Make Demand Forcible
Don't Be Trifled With

Ask for S. S. S. and Don't Stand for the "Just as Good" Talk.

Two many people are ruled by the shortest route to the "just as good" talk. Write to the nearest S. S. S. agent and get a good start. When they see that you are serious, they will stop.

When You Ask for S. S. S. Do So With Emphasis. They Will Understand.

Perhaps he thinks he is telling the truth. He has one eye on the cash register and the other on the extra profit. Just say "S. S. S." It is your only safeguard against the cheap imitations that can be put up in any cellar by the apprentice.

There is not a medicine for any purpose more carefully made than S. S. S. It represents the highest type of medicine. Its medicinal properties are just as essential to well balanced health, if the blood is sick, as are the nourishing elements of meat, milk, and eggs. It is a drop of pure S. S. S. is prepared direct from native botanical materials. Not a drop of drug is added. Not a drop of mineral is used. This is one of the most important things to know and to remember when your blood needs attention.

It is the most effective, the purest, the quickest and most reliable medicine known for poisoned blood, rheumatism, catarrhal infection, malaria, skin disease, and other ailments that show in the blood, skin, joints and muscles.

Send to those who write, get a bottle of S. S. S. today. The name is on the wrapper. Insist upon the dealer handing you S. S. S. and don't let him grate about something that he can't advertise as free from iodine or poisons and other destructive mineral drugs. (Bottle getting S. S. S. Write to The Swift Scenic Co., 609 Swift Bldg., Atlanta, Ga., for list of square deal stores.)

When You Ask for S. S. S. Do So With Emphasis. They Will Understand.

When You Ask for S. S. S. Do So With Emphasis. They Will Understand.

When You Ask for S. S. S. Do So With Emphasis. They Will Understand.

In the Chilean Andes there is a lake 10,000 feet deep up in the mountains, which is prevented only by a granite wall few feet thick from devastating the valley below. In order to avert the disaster engineers are draining the water by a tunnel and expect to supply electric current and light to all the valley cities through the water power which will be developed.

There are now more than \$6,000,000 autos used by farmers in the United States and the number is increasing at a tremendous rate. These machines are not all used for pleasure, but for economy of time and the saving of horses in the daily work on the farm.

Hot water heating of houses has been making enormous strides in Switzerland in the last 15 years. Apartment houses often have separate heating appliances on every floor. The old tile stoves are being driven out.

In rural schools in Missouri girls are organized into pick-and-shovel clubs under the direction of the national congress of mothers, to aid in the good roads movement.

All Danish passenger steamers and ferryboats on the route between Sweden and Germany will probably soon be equipped with the wireless telephone. Telephone stations will be erected on the coast.

A brand of an egg means very little and is quite useless. A full-grown well-trained egg will generally speak for itself.

A TREATMENT THAT HEALS ITCHING, BURNING SKINS
Don't stand that itching skin humor one day longer. Go to the nearest druggist and get a jar of resinol ointment (50c) and a cake of resinol soap (25c). Bathe the eczema patches with resinol soap and hot water, dry and apply a little resinol ointment.

It's almost too good to be true. The torturing itching and burning stop instantly, you no longer have to dig and scratch, sleep becomes possible, and healing begins. Soon the ugly, tormenting eruptions disappear completely and for good.

The Modern Machiavelli.
"What made you so popular with Miss Mummy?"
"I sent her 18 roses on her 32d birthday."—*Philadelphia Public Ledger.*

Consultation.
"Did the doctor pronounce you sound as a dollar?"
"Yes, and sent me a bill for five."—*Judge.*

Brute.
"Do you like my complexion?" she asked.
"No," he replied absently, "rub it out and do it over."

Will Be Collected.
Scribner—I like to believe that my poems will be collected after my death.
Sharp—Sure! The rubbish cart will still make its rounds.—*Boston Transcript.*

You Can Get Allen's Foot-Ease FREE.
Write Allen's Foot-Ease, N. Y., for a free sample of Allen's Foot-Ease. It cures itching, hot swollen, aching feet. It makes new shoes fit. It is a certain cure for corns, ingrowing nails and bunions. All drug stores sell it. Don't accept any substitute.

They will check babies at the Nat this year. It might be a good plan to check the mothers so that the babies would know where to find them.

And the sound of the picnicker in the land and the late trains from the lake resorts are filled with him and there are no straps!

Putnam Fadeless Dyes will last until the goods wear out.
Lord Howling—I notice that in this country you run for congress, while at home you stand for parliament.
Congressman Buzwire—Sure thing! Standing won't get you anything in the U. S. A. It takes speed to cop off at sea in congress.

At last something has a name that fits it. These rainbow stockings the women wear are always seen after a shower.

Many a man is a picture of health until he becomes the victim of a doctor's frame-up.

Wreathes usually are associated with sorrow, but the cheerful guy uses one to wreath his rugged map in smiles.

Another weight point in the tariff—Canada sent an area of low pressure across the border and 'most froze us out.

Query—Why do they always try to sell us fine naiment for holiday use when we're dying to get into old duds and go fishing?

More than 40 per cent of the world's annual production of tin is used in the United States.

Wireless Remedy Saves.
San Francisco—Medical directions from physicians in San Francisco, flashed over the waves by wireless to the steamer Nann Smith, bound from Portland to San Francisco, are believed to have saved the life of Mrs. J. M. Switzer, of Portland, Or., a passenger. Mrs. Switzer was taken with a sudden and violent illness when the steamer was off the coast of Northern California. Captain Magee wireless Mrs. Switzer's symptoms to the Central Emergency hospital here and received immediate directions.

"Movies" to Aid Inquiry.
Washington, D. C.—The United States revenue cutter McCulloch, which is now on its way to the Pribilof islands, is carrying a moving picture operator, who will make films showing the conditions throughout the seal-bearing islands off the Alaskan coast. The three United States commissioners, Professors C. H. Clarke, W. H. Osgood and E. A. Preble, sent to investigate the seal fisheries, are on the McCulloch, and will be accompanied everywhere on their inspection trips by the moving picture operator.

Convicts to Aid Harvest.
Kansas City—Fifteen county prisoners are on their way to Kansas wheat fields to assist in the harvest, as the result of an order made by Judge Latschaw, of the criminal court. The men were paroled by being sent to the harvest fields. "You have the best chances to make good," the judge said in paroling them. "Kansas needs men and you need liberty."

Boys Amaze Specialists.
Skowhegan, Maine—Ralph Peters, 5 years old, a native of Boston, reads and memorizes the most difficult literature, such as "Gray's Elegy" and can pronounce almost any word in the English language correctly. Noted specialists have examined him with wonder.

He could read when 2 1/2 years old. He reads the Bible to his grandparents and explains the paragraphs. He advanced so rapidly that his grandparents became alarmed and consulted a physician.

For Real Speeding.
"Pop," said Inquisitive Ignatz, "how fast can a horse go?"
"Well," replied father, "a mile in 2 minutes and 4 seconds is considered good speed. Why do you ask?"
"Oh, I was just thinking," replied Ignatz, "what a shame it was that Paul Revere, Tam O'Shanter and John Gilpin didn't have motorcycles."

The whaling season of 1913 has eclipsed all previous records, the total yield of oil for the world in that year being estimated at 800,000 casks.

GENERAL VILLA RESIGNS OFFICE

Supporters Seize Headquarters of Carranza in Torreon.

Villa Said Not to Have Proceeded to Relief of Successor in Command, as Directed.

El Paso—General Villa, through his agents here, issued Wednesday a general order that there had been a heavy split between himself and General Carranza. He said that the arrest of the Carranza officials at Juarez had been the result of a misinterpretation of orders on the part of Colonel Tomas Ornelas, in charge of the Juarez garrison.

El Paso, Tex.—Reports that General Villa had resigned as commander of the northern military zone were confirmed partially here. Carranza's offices at Juarez were confiscated by Villa supporters. Similar confiscations are authentically reported to have taken place at Chihuahua City and at Torreon.

Just after the bureau of information at Juarez had announced to the American press the receipt of a message from the front above Zacatecas, Colonel Ornelas' soldiers entered the telegraph office and the bureau and ordered that no paper be touched.

An American newspaper man was seated in the information bureau when the soldiers burst into the room. They ordered Perez Abrea, in charge of the bureau, not to touch a paper. The same soldiers, in person, command of the Juarez commander, shortly before had taken over supervision of the telegraph office adjoining.

The American finally slipped through the line of soldiers and arrived here. This action followed conflicting reports from the south regarding the failure or success of troops under General Natera, Carranza appointee, in attacking Zacatecas. From Natera official reports said that the attack was progressing successfully, while from other sources details were given of Natera's rout.

General Villa, in the meantime, had remained at Torreon, although ordered to proceed to the assistance of Natera by General Carranza. It was said by Carranza officials that Angeles, the constitutional secretary of war, had left Torreon with 5000 of Villa's troops, including a full division of artillery. Natera had complained of lack of cannon.

The information bureau at Juarez was instituted and sustained by Zubara Capman, Carranza's cabinet minister, who at present is representing the constitutional party at Washington. The question of the supervision of telegraph, heretofore a service of national ownership, long has been disputed between Villa and Carranza elements, according to authentic reports from Culiacan an Torreon. Colonel Ornelas, the Juarez commander, was a Villa appointee.

Mexico Mediation On Verge of Total Failure
Niagara Falls, Ont.—Justice Lamar and Frederick W. Lehmann, American delegates to the mediation conference, went to Buffalo Wednesday and talked for four hours with Zubara Capman and Luis Cabrera, personal representatives of General Carranza. Their purpose was to find some way to bring the constitutionalists in harmony with the scope of mediation. The mission was a failure.

The constitutionalist representatives who had come to Washington to see the American delegates told them why they could not agree to an armistice; why only man prominent in the constitutionalist ranks would be acceptable to them for the provisional presidency, and finally they believed the constitutionalist army would settle the Mexican problem soon if left unhampered by foreign complications.

The Americans returned to Niagara Falls feeling that so far as the political pacification of Mexico is concerned, mediation had accomplished nothing and probably the end of the conferences was near.

Dispatches of the forcible seizure by Villa officials of the telegraph office at Juarez held previously by Carranza officials served to confirm suspicions which have been current in many quarters here of a breach between Villa and Carranza.

Veterans Parted 50 Years.
Weiser, Idaho—To separate at Nashville, Tenn., where both received their honorable discharge from the army at the same time, and to meet again for the first time in Weiser nearly half a century later, was the joy experienced by two veterans who attended the Grand Army convention which closed here Monday. J. B. Wently, of Horseshoe Bend, and Samuel Gardner, of this city, were members of Company I, Seventy-eighth Pennsylvania infantry. Both enlisted in Pittsburg, serving through the war.

Boys Amaze Specialists.

Butte, Montana, Rioters For Time Control City

Butte, Mont.—An attempt to lynch two special deputy sheriffs, efforts to throttle the newspapers, intimidation of the fire department of the city and general rioting featured the Monday disturbance brought about by the miners in the Miners' Union, which became wide Sunday during the celebration of the organization's 34th anniversary and was capped by the dynamiting of the homes of two officers of the union by insurgents.

Early in the afternoon a crowd took two prisoners from the jail; later took possession of an aerial fire truck, which was moved through the street by the city authorities in an effort to disperse the crowds, and threats to lynch Special Deputies Owen Cribben and Martin Harkins, failed to materialize only when police, with drawn guns, rescued the two men and backed down an alley with them.

Two miners who had threatened the lynchings were arrested and taken from the mob by the same stroke that saved the deputies and were placed in the jail, but later the mob became so menacing that Chief of Police Jere Murphy ordered the two prisoners released. The crowd carried the two away on their shoulders.

When the city attempted to move the fire truck through the streets on a false alarm the rioters climbed into the machine and began to run it, but gave it back to the firemen after cautioning them not to attempt again to run through the crowd in the street.

Delegations went to two fire stations and told the firemen not to take machines from the building until they were certain there was a fire. The crowd followed the machine back to the station, broke several windows and did minor damage.

The remainder of the day was spent in parading the streets until the members of the newly-appointed executive committee of the insurgent miners, constituting themselves a law and order committee, informed the agitators that no more disorder would be tolerated, and succeeded in dispersing the gathering, the miners going to their homes.

A delegation visited the three newspaper offices and demanded that no further mention be made derogatory to the I. W. W. and that the words "mob" and "rioters" not appear in any newspaper story.

Ex-Vice Pres't Stevenson Dies While Unconscious
Chicago—Adlai E. Stevenson, vice president of the United States through the second Cleveland administration, died here late Monday at a hospital after an illness of several months.

His three children were at his bedside when death came.

Mr. Stevenson was 78 years old. His last illness followed a five months' vigil at the bedside of his wife who died six months ago. Mr. Stevenson suffered a nervous breakdown, and a month ago he came to Chicago from his home at Bloomington, Ill., for treatment. His condition gradually became worse and he entered a hospital. The burden of his years and the oppressive heat of the last week contributed to the fatal termination of his illness.

He became unconscious Sunday morning and was revived long enough to recognize relatives, then relapsed. He was unconscious at the end.

The three children who survive him were at his bedside.

Sale of Two Battleships May Involve United States
Washington, D. C.—The United States is in danger of becoming involved in a serious controversy with Turkey as a result of the proposal of Secretary Daniels to sell the two battleships Idaho and Mississippi to Greece.

The Turkish ambassador, in accordance with instructions of his government, has addressed inquiries on the subject to Secretary Bryan, and has made it clear that these vessels will be used against his country if transferred to the Grecian flag. Naturally this would be resented by the Turkish people. Inquiries also have been made by certain European nations which believe that if the Greek navy should be increased peace would be preserved.

It is known here that Greece will not initiate war against Turkey until she obtains possession of two American battleships. The moment the Grecian flag is hoisted over these craft that moment she will take hostile measures against her historic antagonist.

Restrictions Favored
Hickville Postmaster (discussing affairs of state)—Now, what do you think of our foreign relations, Ezra?
Prominent Lounger (warmly)—I think they should be barred out of this here country if they can't read our write.—*Judge.*

And Wood Wouldn't.
Marks—I hear that the Woods have separated. What was the trouble?
Paris—It seems that Mrs. Wood wanted him to dye his white hair to match her new lavender wig.

Easily Explained.
The return home of the truant "Mona Lisa" recalls a good story. A second-hand picture dealer was trying to sell what he described as a genuine Raphael. "The signature does not look like Raphael," remarked the prospective customer, after using his magnifying glass. "It reads more like R-a-s-a-e-l." "Ah," said the dealer, "I will tell you the history of that. When Raphael painted that picture he was in low water, so he put it in the wife's name for safety."—*New York Globe.*

Helped His Wardrobe.
Ragged Rogers (with newspaper)—Listen tar this, Happy. It's been discovered that silk is made of tin, of termater cans an' de like.
Happy Hooler—Dat so! Den I'll wear me drinkin' cup for a silk hat an' be in style.—*Boston Transcript.*

FARM AND ORCHARD

Notes and Instructions for Agricultural Colleges and Experiment Stations of Oregon and Washington, Specially Suitable to Pacific Coast Conditions

Sheep Raising in Oregon.
By E. L. Potter, Head of Animal Husbandry Department, O. A. C.
Oregon Agricultural College, Corvallis—The wool industry of the United States is one of very great importance. We produce in this country about 325 million pounds of wool, which is worth to the farmers something over 60 million dollars. This enormous amount of wool, however, does not meet the demands of the American people. Our mills consume approximately 500 million pounds. This extra amount must be imported from some foreign country. Australia is the greatest wool producing country in the world, producing about three times as much wool as the United States. South America also produces about twice as much as is produced in the United States.

The production of wool is so intimately connected with the raising of mutton that the two cannot be separated. In the raising of beef cattle the production of milk is almost entirely overlooked, while in the production of milk the beef end of the industry is of practically no importance. The sheep, however, is strictly a dual purpose animal, and in practically no

case has it proven possible to raise sheep for either mutton or wool exclusively. According to the report of the tariff board for the year 1910, the average receipts per head of sheep in the United States west of the Missouri river was \$2.44. Of this amount \$1.05 was derived from wool and \$1.39 from other sources; thus for all the sheep west of the Missouri river, which included approximately seventy per cent of the sheep in the United States, the income from wool amounts to forty-three per cent of the total gross income.

This proportion varies a good deal when we compare different flocks. It perhaps varies some with the different states of our Northwest, but in no case do the receipts from wool exceed the proportion of the income derived from wool is somewhat less. At the same time it is a large and important item in much of our Western country the ranchmen say that they are raising sheep for wool, while some farmers in the Eastern states say that they are raising sheep for mutton.

Such statements, of course, are not designed to be taken literally. It is true that many of our Western ranchmen manage their sheep primarily with the idea of the greatest possible production of wool and take such in the ranchmen say that they are raising sheep for wool, while some farmers in the Eastern states say that they are raising sheep for mutton.

Such statements, of course, are not designed to be taken literally. It is true that many of our Western ranchmen manage their sheep primarily with the idea of the greatest possible production of wool and take such in the ranchmen say that they are raising sheep for wool, while some farmers in the Eastern states say that they are raising sheep for mutton.
