

WILL YOUR ORCHARD

Meet Market Demands? Whether planted for home or commercial purposes, the success of your orchard must be based on the SELLING VALUE of the fruit it produces.

Will your orchard, when fruiting, return you a profit large enough to justify the time, labor, money and thought you have invested in it?

If you have planted trees grown on whole roots it will; and here are some of the reasons: The propagation of the trees that I am selling is under the supervision of men who have made the subject a life study; men known throughout the country for their ability in these lines, and who are considered authority.

My trees are grown in a locality which, on account of climatic and soil conditions, is best adapted to their most perfect development.

OUR TREES ARE GENUINE

And true to label. Buyers of nursery stock are fast learning to investigate the standing of men with whom they deal. The nursery trade of the country is fast growing to a higher plane; unreliable tree men are being eliminated; all for the betterment and permanency of the business. Our trees are grown on whole roots; when you buy trees don't accept any other kind.

I am receiving a car load of the best nursery stock that skill and experience can produce. I am in the nursery business for all time and expect to prosper in the future as I have in the past by pleasing my customers at all times. I have in stock and for sale, viz:

Pears

BARTLETT

HOWELL

COMICE

ANJOU

PRUNE and APRICOT, S

Peaches

EARLY ELBERTA

LATE ELBERTA

MUIR

CRAWFORD

Formerly Baker

Apples

NEWTOWN
