**PULLED RAZOR IN FIGHT; IS ARRESTED**

M. E. Dorn and John Burns "mixed" it at the Nash corner Thursday about 1 o'clock, with what would have been disastrous consequences to Dorn had it not been for the interference of bystanders, and Manager Burke of the Natatorium, who is a special policeman.

Dorn, Burns and others of the construction gang came to town Wednesday evening and Dorn became persona non grata to the rest and was beaten up a bit.

At the time of the fracas he approached Burns and then reached toward his inside pocket. Burns stated he thought it was a gun he had and decided to "beat him to it." He leaped at the smaller man, chased him across the walk and into the arms of Burke, who took from Dorn's hand a razor, still in its case, however.

Mayor Eifert fined Dorn \$10 and gave him half that many minutes to leave town. Burns was released, as he put up a pretty good show of self defense. The razor was added to the chief's collection, which is assuming formidable size.

From words let drop in the bickerings back and forth between the men, the trouble is of long standing, even dating back to the mining troubles in the Rocky mountain district several years ago, which resulted in tragedies all over the northwest.

**JOHNSON VICTOR IN BEAR STATE BY 35,000**

SAN FRANCISCO, Aug. 18.—With the later returns verifying early estimates of the lead of Hiram Johnson and indicating that the Lincoln-Roosevelt candidate for the republican nomination for governor probably leads his opponents by more than 35,000 plurality, interest in the contest has turned to other offices. The closest fight is probably that for superintendent of state printing, while the endorsement for United States senator is also in doubt and it will probably require the completed vote of the state to determine who has been elected.

**SELLS FENCE RAILS FOR LEAD PENCILS**

NASHVILLE, Tenn., Aug. 18.—The old fashion red cedar rail fences in central Tennessee now furnish the world's main supply of cedar pencils, according to the information received here today from big pencil makers who have mills in this state's cedar district.

Statistics at hand also indicate that these fences are the sole remaining source from which to make the best grade of pencils, smooth whittling cedar pencils so well known to every school-boy.

Descendants of the rail splitting farmers of Abraham Lincoln's time are selling their rail fences for what their forefathers would have considered fabulous sums. The selling prices for such a fence will build four up-to-date wire fences of equal length. In exceptional instances even better bargains have been derived.

**OREGON PLAN IS ONLY WAY**

(Continued from page 1)

"As at present composed, the United States senate will never sanction the popular election of senators, and the Oregon plan is the only practical way to achieve this result. Of course, it is election by indirect, but so is the election of the president. People do not vote for the president, but for presidential electors. So it will soon come about, through the adoption of the Oregon plan, that legislators will be forced to vote for the popular choice for senators as presidential electors are now forced to vote as their states instruct.

"I think Mr. Mulkey, as insurgent candidate, has an excellent chance to secure the nomination for congress in this district. The insurgents are winning all over the country, and I see no reason why Oregon should be the exception."

Speaking of Medford, the senator said: "In the two years since I was here the city has made marvelous progress. I should like to own an orchard and live here myself, if I had money enough. But the country has developed even faster than the city. I visited the Hillcrest orchard and was shown through the intricacies of the orchard business by Mr. Parsons, and a more ideal life I cannot imagine. Both Medford and the Rogue River valley have a great future."

In commenting upon legislation needed locally, Mr. Chamberlain said:

"The \$10,000 appropriation secured for Crater Lake park survey opens the way for extensive park improvement in the future. We confidently expect to secure larger appropriations in the coming seasons. Crater Lake is becoming recognized as a national asset, and will soon come into its own. I think the Lafean bill is dead, and will not be resurrected. We have done what we could to secure a weather bureau here, and I think you will soon have one. We have stirred up the postal department and been promised speedy action in increased mail deliveries and new R. F. D. routes. We stopped the cutting of timber in the Ashland reserve and I want the people of southern Oregon to remember that I am always at their service and will be glad to hear from them individually or collectively and want them to feel free to call upon me."

Senator Chamberlain has purchased a residence in Washington, finding it cheaper to buy than to rent. "While the senate is called the 'Millionaires' club,' there are not many rich men there," he states, "but a large number who, like myself, have to live within our salaries."

**MAKES SIX DOLLARS GROW FROM ONE**

If you want to know how to make \$250 grow into 1500 in less than 9 months you should ask A. B. Saling one of Medford's live real estate dealers.

Less than nine months ago Mr. Selling purchased a small tract of land near the city for the sum of \$250, yesterday a deal was closed whereby he turned the land into a \$1500-1910 Hudson "30" automobile. The car is one of the best of its kind and is a beauty.

Mr. Selling says it is only an instance of what a few dollars will do with Rogue river investments.

**NEW YORK STOCKS TAKE A SLUMP**

NEW YORK, Aug. 18.—Drooping throughout the day the market slumped generally today. Sluggishness in the London market was responsible for the down-turn. Bull operators forced some stocks up a point, Rock Island and Washburn then climbing slightly. Union Pacific, Amalgamated Copper and Bethlehem lost 2, Steel and Great Northern preferred 1 3-4, Atchafson, Canadian Pacific and St. Paul 1 3-8, and Northern Pacific, Southern Pacific, Brooklyn Rapid Transit and American Smelting 1. The market closed steady.

Bonds were firm.

**CANAL COMPANY'S OFFICE FORCE IS BUSY**

The office force of the Rogue River Valley Canal company has been busy for the past few days sending out the following announcement to its prospective water users in the valley.

The Rogue River Valley Canal company, a corporation duly incorporated under the laws of the state of Oregon has completed surveys and plans for the enlargement and extension of the Fish Lake Water Company's canals which it has acquired.

The project, when completed, will serve all that part of the valley lying between the foothills on both sides of Bear creek, from Talent on the south, to Rogue river on the north—a total area of approximately 55,000 acres.

It is the company's intention to diligently prosecute the work of construction already commenced to be in a position to meet all demands made for irrigation service at us early a date as possible.

Lands lying under the Hopkins

Canal can be supplied with water for the season of 1911, and the company is now prepared to execute contracts for perpetual water rights on any part of this area.

That construction may not be delayed on Canal lines yet to be built the company desires an expression from the land owners of the valley as to their needs for water and to this end will appreciate applications being made so that requirements for construction may be anticipated.

The cost of perpetual water right will be \$50.00 per acre, payable one-fifth (1-5) in cash, the balance in four (4) equal annual installments, bearing six per cent (6 per cent) interest.

The annual maintenance charge for water delivery will be \$2.50 per acre, per annum, payable at the company's office on or before January 1st of the year in which service is required. Payments on both Water Rights and Maintenance become due and payable only after actual delivery of water to the land.

People go on suffering from little stomach troubles for years and imagine they have a serious disease.

They over eat or over drink and force on the stomach a lot of extra work.

But they never think that the stomach needs extra help to do extra work.

If these people would take a Mi-o-na stomach tablet with or after meals it would be a great help to the stomach in its strain of overwork.

**WATER IS KING ALFALFA IS QUEEN**

**THE FRUITS OF THIS ROYAL UNION ARE RICHES AND INDEPENDENCE.**

This applies particularly to the Dairy industry and to the business of cattle, hog and chicken raising.

We have the five absolutely necessary elements of California farming, viz.: deep, rich soil, abundant water supply, growing climate, cheap transportation and established cash markets.

The money-making capacity of the land is extraordinary.

The intelligent handling of it brings immense crops. It is impossible to find a region where the returns are more generous.

LOS MOLINOS farms earn the purchase price in a few years.

TO THE PRACTICAL FARMER the above conditions mean riches and independence.

THESE LANDS, INCLUDING A DEEDED PERPETUAL WATER RIGHT, SELL AT \$150.00 PER ACRE, one-fifth down and balance in four equal annual payments.

Call at the office and let me explain the project in detail, or write for free booklet and literature.
