HEALTH HINTS

Any kind of open flame consumes as much oxygen from the air as four adult pairs of lungs.

Would you consider, and light "cheap" that affected the health of your wife, your children, or yourself, by depriving the lungs of oxygen?

Electric light is the only kind of light that consumes no oxygen, and does not vitiate the atmosphere.

It burns in an air tight bulb.

Its good light.

When you think it over—isn't it the cheapest light?

Human life is a progression—always towards some better thing—some higher state of civilization.

It is this constant yearning for better things which characterizes, and sets apart, the human race from the brute creation.

What would we think of a human being today who, in the midst of civilization, persisted in living in a cave, clothed with ruds skins, shunning society, and conducting himself as a savage.

You are ready and willing to adopt any new things in your house which can be proved a source of additional comfort, and cheer and health.

We want you to think about a few facts regarding electricity, which, we believe, entitles it to your earnest consideration.

We know that if you once realize what electricity will do to make your home more homelike, more cheerful, more charming, you will need no persuasion—you will insist on electricity.

We know that if we can show you where electricity will lighten your burdens and make your life more livable, you will need no urging to adopt it.

In the first place, let me talk to you on light.

Electric Lighting in the Home.

A well lighted home dispels the gloom and invites hubby, and the grown-up boys and girls to stay in evenings.

Nothing conduces so much to cheerfulness and social congeniality as a brilliantly and pleasantly lighted fireside.

And nothing quite realizes that happy condition so consummately as electric illumination.

You may talk about other means of artificial light, but after all, the kerosene lamp, gas, acetylene and the various other forms of light, can be considered but stepping stones, leading up to the ideal illuminant—electricity.

We have reached the culmination point of illumination in electricity and today, nothing is known to making that so nearly approximate sunlight as this wonderful force.

No matter how richly the home may be furnished, if it is poorly lighted, it throws a depressing loom over everything, and destroys the cheerful comfort that every home should radiate.

The Family Circle.
The family circle gathers together, around the hearthstone evenings, and that is the time, above all others, that the home should be brightly illuminated.

Electric lighting, with its soft glowing brilliancy, makes the home more attractive, inviting, and congenial and not only augments the beauty of material appointments, but welds the entire family together, evening, into a happy, satisfied home circle.

If you want to drive your boys and girls out on the streets evenings give them a dimly, gloomily lighted home.

If you want to keep them in evenings give them a pleasantly lighted home.

Electricity plays its part, with no uncertain hand, in the welfare of our boys and girls.

But that isn't the whole story by any manner or means.

Electric lighting in your home is neat, handsome, and clean. It diffuses a steady, even light, unaffected by draughts, and offering the easiest light, known, on the eye for reading.

Unlike all other lights, it casts no shadows, whatever, but sheds its brilliancy in all directions, unimpeded by fixtures or brackets. No heat.

And in the summer time, you who have felt the withering heat in the home, have not thought kindly of your gasoline or lamp light, which has seemed to join forces with the hot temperature in an effort to make life well nigh unbearable.

Electric lighting instead of heating the house, gives you a cool, refreshing luminosity that can be seen, not felt, that can be appreciated—not condemned.

The Light Question.

The bell has sounded the knell of kerosene, gasolene lights and other forms of incompetent illumination.

Are you ready to quit them? Haven't you tolerated them long enough?

There was a time when burning pitch faggots furnished the only means of artificial illumination folks knew about. And it was considered sufficient.

Then came the tallow dip, and everybody discarded his pitch faggot in disgust.

The tallow candle was next to exert its supremacy over the tallow dip, and folks were glad.

The next step of development was kerosene lamps, and they in their turn were welcomed as a pleasing step in the right direction.

Then came the gasoline lights, which Jacksonville, Medford's suburb, tried and cast into the junk pile several years ago.

And now as a logical development of science, we have the greatest of all illuminants—electricity.

Maybe some day something will replace electricity.

But the probability isn't strong enough to justify us in waiting for it.

Advantages of Electric Light.
No other form of artificial illumination equals electricity in brilliancy, safety, neatness, healthfulness, economy and cheerfulness.

Electric lighting emits no fumes or odors, and is the one hygienic light for living rooms and bed rooms.

The fact that electric light consumes no oxygen, like all open flame lights do, proves it to be the healthiest light known.

It keeps the air as pure and wholesome as if no light were burning at all.

The importance of this one feature is readily apparent when it is known that an open flame light burns more oxygen, from a room, than four persons would breathe.

No matches. No dangerous, dirty matches are needed in the home that is electrically lighted.

No washing and filling of lamps, no danger of explosions; no danger of leaks; no plumber's bills; no flickering flame to be blown out by a sudden gust of wind; no fine smudge of soot continually emanating from your light to be deposited on curtains, draperies, and furnishings, when you want to flood your home with light, simply turn the button.

Think hard now—don't you want it?

Notice.

This is to inform the people of Medford and vicinity that I am still agent for the Aladdin Mantle lamp, and they can be seen at Strang's drug store.
