BUTTE FALLS IS THRIVING PLACE

Railroad's Advent Means Much to Town—Talk Already of Incorporating—Activity Great.

BUTTE FALLS, Dec. 9.—(Special Correspondence)—Butte Falls is likely to become a very busy and thriving place from spring on through the year. The railroad is rapidly approaching the town, the crews are clearing the right of way at both ends, the survey is being finally and definitely located, the various switches are being provided for and a convenient track will be run to the mill from near the bridge, on the new road and already tentative orders for a large quantity of lumber are being placed. The townsite company and the railroad manager are getting closer together and a spirit of co-operation as well as harmony is being manifested. Now if the town lots are sold at reasonable prices and inducements offered to settlers and plants established another year will see Butte Falls very prosperous. We must have business men of foresight and capital with earnest activity and encourage the right sort of people to come in. The "dewey" interests must evidence a willingness for the pushing of the material interests of the town and surrounding country and all will be well.

Citizens Meet.

An informal citizens meeting was held recently to consider the telephone and Crater Lake road proposition. A committee was appointed to look into these matters. It was suggested that steps be taken to incorporate the town but as this cannot be done because of the absence of the necessary preliminary conditions nothing is likely to come of it. When Butte Falls is ready incorporation will come and business men of experience and judgment will execute the plans. Another question is that of expense which will fall upon the petitioners, and must be provided for and at this there are people of sufficient means to undertake this step. When the right men come and invest and take hold of the interests, establish steady, continuous pay rolls, erect plants and put the town upon an assured basis for the future it will be easy enough to organize a municipal government, but as it is now nothing can be or will be done until the railroad reaches here. Lots sold at reasonable figures, lumber provided for homes and inducements given for people to settle among us and conditions changed materially from the present and those who have large holdings show an interest of co-operation with the railroad influences. Until that time we must wait. Butte Falls is a beautiful and natural location for a town and must become an important center and we are all ready to work for this end and invite people of intelligence, enterprise and judgment to come among us and enjoy part of the good things in store.

Medford, Oregon: This certifies that we have sold Hall's Texas Wonder for the cure of all kidney, bladder and rheumatic troubles for ten years, and have never had a complaint. It gives quick and permanent relief 60 days' treatment in each bottle. Medford Pharmacy.

SELLS LUMBER ODD LENGTHS

Coast Manufacturers Take Initiative in An Important Step Toward the Saving.

PORTLAND, Dec. 9.—The Pacific coast lumber manufacturers have taken the initiative in an important step for the promotion of proper and conservative use of their timber supply. Practically all of the large manufacturers of lumber in the states of Oregon and Washington have entered into an agreement to manufacture odd, as well as even lengths in flooring, finish, and similar planing mill products. Heretofore, it has been customary to manufacture these products in even lengths only. Now, it is proposed to trim the manufactured lumber to lengths of odd numbers as well as even numbers of feet. Under the old systems, a considerable portion of the lumber which came to the shaping machine was wasted and this action has been taken in order to save that waste.

Considerable opposition to this innovation has arisen among retailers and consumers. The retailer contends that it is impossible for him to dispose of odd length material because of the common practice in the construction of wooden buildings, claiming that the initial saving of the manufacturer is transferred to the consumer. This is denied, however, because of the proportionally small amount of odd length material which will occur under the new system, and because of the latter day practice of laying sub-floors of rough lumber and sheathing on the sides of the house before putting the finishing material in place.
