Light Biscuits that melt in your mouth are made with

Cottolene

Lard is the most commonly used cooking fat, yet, according to well-known authorities, not 10% of the food cooked with lard digests naturally and easily; the other 90%, instead of nourishing the body, merely clogs the digestive organs and starts stomach trouble. Cottolene is as pure, nutritious and wholesome as olive oil, and makes food which any stomach can digest. It is more economical than lard because it goes one-third farther. Cottolene shortens your food; lengthens your life. Made only by THE N. K. FAIRBANK COMPANY
