Perfect Health Is Every Woman's Birthright

A Prescription That from Girlhood to Old Age Has Been a Blessing to Womanhood.

When a girl becomes a woman, when a woman becomes a mother, when a woman passes through the changes of middle life, are the three periods of life when health and strength are most needed to withstand the pain and distress often caused by severe organic disturbances.

At these critical times women are best fortified by the use of Dr. Pierce's Favorite Prescription, an old remedy of proved worth that keeps the entire female system perfectly regulated and in excellent condition.

Mothers, if your daughters are weak, lack ambition, are troubled with headaches, lassitude and are pale and sickly, Dr. Pierce's Favorite Prescription is just what they need to surely bring the bloom of health to their cheeks and make them strong and healthy.

For all diseases peculiar to woman, Dr. Pierce's Favorite Prescription is a powerful restorative. During the last 50 years it has banished from the lives of tens of thousands of women the pain, worry, misery and distress caused by irregularities and diseases of a feminine character.

If you are a sufferer, if your daughter, mother, sister need help get Dr. Pierce's Favorite Prescription in liquid or tablet form from any medicine dealer to-day. Then address Doctor Pierce, Invalids' Hotel, Buffalo, N. Y., and get confidential medical advice entirely free. You can also obtain a book on woman's diseases, sent free.

Dr. Pierce's Pellets regulate and invigorate stomach, liver and bowels Keep the body clean inside as well as outside.

Evidence.

"There goes another married man," said the girl at the candy counter.

"How do you know?" asked the cashier.

"He used to buy a three-pound box of candy twice a week and now he buys half a pound once a month."—Philadelphia Public Ledger.

Such a Relief.

Old Soake (arriving home at 1 a. m.) —Heavensh, Mr. Burglar, how yesh (hic) frightened me. I (hic) thought yesh m'wife, at first.—Boston Transcript.

Happily Disposed Of.

"Mr. Beats," the grocer said wearily, "I ask you for the last time, will you pay that $20 you owe me?"

"For the last time?" Beats replied cheerfully. "I'm glad to hear you say that, old man. You know, I was getting awfully tired of hearing you ask that foolish question!"—New York Times.

Picked a Winner.

Ethel—How did you win papa's consent?

Jack—I played poker with him. He said he preferred to keep the money in the family.—Boston Transcript.

Method in Her Madness.

Father—Betty, I am shocked! Your mother tells me you are engaged to three young men.

Betty—Oh, well, papa, they are all football players, and when the season is over I can marry the survivor.—Boston Transcript.

REPARATION ONLY PEACE CONDITION

Lloyd George Demands Effectual Guarantee for Nations.

NEW WAR PROGRAM OUTLINED

Control of Agriculture and Shipping and Arming of Merchantmen—Outlook Good, But Stern.

London — The announcement in the house of commons Tuesday by David Lloyd George, the new prime minister, that the first act of his administration was the rejection of the proposal of the Central Powers for a peace conference constituted one of the most momentous scenes which the oldest parliamentary veterans had ever witnessed.

The new premier declared that before the allies could give favorable consideration to such an invitation they must know that Germany was prepared to accede to the allies' terms, giving "complete restitution, full reparation and effectual guarantees" and that "to enter a conference upon the invitation of Germany, proclaiming herself victorious, without any knowledge of her proposals, would be putting our heads into a noose with the end of the rope in Germany's hands."

Mr. Lloyd George asserted that at the moment Germany was penning the note, assuring her convictions as to the rights of other nations, she was dragging Belgians into slavery. He announced that the note presented through Washington contained no proposals of terms, but was a paraphrase of Chancellor von Bethman-Hollweg's speech and that the allies had separately concluded to reject it, although they had informally exchanged views and would within a few days present a joint reply.

Mr. Asquith, the former premier, seconded Mr. Lloyd George's decision with even stronger words, and almost at the same moment Earl Curzon was informing the lords that the government would enter no conference that did not guarantee for Europe the free and independent existence of nations, great and small. The Marquis of Crewe affirmed the approval of the members of the late government.

The day was a doubly important one for the commons, because the new premier unfolded his program for wide-reaching war measures and Mr. Asquith closed the last chapter of his nine years of leadership with an accounting of his war stewardship.

The principal feature of Mr. Lloyd George's program is a measure for national service, matching Germany's latest scheme, whereby every citizen will be liable for enrollment, to perform work for which the authorities consider him best equipped.

Arthur Neville Chamberlain, mayor of Birmingham and a member of the famous family whose energy and business capacity are rated high, will be director of the national service, with civil and military directors responsible to him.

The premier prefaced his review of the situation by the statement that Britons did their best in time of danger; that the country should be told unpleasant facts, and that he would give, not a dark, but stern view of the outlook. He deplored the mistakes that had been made regarding Roumania. He said the government had decided to deal firmly with Greece and would recognize the agents of ex-Premier Venizelos.

The history of the alliance had been one of tardy decision. The Central Powers had the great advantage of internal communication and working under one supreme management, while the policy of the entente allies had been too much one of separate fronts.

Mr. Lloyd George said he was faced by a world-wide shortage in crops, which had been accentuated in Great Britain by weather which prevented the sowing of winter wheat. He announced plans for the organization of agricultural control, for control of shipping and arming of merchantmen, greater control of mines and the suppression of the taking of excessive profits.

"Hello" Girls Get Wage Raise.

Spokane, Wash. — Telephone employes will carve up a $28,000 melon here Christmas Day. Every "hello" girl, every "trouble" man and every plant, office and other employe of the Home Telegraph & Telephone company will receive a substantial Christmas award this year—in the form of a bonus. Under orders from New York, Spokane officials will grant every employe whose salary is less than $3000 a year and who has been employed more than 12 months the equivalent of three weeks' salary.

Boston to Remain "Wet."

Boston—Boston Wednesday voted to continue the licensed sale of liquor after the liveliest campaign on the liquor question that the city has had in years. The vote in favor of license was 53,459, with 29,297 against. Last year the vote was 46,115 for and 31,877 against.

Rev. William A. Sunday, who is conducting an evangelistic campaign here, took a prominent part in the fight. He delivered several addresses on the liquor issue and urged the voters who attended his meetings to vote "no."

Find May Be Ambergris.

Aberdeen, Wash. — A chunk of supposed ambergris, weighing about 100 pounds and which, if it is ambergris, is worth about $51,000, was found on the seashore near Glen Grayland Wednesday by County Commissioner Phil S. Locke. Locke will send a piece of his find to Seattle for analysis. Ambergris is now selling at $32 an ounce.

A former whaler, who is somewhat familiar with ambergris, says he thinks Locke has made a big find.

FOOD COST PROBE STARTED

Department of Justice Agent Comes to Portland for Purpose.

Portland—Special Agent Bryon, of the United States department of Justice, has begun investigations of the cost of food here to determine if there have been violations of the Sherman anti-trust law. United States Attorney Reames has charge of the investigations in this district.

As the department of Justice has jurisdiction over only interstate business and traffic, any irregularities occuring within the state must necessarily be taken care of by state prosecutors.

In the event irregularites are discovered the facts will be laid before the Federal grand jury.

No details of the extent of the investigations are possible, as such would be quite problematical, but it is known that Mr. Bryon has a number of associates in the field and his work and that of his lieutenants will be most exhaustive.

Every article of food that requires large capital to produce will be under the surveillance of the Federal officers. They will trace prices from production to comsumption.

The major part of the investigations will surround the methods of price fixing.

Bee Study to Open Jan. 8.

Corvallis, Ore.—Of special interest to horticulturists and amateur beekeepers is a course in beekeeping which will be offered during the winter short course at the Oregon Agricultural college, January 8.

The course will be conducted by Professor A. L. Lovett, chief in entomology, of the experiment station, assisted by F. J. Cartan, a practical and successful beekeeper of the state. The course will aim to teach and demonstrate how bees may best be handled for profit and will show the importance of bees to proper pollination in the orchards.

20 Per Cent of Hops Unsold.

Puyallup, Wash.—Hops still remaining in the valley unsold will probably be held over until the spring, according to hop brokers and growers here. The only hope for the immediate sale of the hops is the lifting of England's embargo, prohibiting their import. Such action would cause the price to soar at once, and the growers would receive a handsome return for their product. The price is now hovering around 10½ and 11 cents, and no sales of any size have been reported for some time.

To Pass on Irrigation Project.

Centralia—A state engineer and experts from Washington state college will be brought here to pass on the feasibility of the proposed irrigation of Fords and Waunch's prairies by a system of ditches leading from the Skookumchuck river and to go over the engineering that has been obtained. Petitions for the irriagtion are being circulated but are not being signed rapidly. It is believed that Coffee creek can be used as a part of the main ditch, eliminating the necessity of building about 4000 feet of ditch.

Morton Sends Spuds East.

Morton, Wash.—The first carload of potatoes ever shipped from Morton to the east has been sent from here by N. D. Tower & Co. The car was consigned to Minnesota. The tubers were Burbanks. Mr. Tower believes that this marks the begining of a big potato development for eastern Lewis county.

NORTHWEST MARKET REPORT

Wheat—Bluestem, $1.37 per bushel; fortyfold, $1.35; club, $1.33; red Russian, $1.30.

Oats—No. 1 white feed, $35.00.

Barley—No. 1 feed, $37.00.

Flour — Patents, $7.80; straights, $6.60@7.00; exports, $6.80; valley, $7.30; whole wheat, $8.00; graham, $7.80.

Millfeed — Spot prices: Bran, $26.50 per ton; shorts, $30.50; rolled barley $40@41.50.

Hay—Producers' prices: Timothy, Eastern Oregon, $19@21 per ton; timothy, valley, $16@17; alfalfa; $17@18; valley grain hay, $13@15; clover, $12.50.

Butter — Cubes, extras, 34c per pound. Jobbing prices: Prints, extras, 38c; butterfat, No. 1, 38c; No. 2, 36c, Portland.

Eggs — Oregon ranch, current receipts 35 @ 36c per dozen; Oregon ranch, candled, 38@40c; Oregon ranch, selects, 42c.

Poultry—Hens, 14@15c per pound; springs, 15@16½c; turkeys, live, 21@22c; dressed, 27@30c; ducks, 14@17c; geese, 11c.

Veal—Fancy, 13@13½c per pound.

Pork—Fancy, 11½@12c per pound.

Vegetables—Artichokes, 90c@$1.10 per dozen; tomatoes, $1@1.75 per crate; cabbage, $2@2.25 per hundred; peppers, 20c per pound; eggplant, 25c; lettuce, $1.85; cucumbers, $1@1.25 per dozen; celery, $4.25@4.50 per crate; pumpkins, 1@1½c per pound; cauliflower, $2.00 per crate; peas, 15c per pound.

Potatoes — Oregon buying prices, $1.25 @ 1.40 per hundred, country points; sweets, $3.75@4 per hundred.

Onions—Oregon buying prices, $2.75 per sack, country points.

Green Fruits — Apples, new, 50c@$1.50 per box; pears, $1@1.50; cranberries, $12.00@12.50 per barrel.

Wool—Eastern Oregon, fine, 24@30c per pound; coarse, 33@36c; valley, 33@35c; mohair, 35@45c.

Cattle—Steers, prime, $6.75@7.75; good, $6.40@6.75; common to good, $4.25@6.25; cows, choice, $5.50@6.50; medium to good, $5.25@5.50; ordinary to fair, $4.50@5.00; heifers, $5.00@6.00; bulls, $2.75@5.00; calves, $3.00@7.00.

Hogs—Prime, $9.50@9.70; good to prime, mixed, $9.40 @ 9.50; rough heavy, $8.50@9.10; pigs and skips, $8.50@8.75.

Sheep—Lambs, $7.00 @ 9.75; yearling wethers, $7.50@8.75; old wethers, $6.75@7.00; ewes, $5.00@7.00.

HOW TO MAKE BUTTER OF GOOD QUALITY

REMOVING THE BUTTER FROM THE CHURN.

(Prepared by the United States Department of Agriculture.)

Buttermilk is washed out of the butter and not worked out. When in the granular stage this washing is easily done, as water poured into the churn settles through the grains and washes each one just as is done when water is poured over a pan of rice or peas. The temperature of the water should be

Working the Butter.

two or three degrees colder than the buttermilk which was drawn off, and the quantity added should be about the same as that of buttermilk. Before the water is poured into the churn its temperature should be ascertained by means of a thermometer. When the water is added the lid should be put on and the churn given two or three revolutions, so as to turn the butter in the water. The water is then drawn off through the same strainer used for the buttermilk. The same quantity of water, at the same temperature, is again added, and the washing operation is repeated until the water drawn from the churn shows no color of buttermilk. In addition to removing buttermilk the wash water has the effect of hardening the butter.

Salting and Working Butter.

After the washing in the churn has been finished the butter-worker is scalded and cooled with cold water to swell the pores of the wood and prevent the butter from sticking. The churn is then drawn near the worker and the butter granules are taken from the churn with a paddle and ladle and placed on the worker. The hands should never touch the butter, as their warmth melts the fat, and if they are not clean such handling is insanitary.

The butter is salted on the worker. Fine, clean salt in the proportion of one ounce to the pound of butter should be sprinkled uniformly over the butter. More or less salt may be used as the taste of the consumer may prefer.

Working the butter should be done by pressing the pile of granules with the lever until the butter is in a fat mass about one inch thick. This should then be folded over upon itself and the flattening process repeated, the butter being pressed carefully in order to avoid making it greasy. It should be worked in this way until the salt is evenly distributed throughout the mass. The working of butter distributes the salt and expels the excess moisture. The edges of the butter when broken or pulled apart should have a granular appearance similar to broken cast steel or a broken half-baked potato. Properly worked butter retains its granular form at all times. Too much working or working the butter when too soft destroys the grain, and the edges when broken or pulled apart have a slightly stringy appearance, like chewing gum pulled apart.

FOWLS NEED PROTEIN

Nitrogenous Material Essential to Egg Production.

Small Proportion of Beef Scrap With Bran, Shorts and Whole Wheat Produces Good Results Says Kansas Expert.

Protein is essential to heavy egg production. In just what form to supply this food element is a question that puzzles many farmers, as well as townspeople, who are not in a position to grow their own feed.

Insects—in season—furnish much protein where the birds are on range. Poultry feeders have used raw meats or by-products of packing plants, known as beef scrap. As the demand has increased, the price of the latter has advanced. Now a few poultry raisers consider it too expensive and are supplying protein through vegetable sources.

Cottonseed meal is the most commonly used substitute, but where this has been given in place of all other heavy protein supplying feeds, the result has not been all that could be desired, points out N. L. Harris, superintendent of the poultry farm at the Kansas State Agricultural college. On the other hand, where cottonseed meal has been used as a supplement to beef scrap at the rate of 50 per cent of the ration, it apparently has given as good results as an exclusive meat-scrap diet. On account of the bulk needed it is impossible for a hen to consume enough sour milk or buttermilk.

Ordinarily the beef scrap should constitute 10 per cent of the ration, in the opinion of Mr. Harris.

WINTER STORAGE OF APPLES

Horticultural Department of Kansas Station Makes Capital Use of Ventilated Cave.

The horticultural department of the Kansas station has been able to carry apples through a winter with a 5 to 10 per cent loss in a cave which had a good ventilating system.

As a rule, one cannot hope to store fruits and vegetables with so small a loss.

STRENGTH OF COMMON WOOD

Government's Figures of Breaking Power of Those Usually Found in Lumber Yards Everywhere.

Every farmer should have a reference book or a card laid away which shows the comparative breaking and crushing strength of the principal woods commonly used in building and for everyday purposes. Here are the government's figures of the breaking strength of various woods, the specimens used in the tests being all two inches square, 28 inches span, and clear, green wood:

Woods Tested.	Breaking Point
Southern yellow pine (long leaf)	8,630
White oak	8,160
Black cherry	8,030
Elm, slippery	7,710
Post oak	7,380
Black ash	6,060
Silver maple	5,830
Cypress	7,110
Hemlock, eastern	6,180
Spruce, red	5,710
Fir, Alpine	5,460
Spruce, Englemann	4,200

These are only a few of the woods tested and the figures resulting, but they show those commonly found in lumber yards everywhere.

MANNER OF SEALING A SILO

When Not to Be Opened at Once Some Farmers Run in Few Loads of Cornstalks and Wet Them.

When the silo is not to be opened at once some run in a few loads of dry cornstalks and wet them well.

Others put on oats straw, two or three inches of earth or wet sawdust or an inch of oats, which sprout and effectually seal the silo so that little of the silage spoils.

When the silo is opened the rotten silage should be drawn out and spread where cattle cannot get it.

CELERY PROPERLY CARED FOR

Plant Should Be Covered or Taken Into Cellar Before Freezing Weather of Winter.

Celery will stand some frost, but should be covered or taken into the cellar before hard freezing weather. It keeps well stored in boxes in a cool cellar.

Put enough sand or dirt in the box to cover the roots well. It is a good plan to water this soil once in a while. Do not put water on the foliage.

Always Good Humored.

Gouverneur Morris was talking about the late Richard Harding Davis.

"Davis was never at a loss for a joke," said Mr. Morris. "I dined with him at Crossroads farm one evening, the dinner being served by a new and very awkward waitress.

"The waitress, halfway through the dinner, slipped with a tray, spilled a bottle of beer down Davis' neck.

"He said to her reproachfully, as he swabbed up the beer with his napkin: "'It was ginger ale, not beer, I asked for, Gretchen.'"—Washington Star.

Send 10c to Dr. Pierce Invalids' Hotel, Buffalo, for large trial package of "Anuric" for kidneys, cures backache.

An Eye to the Future.

"What's the idea of your working so hard for prohibition?"

"I want to be recognized as one of the deserving patriots who helped to elect the ticket," replied Uncle Bill Bottletop. "Maybe they'll give me the job of hunting around for any illegal liquor and destroying it."—Washington Star.

A Hot One.

He—Before we were married you used to say there wasn't another man like me in the world.

She—Yes, and now I'd hate to think that there was."—Boston Transcript.

The End of the Trail.

A young Swede appeared at the county judge's office and asked for a license.

"What kind of a license?" asked the judge. "A hunting license?"

"No," was the answer. "Aye tank Aye bane hunting long enough. Aye want marriage license."—Everybody's Magazine.

Plowing With Shells

"They are taking the war nonchalantly in Europe."

"So?"

"Yes, as soon as the shells have quit plowing a field they sow it to crops."—Louisville Courier Journal.

An Ungallant Person.

"Have you observed the feminine influence in the election?"

"I believe so," replied Mr. Growcher. "It seemed harder than usual for the vote to give its reasons or make up its mind."—Washington Star.

No Strange Experiments.

"Did you have a homily when your minister came to dinner, Mrs. Jimps?"

"Dear, me, no, mem. I don't never try them strange dishes."—Baltimore American.

C. J. STEEPLE,

Stock & Bond Broker,
102 First Ave. South, Seattle, Wash.

All active stocks, listed and unlisted, handled on commission. Buying and selling orders promptly executed.

I am recommending the purchase of Alaska Petroleum & Coal, Western Smelting and Power, Thomas-Culross Mining, Mount Rainier Mining, Josevig-Kennecott Copper, American Telegraphone & American Marconi.

Above stocks should be bought now for investment and market profit. There's a reason.

Kennecott has paid dividends so far this year $11,142,072. Josevig-Kennecott has equally great possibilities. Kennecott is now selling around $50.00, Josevig-Kennecott at $1.00. The opportunity is yours, seize it.
