# APPLE GROWING

Is as Well Fitted for Apple Culture as North-

(Spechil Correspondence.)

were hauled across the plains by ox- the National apple show. He adiled: newer orekards begin to bear fruit." more apples."

Howard Elliott, president of the Northern Pacific railway company, said this in the course of his address. formally opening the second exhibition of the National Apple Show, Inc., of which he is president, in Spokane the afternoon of November 15. Twenty-three states and two provinces in Canada were represented in the displays, amounting to Even This Late in Season Residents 1,500,000 apples of every commercial variety. Mr. Elliott was presented by E. F. Cartier Van Dissel, second vice-president and chairman of the hourd of trustees. He added:

"Washington leads the northwestabout 9,000,000 trees at the close of when these trees are all in hearing for ievic betterment. in 1915. On that basis the yield would be us follows:

much for the consumption of the lots 9 and 10, block 45, of the town cision adverse to the local organiza-

not to be expected that all apples can bring the premium prices that some of the best fruit brings now, and the orchardists must study carefully his expense account, so as to reduce the east of production.

"These are large figures, and indicate the marvelous possibilities of this great Inland Empire, where we are meeting today.

"Montana on the east, admitted to the Union in 1889-a vast state with 93,491,200 acres of mountains, lakes, watercourses, plains and valleys; rich in gold, silver, copper, coal and lumber, and iron to be developed, together with herds of cattle and sheep, but now realizing full well its great productivity in agriculture and raising as good grains, grasses, roots and rfuits as any state.

"Idaho, on the south, made a state in 1890, of 54,272,000 acres, with the best wheat land in the world; with fruit, lamber, silver, lead, cattle and sheep, with beautiful mountains, lakes and valleys, waiting for transportation to attract its share of the expanding population of the United States.

"Washington, on the west, admitted in 1889, has 44,275,000 acres within its borders; is unique in the possession of the greatest inland harbor in the world, with great and growing cities upon it; with skipping. fisheries, timber, coal, wheat, fruit in many forms, and well-developed transportation facilities.

"Oregon, to the soutth-the oldest of the North Pacific states, admitted in 1859, an empire of 61,462,200 acres, and full of almost boundless possibilities; with the magnificent Columbia river on the north and waiting for railroads to develop ar area within its border as large as the state of Ohio without a rail in it; a country that has fruit, timber, cattle,

sheep, wheat and coal. "Out of these four great states, which are only at the threshold of their development, is carved the Inland Empire, and who shall say that the growth of commerce and population will not, in due time, make necessary for this Inland Empire a coherent and barmonious self-government by the formation of a new state with Spokane as its capital?

"These great states and this Inland Empire are peopled by strong and hopeful men and women who "'Crossed the prairie, as of old their fathers crossed the sea,

To make the west, as they the east, the homestend of the free.'

"That they are performing that task bravely and well, this beautiful IN NORTHWEST city and this apple show are good evidence. They love their country and they are glad to welcome the apple growers and visitors from the No Other Section of United States Rocky mountains, from the Missonri states of the eastern slope of the 2 and Mississippi valleys, from the lake basin, and from the Atlantic sea

Mr. Elliott said in the earlier part of his address that 58,466,986 barrels of apples were produced in the United States in 1899, while puly 23,025,000 barrels were marketed in SPOKANE, Wash., Nov. 20. 1908. However, he continued, the "Apple raising in the northwest be- falling off in production will sown gan in the Willamette river valley is change to an increase is yield and Oregon about 1845, when a few trees largely through the stimulus given by

team and planted in the fertitle soil. "Not long ago Governor Draper of near Oregon City. This was the start Massachusetts started to rejuvenate of what will be one of the greatest an orchard of his own and to encourindustries of the northwest. The age apple growing all through New shipment of apples from this district England, and the same work is gocommercially, prior to 1900, was ing on to some extent in other eastsmall, but in the last few years ern states. This is wise, because there has been a great increase, and when the apple habit is once develin the next five or ten years there oped it becomes permanent, and our will be a very rapid growth, as the great population will need more and C. ### SCRIPPERS AND MINERS CLASH

Matter of Much Moment to Southern Oregon Tried at the Roseburg Land Office During the Past Week.

A matter which is far reaching in its effect and of vital importance to miners particularly, who are operating on unpatented lands, either surveyed or unsurveyed, as well as to the homesteader or squatter, was on hearing before the United States land office in Roseburg recently.

The defendants in the case were gentlemen from Salem, Messrs. F. E. Newberry, president, and O. A. Thomas, vice-president of the United Copper Gold Mining company, whose properties are near Merlin, Joseph-

They were accompanied by Geo. Gill, Nev., who appeared as a wit-

The facts in the contest are that on the claims of the United Copper Gold company is a lot of fise timber An eastern corporation representing extensive fumbering interests in the west, assuved to take possession of the lands and timber in question by the scrip process. The eastern people, however, made an offer of compromise, asking the timber to be given them without protest and for such consideration they would not interfere in the miners' work.

This proposition was refused by the Salem people, therefore the case was filed for confest.

show, which opened last evening in of title is expected to take place is ernment. This scrip is good way down here in Oregon, 500 miles from the railroad's line, and it is with "Washington, 18,000,000 boxes; Notice is hereby given that the unsuch paper as this that the eastern Montana, 8,000,000 boxes; Oregon, decsigned will apply at the next reg- corporation is trying to gobble up 7,000,000 boxes; Idaho, 6,000,000 plar meeting of the city council of properties in Josephine county and basis of 600 boxes to the ear, near-cember 7, 1909, at 7:30 p. m., for a pany, which is at work on the premly 65,000 carloads; using three boxes license to sell malt, vincous and spir- ises and is spending money to de-

MEDFORD, OREGON

### Waltham Watches

### About Buying a Watch

Don't buy a watch from a catalogue of a mail order house-you will be disappointed if you do. Go to a jeweler; for his own reputation, if nothing else, he will see that the watch you buy has been put in thorough order, properly oiled, regulated, and is running right. Everyone knows that Waltham Watches are as accurate timekeepers as it is possible to make, and yet there are a hundred accidents that may happen to a perfect watch after it leaves our factory. A good watchmaker knows how to remedy such things, and you may be sure he will do it before he takes your money. Stant S

Don't fail to see my stock of watches before buying. I carry all makes of standard watches.
