NEW BUILDING OCCUPIED

The Mosier Valley Bank opened for business Monday morning October 5th, in its new building. The management of the bank wishes to thank all its customers and friends for their business and good will in the past that have made possible the erection of the new building. The intention and aim of the bank in the past has been to afford accommodation that will assist in the growth and development of this town and surrounding district. The hope for the future is that the new and enlarged quarters will better enable the bank to render this service. The bank welcomes all old friends to its new building and hopes to add new friends from day to day.

Friends from surrounding territory are urged to drop in the bank when in town and look over the new quarters. All are assured that it will be a pleasure to show them the new building and it is hoped the added conveniences will be made use of freely. The extra room provides a place where persons may meet to close a business deal or may drop in when having some spare time. All are welcome to make full use of these accommodations.

BANKS FOR PAN-AMERICA

Leading New York business concerns report a marked improvement in general business conditions, which have been more or less disarranged since the opening of the European war. All agree that commercial disturbances following the war scare are being adjusted to meet the unusual conditions. The National City Bank has already established three branch banks in South American countries, through which American exchange can be handled as a substitute for the Bank of England exchange heretofore used exclusively in the South American trade. Large American importing concerns in New York report that they are beginning to receive shipments of coffee, hides, and other South American products and that they believe that within a short time this trade will be almost normal, as previous to the war. New York financial men say that the action of the National City Bank providing exchange facilities through their new branches in South America is likely to make New York exchange as acceptable to South American men by the time the war is ended, and they predict that this will mean that New York is very likely to be a financial center of equal importance with London, through which for many years the commerce of the western hemisphere is passed.

Just received, another lot of samples of those good work gloves, medium and heavy wool socks from the famous Ripon factory, which I have marked with my usual reduced prices and remember the best leather goes into the sample lines. Strauss.

**PROHIBITION'S DISMAL RECORD OF FAILURES
FIFTEEN SPLENDID EASTERN STATES HAVE EXPLODED FALSE THEORY**

Maine has just elected a governor and a majority of legislators upon a platform opposed to statewide prohibition and pledged to submit to the people at the next general election a local option law. Opposed to these successful candidates were aspirants seeking office on a statewide prohibition platform

AFTER SIXTY-FOUR YEARS OF PROHIBITION, MAINE IS CRYING FOR LOCAL OPTION
