#### GREAT DEMAND FOR It is Important to the Merchant That He Should Be a Good Advertiser---But it is Also Very Important to His Patrons That He Should Be!

The buying public has a distinct interest in whether or not a merchant advertises. For it is an economic truth that only the merchant who advertises can afford to offer actual values-to make price-concessions that are really competitive-to do business on the smallest possible per-sale profit.

The buying public has come to know this-to know that the buyer has a direct interest in the question of whether the seller advertises. The buying public has come to know that the buyer pays the penalty of patronizing the non-progressive store, where small volume of sales makes large per-sale profits in-

It has come, therefore, to be a matter of personal interest to a prospective buyer as to whether he or she is dealing with a progressive or with a non-progressive merchant. This personal interest is a purseinterest (no, we didn't say "purse-onal" interest); and therefore comes nearer home than the mere matter of pride in preferring to buy at a LIVE STORE.

Although that sort of pride, somewhat generally held by the people of a city, is what makes the town worth living in-worth doing business in-worth believing in!
