

## CARDINAL WAVES O'ER BLUE AND GOLD

Stanford Varsity Eight Rows Away From California—Executive Committee Refuses to Sanction Contest

OAKLAND, Cal., April 9.—The cardinals of Stanford university triumphed over the California blue and gold today in the eighth annual intercollegiate regatta on Oakland estuary.

The Stanford "babies" in four-oared shells beat their rivals by three lengths over a mile course. No starting time was recorded and therefore the time for the distance would not be obtained.

The Stanford varsity eight covered a course of one and four-fifths miles in 9 minutes flat and finished two lengths ahead of their rivals.

The finish of the varsity race was attended by great excitement when the timekeeper announced the figures in which it had been rowed.

"Nine minutes flat!" he yelled, and the majority who had heard him believed that the Stanford crew had covered a full two miles in that time, thereby establishing a new world's record. Later, however, it was announced that the actual distance was one and four-fifths miles.

The race was not rowed with the sanction of the executive committee of either college. Both committees had refused to recognize boat racing as an intercollegiate sport. That did not deter the students from entering into competition, although the results were not official.

The informality of the meet did not deter thousands of adherents of both sides from lining the banks of the estuary and cheering on their crews. The ideal weather conditions brought out a record crowd.

The freshmen race was the first to be rowed. The blue and gold four-oared shell had the better of the start, but was overtaken by the Stanford babies, who quickly forged ahead and held the lead until the end.

The varsity shells had an even break at the start. Stanford took the lead early, however, and led for the first mile by a narrow margin. The cardinals drew ahead at the beginning of the second mile and were down their opponents with a high and steady stroke.

## COMPANY GIVES ITS BOOKS TO GRAND JURY

Rather Than Have Them Seized by Federal Writ, Sugar Refining Co. Give Them to Grand Jury.

NEW ORLEANS, La., April 9.—Rather than have their books seized under federal writ, the American Sugar Refining company today brought the books before the federal grand jury.

"For many years," said Assistant Attorney-General Dennison, "the government has been robbed of sugar duties through fraudulent weighing. We determined that not another cent should be lost in this way."

"All that we ask of the company is to show that there has been no dishonesty in the weighing in this port."

That is the reason, Dennison says, that the books were demanded.

The American Sugar Refining company operates its largest refinery here and great quantities of sugar are handled each year through the local port.

## CAN ONLY BRING IN \$10 DUTIABLE GOODS

WASHINGTON, April 9.—The treasury department today made a ruling to the effect that only \$10 worth of dutiable goods may be brought into the United States by persons who make frequent trips across the borders into foreign countries.

Heretofore the government allowed each person to bring \$100 worth into the country without payment of duty.

The ruling was made following a report by customs officials that persons living along the borders of Mexico and Canada have been engaged in a profitable business of bringing in woolsens and other high tariff goods under the "exception clause."

Federal officials expect that the new ruling will break up several large coteries of traders who have been working out of Seattle, Beltingham, San Diego, El Paso, Detroit and other border cities.

It is said that a number of importing houses have a regular staff employed whose business it is to travel to and from across the line and bring in goods. This gave such business houses an immense advantage in competition with other firms who did not employ "traders."

WASHINGTON, D. C., April 9.—Thomas F. Walsh, the Colorado millionaire mineowner who died at his home here last night shortly before midnight, will be buried at the Rock Creek cemetery Sunday afternoon.

Walsh's death was due to a growth in his lungs as a result of an injury he received while engaged in mining years ago. His death was not unexpected. For several weeks doctors feared that he would succumb. He had been sick for three months. He returned from San Antonio in a special train two weeks ago, when it was feared that he was dying.

When the end came last night Walsh was surrounded by his wife, daughter and son-in-law, Edward McLean and his three physicians. He died without a struggle.

In accord with his request, the funeral ceremony will be simple. The funeral will be conducted by the Masonic order.

Walsh was born in Ireland in 1851. He received his education in the public schools. He came to the United States when he was 19 years of age. Soon after his arrival in America he journeyed to Colorado, where he made his fortune in mines. He married Miss Carrie Reed in 1879.

## TRAINMEN ACCUSED ROBBING FREIGHT CARS

Twenty-two Men Arrested Said to Be Part of Organization to Rob Company—Other Arrests Follow.

KANSAS CITY, Mo., April 9.—Twenty-two conductors and brakemen of freight trains on the Kansas City Southern railroad were arrested today and accused of having robbed freight cars. For several months there has been a gang of thieves breaking into freight cars and looting them.

Finally detectives were put on the case to learn the identity of the men doing the work. The detectives, garbed as "hoboes," rode the brake-beams and pretended to be tramps.

It is alleged that the men under arrest were members of the organization. It is intimated that other employees of the company will be arrested soon.

## POLICE INVESTIGATE STORY OF DEAD ROBBER

SAN FRANCISCO, Cal., April 9.—Following the sensational deathbed confession of Harry Hall to the commission of a score of robberies and holdups, the police today continued their investigation of the dead footpad's story.

The robber, who died from a bullet from the revolver of Patrolman James J. Casey, after Casey had been wounded, confessed to several robberies here. His confession differed in some respects from the circumstances of the crimes, but it is generally believed that he did the robberies to which he made confession.

The difference in details is regarded by the police here as indicating that Hall had a confederate and they have been looking for the man. This theory is borne out by the statement of the victims of the St. James hotel holdup, who declare that two masked robbers participated in the crime.

You wouldn't think it probable, would you, that a merchant who has a really notable lot of bargains to offer you just now would fail to advertise that fact fully and prominently? Well—it's not probable!

Orchards  
Farms  
Town Lots

ONLY THE BEST AND AT REASONABLE PRICES.

I am in position to be of material use to you in helping you locate in the Rogue River country. My acquaintance with the present owners and knowledge of the soil and conditions of every kind, favorable and otherwise, are at your command. What you want are all the facts, then you can make an intelligent investment of your cash.

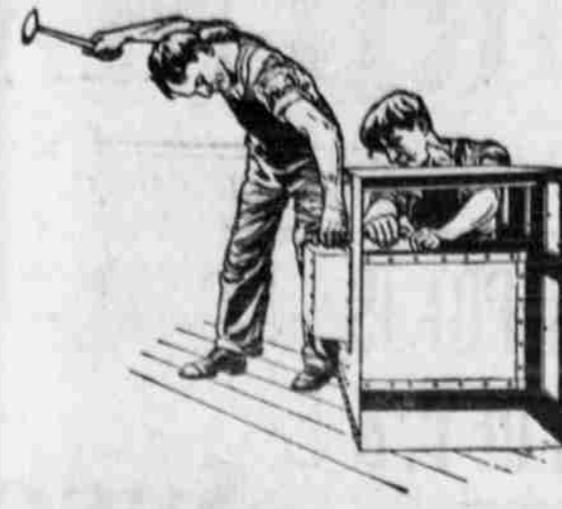

I have a list of very excellent bargains which, of course, is constantly changing, but never mind that—come and see me and I will help you get what you want, whether on my list or not.

Correspondence solicited from those at a distance who wish to learn of this land of health and opportunities.

**Monarch**  
MALLEABLE  
The 'Stay Satisfactory' Range

Why Malleable Iron?

Common gray iron would not stand the ringing blows of the heavy hammers that drive home and set the hundreds of rivets in a Monarch. STOVE BOLTS AND STOVE PUTTY WON'T DO. Malleable iron is tough and unbreakable. It is used in the Monarch for the top, other easily broken parts, and to reinforce every seam in the range.

## IT PAYS FOR ITSELF

**SAVING FUEL**  
It is only reasonable that an air tight range should save fuel. The oven seams are tight—no air leaks into the flues to cool off the currents of heat passing around the oven. Fire-box and draft seams are tight—the fire can be controlled perfectly. It doesn't burn out at night as though the drafts had been left open.

**SAVING WORK**  
The top is Polished Malleable Iron—it needs no stove blacking.  
The body is Polished Wellsville Steel—it needs no blacking nor paint.  
The nickel is all on plain surfaces—it is easily cleaned.  
The seams are tight—no escaping dust to clean up.

**SAVING TIME**  
Because a tight range, the fire acts quickly on the top and oven when the drafts are opened.  
Because a malleable top, it may be made less thick and therefore will heat through in less time.  
Because it saves work, it saves the time that would be taken in doing the work.

We also carry a full line of the well known STEWART and MENLO RANGES, best values at moderate prices. We have on display a most select line of RUGS in all grades from INGRAIN to ROYAL WILTONS. It will pay you to see us before you buy.
