about the crisis by ordering gunboats to blockade the port of Tampico and to seize a cargo of ammunition en route there for rebels aboard the Antilla, from New York, flying the Cuban flag. Huerta has notified the powers of his intention to blockade the port and that he proposes to seize the cargo consigned to the belligerents against his sovereignity as contraband of war.

The purpose of the United States to suppress the attempt to blockade and prevent interference with the Antilla was indicated when Secretary Daniels issued an official statement announcing that while no new orders had been given Admiral Badger, there had been no change in the policy of the government in reference to the desire that the port of Tampico shall be open to all commerce. The statement follows:

"No word whatever has been received as to whether warships of other nations have been notified of the blockade at Tampico, or what their attitude would be toward such a blockade. There has been no change in the policy of the government in reference to its desire that the port of Tampico shall be open to all commerce."

As to whether "all commerce," in this instance, includes contraband of war, no official of the government will discuss. As far as is known, the only orders relating to Tampico that have been issued went to Admiral Badger on May 18 in the form of a message informing him that while it was not believed that Huerta gunboats would return to Tampico.

Paris Hats Are Off As Colonel Roosevelt Passes

Paris—Colonel Roosevelt called on President Poincare Sunday at the Palace of the Elysee and remained with him an hour, conversing in French. The Colonel took occasion to thank the President for the courtesies extended.

The presidential palace presented a busy scene when the Colonel arrived in an automobile with Amabssador Herrick.

Several cinematograph operators were on the scene and took pictures of the Colonel as he passed in and out, while some people in the crowd who knew the presence of the former president of the United States raised their hats as he passed and Colonel Roosevelt acknowledged the greetings.

The Colonel enjoyed a long automobile drive through the Champs Elysees and Bois de Bologne, visiting among other places the polo ground. He also spent some time at a popular amusement resort in the environs of Paris, and went to the Louvre to see Da Vinci's "Mona Lisa," which was recently returned after having been stolen.

Lost Race Is Unearthed.

Berkeley, Cal.—Mute evidence of a race that lived and died before white men came to California has been found beside Strawberry creek, on the University of California campus, in the skeletons of four Indians, one a woman, buried perhaps centuries ago. The discovery of the first body was made by workmen excavating for an addition to the faculty club. The bodies were discovered in Strawberry creek, which anthropologists of the university have found to have been a burial palce for the prehistoric Western races.

Taft Sits at Peace Meet.

New York—Ex-President Taft presided at a meeting called by the New York Peace society to organize a permanent body which will try to end dissensions between nations over the treatment of aliens. It was decided to form an organization national in its scope, which will advocate legislation giving the Federal government greater power to regulate the status of aliens in their relation to the governments of the states where they reside. Among those present were Alton B. Parker and 40 prominent attorneys.

Child Causes Explosion.

Kansas City—Roy Branson, 14 years old, is dead, and Harry Hennessy, 6, seriously injured, as the result of an explosion when Branson in play threw a heavy stone which landed in an abandoned box of dynamite caps containing more than 100 primers. Unknown to the boys, sticks of dynamite were lying all around them.

Conservation Bills to Have Due Recognition

Washington, D. C.—With the approval of the house leadership, a supplementary legislative program of the present session, embracing five conservation measures, was outlined in a resolution introduced by Representative Foster, of Illinois. The rules committee will meet immediately and probably will report a rule to provide for immediate consideration of the measure.

Under the proposed rule each of the bills would be considered in the house as in committee of the whole, where after general debate it would be subject to amendment under the "five-minute rule." Then it would be laid aside for final action on completion of consideration of all in "committee of the whole."

The program proposes this order:

Alaska coal leasing bill, six hours' general debate; bill to encourage prospecting, mining and treatment of radium-bearing ores in public lands and secure adequate supply for government and other hospitals, four hours; extension to 20 years of the period within which settlers on reclamation projects may reimburse the government for their reclamation work, two hours; regulation and development of water power on the public lands, four hours; creation of a commission to codify and suggest amendments to the general mining laws, four hours.

These bills would have right of way over everything in the house except appropriation bills and conference reports, and under the resolution the house would meet at 11 o'clock each morning, and during general debate hold night sessions.

Hundred Drown In Terrific New Brunswick Storm

St. John, N. B. — More than 100 lives were lost in the storm which swept the Bay of Chaleur on Thursday and Friday of last week, according to reports received here. The storm caused the greatest number of fatalities in the history of the North Shore.

Accounts brought in by fishing vessels which lived through the storm show that the wind blew with terrific force, Captain Samuel Beck, of the schooner Warren, estimating the force of the blast at 150 miles an hour at times. The vessels known to be lost, whith their crews, are:

Captain Albers, schooner and crew of five.

Rubin company schooner with all hands.

Schooner, riding at anchor, 15 miles off Shippegan, all the crew being wept off her decks.

Schooner lost off North Cape, Prince Edward Island, with all her crew. Three vessels lost off Miscou Point, their crews' bodies picked up.

Vessel destroyed at Point Canoe, with no one saved. Many other schooners and boats are missing from the Caraquet, St. Simone and Shippegan fleets. From Paspediac, Que., comes word that 30 boats have been lost, with crews. Five of these boats have been picked up near Shippegan. The bodies of eight Caraquet fishermen were recovered.

Middle West Suffering From First Heat Wave

Chicago—Intense heat that caused suffering in densely populated districts continued Whednesday throughout that part of the country between the Missouri valley and the Allegheny mountains.

Chicago's temperature rose from 92 to 96 degrees. Three deaths and a score of prostrations were reported here. It was the third day of the first hot wave of 1914. The official temperature on the street was 98 degrees, one degree less then the June 1913 record, while a humidity record of 60 added to general discomfort. The weather authorities indicated that the worst of the hot wave was over and that slightly lower temperatures will prevail.

Diva Wins Divorce.

Chicago—Mme. Ernestine Schumann Heink scored a new triumph Wednesday. It was not on the operatic stage, or with royalty as an audience. She won a decree of divorce from her husband, William Rapp, Jr. It was a sweeping victory. There was no hot debate in a sweltering juryroom. Judge Sullivan, after two lengthy conferences, instructed the jury to return a verdict favoring the diva in every issue. One of these was complete vindication on the charges which her husband made by insinuation.

"Drys" Win in Four Parties.

Boise, Idaho — The county central committees of four political parties met and selected delegates to the state platform convention which meets June 30. Prohibition was the issue in naming the delegates and each party sent a "dry" delegation to the platform convention. This, it is said, makes it certain that a dry plank will be inserted in the platform of all political parties this fall. The chief fights were staged in the Democratic and Republican committees. Prohibition forces won easily in the Democratic meeting.

Innocent Convict Free.

Sacramento — After two years in Folsom penitentiary for a robbery he did not commit, Fred Weinberg is free, having received an absolute pardon from Governor Johnson. Weinberg was sentenced to five years from Yolo county, being found with two ex-convicts, who were identified as having committeed a robbery at Plainfield. All the circumstances were against Weinberg. While in the county jail and hoping to get off with a light sentence, he followed the advice of several prisoners and pleaded guilty.

Europe Takes More Gold.

New York — Five million five hundred thousand dollars in gold was engaged here for shipment to Paris. The continued outflow from this port to Europe has excited considerable comment in banking circles. In the present movement, which began a month ago, $30,000,000 has been exported. Earlier in the year $16,000,000 went out.

FARM AND ORCHARD

Notes and Instructions from Agricultural Colleges and Experiment Stations of Oregon and Washington, Specially Suitable to Pacific Coast Conditions

Handling of Fruit and Vegetable By-Products

OREGON AGRICULTURAL COLLEGE, Corvallis.—With the purpose of finding some way in which all the grades and parts of fruit and vegetable products can be utilized and putting an end to the enormous waste, a new bulletin on handling fruit and vegetable by-products has been issued by the Extension division of the Agricultural College. It is pointed out in this bulletin that the profits of orchard and garden business are often practically wasted through failure to make a proper disposition of inferior grades and waste products. The ideal purpose for which it is intended all fruit growers should strive is the selling of as much of the first grade fruit in a fresh state as possible and then converting the remainder into the highest by-product form for which it is fitted. In order to do this there should be a series of by-product plants established by each association or center of fruit growers and by-products industries.

This point is illustrated in the use of apples. It is comparatively easy to sell the first grades in a fresh state, since the demand and high price for them justify the expenses of production and marketing. The inferior sorts of apples instead of being put upon the market greatly to the detriment of the fruit growing business, are converted either by canning, evaporating, or vinegar works into the form best suited to the character of the fruit and the nature of the market. Varieties of apples such as the Gano and Ben Davis are known to be but poorly suited to the making of vinegar but are said to be excellent when evaporated. Other varieties that do not command good prices in a fresh state make an excellent canning product. Still others are especially adapted to the use of jell and butter making. The whole idea is to have a series of supplementary plants in each center so that the best possible use shall be made of each grade of stuff and each variety of all kinds of fruit and vegetables.

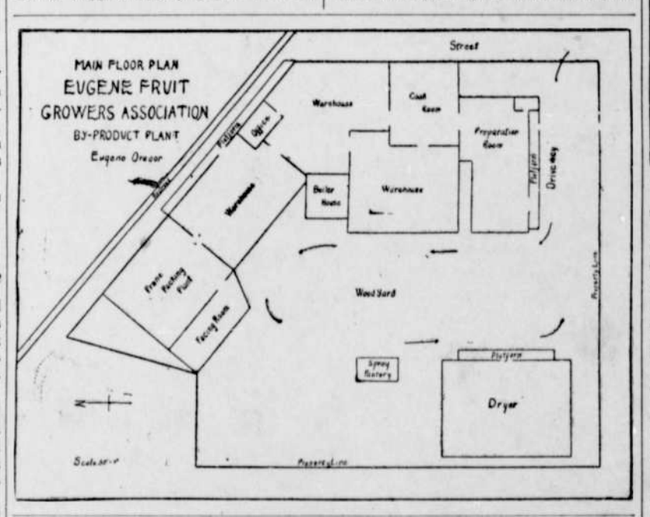
The same process of sorting and conversion into various by-products is applicable to the materials that at the present time are generally wasted. Cores and peelings go readily into jells and vinegar. Peelings can be dried to excellent advantage and later worked into jams and jells. By working this combination waste is practically eliminated, losses reduced to a minimum, and profits are put on substantial basis.

Before establishing a factory for canning these fruits and vegetables several important things should be taken into consideration. Determining factors are the kinds of produce that can be raised, the amounts produced within service distance, the amount of capital available, general conditions of manufacturing, water supply, transportation facilities, and character of the markets. Under the separate heads of the cannery, vinegar manufacturing, and evaporation, the requirements for each of these industries are dealt with. A careful study of these requirements will put the association in a position to determine the type of factory it had best establish.

"The efficiency of a growers' association depends in a large measure upon the nature of its contract with the grower. In selling the growers' product the association must sign contracts to supply certain amounts of fresh or manufactured goods to the buyer. It follows that the association must be given a fairly accurate estimate of the produce to be grown as a basis of information upon which it can make such contracts. Furthermore the grower must bring all his produce to the association so that he shall not be a competitor of the organization that is trying to further his interests, and equally the association must give its best service to the grower in every possible way.

"Products marketed by the association are usually sold in pools. Each kind of fruit or vegetable has its own pool. When there is but little fluctuation in price as with canned goods, dried prunes, etc., these pools need be formed but once during the season. When the rapidly changing market demands it pools may be declared weekly or even daily. When the products of the association are pooled, they have all the expenses of grading, preparation and marketing together with their share of the overhead charges of interest, insurance and depreciation charged against them, and are credited with the value of their product on the market. When produce is brought from a grower that is not a member of the association, the grower is given somewhat less per pound than it is estimated the produce will bring to members. The association then enters the pool with this produce and the profits from the transaction go into a reserve fund for use in permanent improvements and for such other purposes as the bylaws may indicate."

It is pointed out that Oregon has a law that permits of the organization of co-operative associations. An explanation of the conditions to be complied with and of the purposes and benefits of joining the association, are made quite plain. Sample contracts are also presented so that a study of the bulletin will give prospective association members a very definite idea of their privileges and obligations.



A good deal of information valuable to growers is given in tabular form. Table 1 gives the name of the fruit, varieties recommended for certain use, date of harvesting, average yield per acre, and average price paid. Table 2 deals with vegetables for canning, gives the names of the vegetables recommended, tells when seeded, gives cultural distance, date of harvesting, average yield per acre, and average price paid. With this definite information at hand it is possible for the growers to estimate the amount, and value of their different kinds of crops and thus enter intelligently into a contract with the handling association. Other features of very general interest to the growers are the amount of capital required to establish an association factory, the general and special officers necessary to conduct it, the volume of business required for success, the location and construction of the plant. A full page photograph of the Benton County Growers' Association canning factory and floor plans of the Eugene Fruit Growers' Association by-products plant, make these explanations clear.

In Days Gone By.

Pat one day bought a sack of flour and was proceeding on his homeward journey with the flour on his back, when he resolved to take a car. When he got up into the car he still retained the flour on his back, standing up all the while. A stout old lady, being the only other occupant of the car, asked: "Whiy don't you put your flour down on the floor, Pat?"

"Well," says Pat, "the poor old horse has enough to pull wid the likes of you and me, so I'll hold the flour meself."—Louisville Courier Journal.

Not for Him.

Goodheart—I've got you down for a couple tickets; we're getting up a raffle for a poor man of our neighborhood.

Joakley—None for me, thank you. I wouldn't know what to do with a poor man if I won him.—Christian Register.

An Unsettled Question.

"Is this town on the map?"

"We don't know, stranger. There ain't nobody here rich enough to buy a map to find out."—Detroit Press.

An Eating Proposition.

A stalwart young German applied for a position on a farm. As he walked into the barn he addressed the framer: "Hey, mister, will you job me?"

"Will I what?"

"Will you job me? Make me work yet?"

"Oh, I see; you want a job. Well, how much do you want a month?"

"I tell you. If you eat me on der farm I come for $5, but for $25 I eat myself at Schimdt's."—National Food Magazine.

No Need for Esperanto.

"Oh, dear, Max, what a prosiac person you are; I'm afraid we shall never understand each other very well.'

"Don't you worry; you understood my proposal all right, and that was in the baldest prose."—Fligende Blaetter.

Mrs. Bryde—I told my husband I was going to give him something of my own cooking and he said I'd rather try it on the dog first. Wasn't that a cruel suggestion? Her Friend—Very! And I thought your husband was so fond of dogs.—Boston Transcript.

WOMAN COULD HARDLY STAND
Because of Terrible Backache. Relieved by Lydia E. Pinkham's Vegetable Compound.

Philadelphia, Pa.—"I suffered from displacement and inflammation, and had such pains in my sides, and terrible backache so that I could hardly stand. I took six bottles of Lydia E. Pinkham's Vegetable Compound, and now I can do any amount of work, sleep good, eat good, and don't have a bit of trouble. I recommend Lydia E. Pinkham's Vegetable Compound to every suffering womam."—Mrs. HARRY FISHER, 1642 Juniata Street, Philadelphia, Pa.
Another Woman's Case.
Providence, R. I.—"I cannot speak too highly of your Vegetable Compound as it has done wonders for me and I would not be without it. I had a displacement, bearing down, and backache, until I could hardly stand and was thoroughly run down when I took Lydia E. Pinkham's Vegetable Compound. It helped me and I am in the best of health at present. I work in a factory all day long besides doing my housework so you can see what it has done for me. I give you permission to publish my name and I speak of your Vegetable Compound to many of my friends."—Mrs. ABRIL LAWSON, 126 Lippitt St., Providence, R. I.
Danger Signals to Women
are what one physician called backache, headache, nervousness, and the blues. In many cases they are symptoms of some female derangement or an inflammatory, ulcerative condition, which may be overcome by taking Lydia E. Pinkham's Vegetable Compound. Thousands of American women willingly testify to its virtue.
