FRUIT MEN PLEASE NOTE

Suggestions as to What is Wanted in the New York Market Supplied by Sgobel & Day—No Half-Box Pears Except Comice.

Sgobel & Day, the New York commission men, make the following suggestions to fruit shippers and growers:

Apples—Many of the buyers say that while a handsome label or brand is always desirable, many of the growers or shippers neglect to put the variety, Spitzenbergs, Winesaps, Newtown Pippins, etc., prominently on the box and which always should be done so that it can be distinctly seen. It is always advisable also to put the number of apples in the box on the outside of the box—72, 96, 112, 128, etc.—and all these marks should be on one end of the box only. You take our advice and do this if you can.

Pears—Half boxes should never be used excepting for Comice, and the number of pears in the box should always be stamped on the outside and stamped so that it can be seen. For Bartletts, 135, 150, 165 pears make five-tier and are the best for New York, although a few four-tier can come of about 120 size.

Prunes—Naturally, in the Italians 5X5 should sell higher than 5X6, but none should come here packed less than 6X6 on the top of each basket. In Hungarians 4X4 are the best, and not many smaller than 4X5 if you want to make good money.

Cars—Please be careful to brace them firmly, even at a little higher cost, in order to prevent broken packages on arrival here. We should always have complete manifest and a B-L, the latter with the weight and rate on it, as well as the words, "care of Erie railroad at Chicago," and same to be mailed as a telegram is never necessary.

The above is more for our many new friends, as those who have shipped us for years know all this, but it can do no harm to reiterate same. Above all, do not forget that New York wants and will pay good money for quality.

HOME RULE FOR COLONIES PROMISED

LONDON, July 30.—Home rule, not only in Ireland, but in other parts of the United Kingdom, is believed here to have been foreshadowed in a banquet speech made by Secretary Birrell for Ireland today.

The significant remark of Birrell's was: "Dragging Ireland in the wake of England is stupid business. We have got to have a truly impartial parliament."

This is interpreted to mean that the Asquith administration favors home rule in various parts of the empire.

The Daily Express, a strong unionist paper, already has taken up advocacy of the plan, saying:

"We think this urgent. Closer American relations are desired, but this is impossible while Irish-Americans remain hostile to England."

OREGON TRUNK SERVICE TO MADRAS IN JANUARY

It is now believed that the Oregon Trunk line will be in readiness for train service to Madras by January 1, 1911. Work on the line is being prosecuted with splendid success, according to reports from the various camps, and the grading of the road from the Columbia river to Madras will be completed by September 1.

Laying of rails will be begun as soon as the ferry at Celilo is completed. It is hoped to have the craft ready by the time the grading is finished. Ballasting of the track will be done as quickly as each mile of rails has been laid. Thus it will be but a short time intervening between the laying of the last rail and the completion of the road.

Grading south of Madras towards Bend is also being rushed, and the laying of rails over that distance will follow immediately upon the completion of the road to Madras.

Double Your Business--- Let In The Sunlight Suppose you knew a man who kept his shades drawn tight all day and burned kerosene instead of letting in the sunlight. Suppose you knew a man toiling along a dusty road who would not accept a lift—when there was plenty of room in the wagon; Suppose you knew a miller—with his mill built beside a swift-running stream—who insisted on turning the machinery by hand. All foolish, you say? And yet look around you—how few retailers take advantage of the great advertising campaigns run by food, textile, cloth and every other manufacturing line that you can name. Think a moment! What was the last advertisement you read and wondered just which store in town would be progressive enough to have the goods in stock so you could see them—and purchase? More goods are sold under the evening lamp at home than you dream of. Practically every live retailer advertises in his local papers. But how. Put up your lightning-rod! Let your customers know that you can deliver to them the goods which great advertising, paid for by manufacturers, has interested them in. They will get the habit—and you will get the business. Practically every manufacturer stands ready to help you help yourself. Ask them for electrotypes suitable to run in your own advertising. Hook their trade mark to your store. Consumer demand for advertised goods is now divided broadcast among all the stores in town. Use your advertising in local papers to focus this demand upon your store—And don't forget to send for those helpful electrotypes. Read this again, for it means money to you.
