

# To My Friends and Patrons

I have been selling Nursery Stock in Jackson county for the past sixteen years. I handle nothing but the best. You are in the business of growing fruit to make money. You want good trees of varieties adapted to your conditions of soil and climate. I have a complete assortment of the standard commercial varieties. Our subsoils produce a well meshed root system and toughened wood fibre. We cut our buds and scions only from parent trees that we select being the best known specimens of their kind in the district. Thus ensuring not only exceptionally hardy trees for transplanting; but also is "highbred" as it is possible to have them. That is what you want. Fruit growing is a safe investment. It is our business to furnish good trees. They may not be the cheapest but they are the best that good care can produce.

## IT IS NOT THE CHEAPEST BUT THE BEST
