electrical chafing dish make a strong appeal to the young wife as well as the seasoned housekeeper. She has found that a chafing dish affords not

only a quick and economical means of preparing impromptu repasts, but also that it enables her to prepare on the dining room table many dishes that supplement and round out the bill of fare previously prepared on the kitchen stove.

If you do not possess one of these useful articles, or are using one of the old style alcohol burners, come in and see the new General Electric chafing dish. No fuel is required, consequently there is no flame, smoke or soot to guard against. It can be used in any room where an electric lamp socket is available. It is sanitary, convenient and safe. It is handsomely designed and finished, and makes an ideal gift.
