What the Home Rule Bill [328] Really Is

It gives cities and towns the right to have saloons or no saloons. It gives the people who live in cities the right to vote on and decide this question themselves. It puts the control of the liquor traffic into the hands of the voters of each precinct, so that every residential district in a city or town is protected. It means real local option. All state criminal laws are maintained. Under it the farmer has the same protection he now enjoys. It is a law fitted to local conditions as they exist in every section of the state. It gives absolute control of the liquor traffic, particularly in towns and cities, where it is most needed. It will prevent the county from wiping out the city vote on city measures. It is a law which makes prohibition possible where wanted, and impossible where not wanted. It means regulation which regulates. (Paid Advertisement)
