

## Just a Word With Prospective Furniture Buyers

The Old Reliable Medford Furniture Co. will tell you a few facts about furniture, carpets, etc. To buy and sell furniture, so as to give the purchaser the best values requires years and years of experience. There is just as much difference in the manufacture and finish of furniture as day and night. You cannot judge a piece of furniture by the outside appearance. The material is the first thing to be considered. Southern or western oak will not answer the requirements for first-class furniture. So beware of southern made goods. Because a piece of furniture shines is no sign it is well finished. A rich dull finish can only be had by using the best of varnish and lots of rubbing. If you will take the time to stroll through our different departments (if you can get through) you will see every piece shows class in material, finish and style. We could buy the cheaper made goods, but we want to stay in business; consequently, the best is none too good for our patrons. The same is true in Carpets. Beware of the cheap made goods. Jute and other improper materials are being used in place of wool. Now all we ask of you is to compare the goods, and we have your business.

### Furniture By the Carload

SEE THE NEW ROCKERS

## NO TRACE OF AVIATOR FOUND WOMAN WOULD KILL JUDGE

Man-Bird Mars Starts Out From Helena & Across Mountains and Does Not Land on Other Side—May Be in Bottom of Some Great Gorge.

HELENA, Mont., Oct. 1.—Searching parties are scouring both sides of the Rocky mountains in an effort to find some trace of Aviator J. C. Mars and his aeroplane. Mars left Helena early today in an attempt to fly over the Rockies and to set a new world's record for altitude.

He got away to a good start and headed toward the highest peak in the range. That was the last seen of him and no trace of his landing on the other side can be obtained.

Fears for his safety are being expressed on all sides. It is believed he met with an accident and his machine and he are piled in the bottom of some deep gorge. The region over

which Mars attempted his flight is very wild and even if he succeeded in alighting in safety it is doubtful if he could find his way out unassisted. Mars' flight was watched with interest throughout this section, as many of the local inhabitants had never seen an airship in flight.

News of his starting was flashed by telephone to neighboring towns and his arrival on the opposite side of the mountains was eagerly awaited.

Fully an hour elapsed since he was lost sight of and fears arose. Searching parties in automobiles, on horseback and afoot were hastily organized. Although these have been out several hours no news of Mars having been found has yet been received.

### NOTICE.

Local Order of Eagles, Aerie 1277, will meet next Thursday evening, Oct. 6. All members are requested to be present. 170

Waits for Appellate Judge and Attacks Him With Butcher Knife—Is Overpowered and Disarmed Before She Can Do Him Harm.

CHICAGO, Oct. 1.—A woman who gave her name as Mrs. Elizabeth Burke, attacked Appellate Judge Frank Baker with a butcher-knife outside his home here today.

The woman waylaid Judge Baker as he stepped from his doorstep after eating his noonday meal. She talked incoherently of filing suits for \$100,000 damages against certain packers and demanded that he give her \$100.

Judge Baker attempted to brush past her. She drew a large knife from her bosom and sprang at him slashing wildly to right and left, but was overpowered before harming the jurist. The police say that they believe she is demented.

COHN COMES TO AID OF PORTLAND

SPOKANE, Wash., Oct. 1.—Oakland's protest of three of the four games won by Portland as a result of the playing of infielder Hetting, recently of the championship Spokane Indians, will avail Wolverton nothing in the opinion of Joseph Cohn, president of the Spokane club, who arrived home this morning from the annual meeting at Seattle.

"I purchased Hetting for \$750, with the option of turning him back after two weeks' trial," said Cohn. "On September 22 I released him and wired McCredie that he did not show good enough for that money. He is eligible to play for Portland for I never owned him."

## Irrigated Orchards

PLANTED TO STANDARD VARIETIES OF TREES

Plowed Leveled and Fenced

**\$350 Per Acre**

20 per cent cash. Balance Covering period of four years

¶The variety of trees in your orchard is of vast importance. When your orchard is in bearing it should produce marketable fruit, the kind that is in demand in the market and the kind for which this district is famous.

### IT WILL PAY YOU

to visit the splendid IRRIGATED ORCHARD OF TRONSON & GUTHRIE, near Eagle Point, and see an orchard planted to standard varieties of fruit, one of the most beautiful and profitable orchards in the Valley—the orchard which won the Grand Sweepstakes Prize at the Spokane National Apple Show, and owes its value to the foresight of its former owner in planting standard varieties of fruit and using irrigation.

### BROMMER BROTHERS

whose irrigated orchard is near the P. & E. R. R. bridge, north of the city, cleared \$250 per acre on cantaloupes this season. Their profits were at the rate of \$800 per acre on strawberries, and even this splendid showing was exceeded by the profits from their Loganberries. This shows what may be done by utilizing the space between the trees while you are waiting for the development of your orchard. ¶Buy an irrigated orchard, raise berries, and small fruit, raise Medford Rockyfords and you can enter at once upon a profitable business career.

### TRANSPORTATION

¶Nothing is more important to the grower than convenient transportation. This feature of our proposition is one of its important attractions. The Hill System has built its P. & E. R. R. directly through the center of our lands and exactly in the middle of our orchard tracts the company will build a station, giving prompt and adequate service to the growers, both for shipment and for passenger traffic. The Station will be seven miles north of the S. P. R. R. Station on Main street in Medford, and will be known as Roguelands. It will give the growers of this locality every convenience enjoyed by the growers of the older districts.

### OUR LARGE AREA

¶We have 6500 acres of orchard land, which includes nearly every kind of soil represented in the valley, and every acre of this land carries with it a perpetual water right in the Rogue River Valley Canal Company.

### OUR PAYMENT PLAN

¶Our small payment plan covering more than sufficient time for the development of your orchard, which provides for the care and development of orchard tracts, should interest every salaried man. If you will call at our office or write to us, we will take pleasure in giving you full information relative to this attractive proposition.
