

URGE ROAD ON KLAMATH SIDE TO CRATER LAKE

Chronicle Urges Appropriation by County to Construct Auto Road to Crater Lake in Klamath County—Nothing Definite Has Been Done.

(Klamath Chronicle)
Now that the time is approaching when travel will soon commence via automobile—and otherwise—to Crater Lake and the scenic mountains and gulches along the way it is time to begin to figure on bettering the conditions of the highway between here and the lake.

The Rogue river country is raising \$200,000 for the building of an automobile boulevard from Medford to Crater lake to further travel on that side of the mountain. It is stated by reports from Ashland that the people of that country will make a highway from Crater lake into the valley which will not only be a credit to the country through which it built and the people who built it but will make travel by automobile or any other of transportation very comfortable as well as speedy.

The people of this side should begin to figure on bettering the condition of the road from this city to Crater lake in order to have through travel from here to the main railroad line on the other side of the mountains as comfortable as possible. Our people should not let the Rogue river people outdo them in the matter of road building as an inducement for the people to make the trip from here to Crater Lake and return.

Nothing definite has been done so far on this side toward building an automobile boulevard from here to the lake. However, County Judge Griffith says the county court stands ready to do his share toward this highway. He says the county will spend just as much as it can see its way clear to spend on this road. What this amount will be, of course, is problematical, and rests solely with the county court. That the individual citizens who will be benefited by such a road should contribute some of the money needed for this highway is recognized by all and there is no doubt but that a large amount of money could be raised in this town for this purpose.

Superintendent Arrant, of the Crater Lake National park, states that it would cost as near as he can figure about \$75,000 to build a good automobile boulevard from here to the edge of the national reserve. Of course in the reserve the government has complete supervision of the roads.

Just what will be done by the government on the building of roads cannot be said now.

Regardless of this, the road should be constructed from here to the edge of the reserve by the county and local people and the matter should be taken up at once.

It is only a few weeks until travel will commence to Crater lake. The announcement made a few days ago in the Chronicle that the Southern Pacific would sell through tickets from San Francisco via this city to Portland by the way of Crater lake should stir up our people to the importance of making this road a good one on which to run automobiles.

SCHAEFER'S SON MAY BECOME GREAT PLAYER

CHICAGO, Ill., May 6.—Jacob Schaefer, 16-years-old son of "wizard" Jake Schaefer, may be a billiardist of incomparable ability by the time he attains his majority. This is the prediction of "Father of Billiards" Thomas Foley. A few days ago the son of the former champion was a caller at Foley's Hall for a little leisure, and he was provided with a set of championship ivorys. "I located him at the tournament table opposite my desk so I could see him work," said Foley, teacher of champions. "I was much pleased with his work, I assure you. His method of play, as well as his style of stroke, is just like his father's. He has that same quick conception and execution. If he could have about three years practice with men like Blosson, Sutton, Morningstar and Hoppe, he would be at the top before he is 21 years of age."

NOTICE TO ARCHITECTS.

The board of directors of school district No. 49 will meet Friday evening, May 13, 1910, at the high school building at 7 o'clock p. m. to consider plans and estimates for a six-room annex to the Washington school and a ten-room ward school.

40 ORIS CRAWFORD, Clerk.

WANT AN EXPERT TO FIGHT BLIGHT

Fruit Growers of Yolo Want Pathologist Sent There to Aid Them in Fight.

WOODLAND, May 6.—County Horticultural Commissioner G. H. Gecke and Irvine Blowers, a prominent horticulturist, are making efforts to have an assistant pathologist of the state university stationed at Woodland for a portion of this season to assist the fruitgrowers in their fight against blight and trip and other fruit pests. They have made an appointment with Prof. Ralph Smith, in charge of the pathological work at Berkeley, and impress upon him the importance of having an assistant stationed at Woodland.

Dr. E. Yeaw is at present stationed at Vacaville, and for six months has been making a vigorous fight against the peach blight, trip and other diseases that have been so injurious to peaches, pears, walnuts and prunes. Messrs. Hecke and Blowers have asked that when Dr. Yeaw has completed his work at Vacaville that he be transferred to this city.

Mr. Hecke says that \$40 a ton has already been offered for pears, and he believes the price will go to \$60 a ton before the season closes.

DISCOVERER OF OREGON GOLD PASSES AWAY

Luther Hasbrouck, a California pioneer of 1849, died April 11 at Leslie, Mich., aged 84 years. Mr. Hasbrouck returned 10 years ago to Michigan to spend his declining years.

Left as a young man practically without any means, Mr. Hasbrouck succumbed to the lure of the California gold mines, and left New York in a sailing vessel for the Isthmus. He reached San Francisco two months later.

In 1850, together with a number of friends, Mr. Hasbrouck started north for Oregon. Attacked by Indians on the way, the six pioneers killed 16. In the same year Mr. Hasbrouck was captured by Indians. He was bound to a tree and left to die, but a rain storm coming on he was able to work himself loose.

At Josephine Creek, Or., Mr. Hasbrouck, with his five friends, made a gold strike. They left to get provisions, and returning in 20 days discovered a camp of 2000 persons. They surmised they must have been followed on their original trip and that word had been sent to California.

Mr. Hasbrouck gave the Illinois river the name it still bears. He helped build the first church in Lane county, Oregon.

Mr. Hasbrouck is survived by a son, Hubert L., of Hood River, Or. There are three other sons, Frank D., Courtland R. and Roy, and one daughter, Eva Covert, all of whom are still living.

Ashland Boy Honored.

Word from Berkeley, Cal., is that Company H. University of California Cadets, carried off first honors among 12 companies at the annual inspection and competitive drills conducted by United States army and national guard officers Monday, says the Tidings. Company H is captained by Charron M. Staples of Ashland, a student in engineering and mining at the school and son of E. T. Staples. Charron's many Ashland friends and acquaintances will also be pleased to learn that he has been chosen to go to the Tan Beta Pi fraternity national convention at Lehigh University, June 8, 9 and 10, as a representative from the California university organization. Charron will be home May 19 and expects to leave for Philadelphia on June 1.

TWO PETITIONS FOR FRANCHISE IN ASHLAND FILED

Electric Road and Gas Franchises Up Under Initiative—Election Date, However, Cannot Be Set Until Next Meeting of Council.

Two initiative petitions were filed with City Recorder Eggleston Tuesday, calling for franchise privileges, says the Ashland Tidings, to be voted upon by the people at a special election to be called in the near future. The one is what is popularly known as the Allen blanket franchise for the use of such streets as Ashland for electric railroad purposes as the grantee may select for a period of fifty years. It allows for a year's time for the beginning of work within the city for the utilization of the franchise and two years for the final designation of such streets as may be desired for car purposes.

The other franchise desired is the one by J. R. Anderson of Pasadena, Calif., for a gas service in this city for a period of 35 years, which is guaranteed to be furnished at a net maximum charge of \$1.50 per thousand feet under the meter system, with a minimum charge of \$1 a month for service. A further reduction is provided for larger consumers of gas.

The council did not meet Tuesday evening for regular session, as scheduled, on account of the absence of the mayor and other members of the body on their prolonged paving inspection trip to California, hence there can be no final consideration of the petitions before the next meeting of the council on May 17. Meantime City Recorder Eggleston will verify the legality of the names on the petition, of which however, there is no question.

The council must, under the provisions of the law, call a special election to vote on these franchise ordinances within not less than fifteen nor more than thirty days from the date of the formal acceptance of the petitions, which will bring the date of the election not less than fifteen days nor more than thirty days after May 17. There is considerable agitation for a careful consideration by the people of both these franchise ordinances, and it is not unlikely that the council will give the people all the possible time to do so.

Haskins for Health.

Just a Story

I am from "Old New England," and not ashamed of the fact, but I am now a citizen of Oregon and am proud to say the Rogue River Valley is my home. And, to make it still better and give a more definite location, it is in the progressive city of Medford that I have "pitched my tent."

My native state is not the place to grow balloons, therefore I make use of no "hot air" in my talk.

After two years' stay amid these proteeting hills, I have concluded that the best thing to deal in was land, a thing that is limited in quantity and as it is always sought after is always rising in value.

I do not wish to get all the real estate business in Medford, but do desire my share.

Therefore, I respectfully invite you to call at my office and see if I have not got just what you are looking for at a price that won't strangle you. Truly yours, as usual,

George F. Dyer

HILL ROAD IS RUSHING WORK

New Town Is Headquarters for Contractors and Work Is Being Done Rapidly as Possible.

KLAMATH FALLS, May 6.—The plat of the new town of Crescent, 100 miles north, has been filed with the county clerk and accepted by the county court. A new crew of 25 or 30 men is now employed in clearing the streets and lots have already been placed on sale. That this to become a town of no small importance is shown by the fact that it will be a very busy center from which railroad work will be pushed all summer.

The main line of the Hill railroad will run through Crescent. The contract for the building of the 127 miles of this line was let by the Hill people a few days ago, will complete the road to a point at the Klamath Indian reserve about 30 miles this side of Crescent. Two parties of

railroad surveyors are to be stationed at Crescent within the next few days. One of these will work east to Ontario and the other west to Medford.

ONE DIME.

The Pasadena of Oregon

People of refinement; people with means; retired business men; professional men; college and university graduates, are coming to the Rogue River Valley by the score. Within the past two years almost a hundred Chicago and Evanston, Illinois, people have purchased homes near Medford, and nearly every one of them has a friend or two whom they hope to induce to come and locate in the valley.

New York, Philadelphia, Boston and many other eastern cities are almost if not quite as well represented, while St. Paul and Minneapolis have more representatives here than any other several cities combined.

Think these statements over and get your thinker going. Write to the undersigned or the Medford Commercial Club for detailed information about the country, and you will never have cause to regret it.

Bearing Orchards Near Medford

Most of the producing orchards have been held in large holdings until recently. A few weeks ago the Eden Valley Orchard, containing 605 acres, was placed on the market in any desired acreage. We have been authorized to offer the bearing apples and pears for sale, and if you know anything about this country and want a desirable block of bearing trees, write or come soon. During the past week over \$150,000 worth of the property has been disposed of. It is located within two miles of Medford at an elevation of about 100 feet above the city and is one of the best kept orchards in the world. Parts of the orchard offered for sale have paid the owner over \$600 per acre per year for four years straight.

Do not come unless you are prepared to stay, for just so sure as you do come the combination of fat soil, grandeur of scenic beauty and Italian climate will steal you, body and soul. After one visit here you will be miserable any other place on earth.
