FEDERAL SITE AGENT SILENT AS CLAM

Special Agent Roberts is still in Medford, but the clam is as noisy as a motorcycle in comparison with him when it comes to answering questions about the probable location of the federal building. Mr. Roberts is genial, courteous and receptive, but he fails to exude any information.

The Fat From the Flower.
There is not a single kind of animal food which we might not replace with a vegetable counterpart. In most cases it is merely a matter of choice which is preferable, the animal or the vegetable. In the matter of cooking fats, however, the vegetable has by far the advantage. Lard is made from the fat of hogs—often impure and unclean, always indigestible. Cottolene comes from the cotton fields of the sunny south. It makes food that can be digested with ease, even by invalids. Cottolene is recommended alike by physicians and noted cooking experts as much more healthful and desirable than lard.
You believed that "dead stock" to be salable when you bought it. Probably it was—and is. Concentrate a little advertising on it—and, in a week, forget that it ever worried you.
