LANtern SLIDE
HEN LECTURES

Illustrations and Syllabus on Poultry
Culture Loaned or Sold Outright
to Public School Teachers—All
About the Hen.

OREGON AGRICULTURAL COL-
LEGE, Corvallis, Ore., Feb. 21.—The
production and marketing of eggs
and fowls is taught by lantern-slide
lectures by the U. S. department of
agriculture, which has just issued a
second edition of the lecture syllabus
on the subject prepared by Prof.
James Dryden of the poultry depart-
ment at the agricultural college. The
syllabus, with some forty-five illus-
trative slides, is loaned or sold out-
right to public school teachers, farm-
ers, institute lecturers, and others
who wish to prepare themselves to
give addresses on the subject.

Egg production, the breeds and
laying capacity, housing of fowls,
feeding chickens, incubators and
brooders, fattening, and marketing
are some of the subjects covered by
Prof. Dryden in the syllabus. He
discusses, too, the unexcelled nutri-
tive quality of the egg, for both
the sick and the well; the impossi-
bility of producing a successful sub-
stitute or adulterant; and the use of
eggs in the arts, as in furnishing the
albumen for photographic papers.

"Undesirable flavors may be de-
tected in the egg after feeding the
hens heavily on foods of strong or
high flavor," says Prof. Dryden in
the syllabus. "Onions give unde-
sirable flavor, and if the hen eats them
in sufficient quantity the eggs will
be unfit for use. No beet scrap ex-
cept that of good quality should be
fed the hens. It has also been shown
that certain foods affect the color of
the egg, an alfalfa, for instance,
which, when fed liberally, gives high
colored yolks. Pale yolks usually
indicate a lack of green food in the
hen's diet."

"Laying capacity varies greatly
among individual hens. Experiment
station records show that hens vary
from 250 eggs a year to none at all.
Large broods, such as Brahmas,
Cochins, and Langshans should not
be kept for egg production; they are
chiefly for providing large chickens
for table purposes. A medium sized
brood, such as the Plymouth Rock or
Wyandotte, is usually wisest for the
average farm where fowls are kept
for home use."

"The flock should be renewed ev-
ery two years, since the limit of profit-
able egg production is probably two
laying years. In case of special
breeding stock it will pay to keep
them longer, for breeding purposes."

"The main consideration in build-
ing poultry houses is the health of
the fowls. It is not desirable to keep
more than 100 in one colony house.
It is essential that there should be
excellent supply of fresh air at all
times but there should be no drafts
or cold air on the fowls at night. Law
temperature is not necessarily injur-
ious but extremes of both heat
and cold should be avoided. The most
practicable way of overcoming this
difficulty is to leave one end of the
house largely open."

"The feeding of fowls depends
largely on the place in which they
are kept. Where they have the liberty
of the fields, the question is
much simplified; there they will pick
up a large proportion of their food.
No set rules can be laid down as to
rations, but a knowledge of some of
the general principles of foods and
feedings will help the poultryman to
avoid mistakes. Exercise is just as
necessary in the production of eggs
as food. If the weather is such
that a large proportion of nature's
food is covered, different methods
are necessary if eggs are to be secured.
Access to a straw stack or a pile
of clean straw on the floor of it"

THE LEGISLATION SESSION

PEANUT politics and obstruction tactics contributed to
destroy the effectiveness of the recent legislative ses-
sions. Fully half of the energy and time of the legislators
was spent in the effort to embarrass the administration.
Jay Bowerman, leader of assembly forces, which com-
prised a majority of the members, wasted his splendid
talents in paying off old grudges. It was never the merits
of measures that concerned him, but the possibility of re-
venge for some real or fancied political slight.

The question of whether or not legislation was benefi-
cial, was not considered. It was mainly, whether or not
it would discredit the members of the state board, and
around this petty object, revolved the oratorical efforts of
the session.

Governor West proved more resourceful and masterful
than the opposition. None of the measures introduced to
cripple his administration lived to adorn the statute books.
Every political move was adroitly checkmated, and aside
from having assisted at the funeral of some worthy mea-
sures, the assembly following has accomplished nothing ex-
cept to strengthen the administration in the hearts of the
people. His numerous vetoes will still further intrench
him.

Money was spent lavishly, and few new sources of
revenue provided. However reckless extravagance cannot
be charged. Most of the appropriations were demanded
by the great growth of the state and its institutions, and
while five million dollars seems a great sum for two
years, Oregon has become a five million dollar state.

PUBLIC HITCHING RACKS NEEDED

The farmer, fruitgrower and outside residents, Med-
ford's greatest deficiency is a public hitching rack,
where teams can be left without resorting to livery stables.
The city's lot on Riverside avenue is now used for this
purpose. It is entirely inadequate, mire, a foot or more in
depth, covers the surface. It does not begin to be large
enough.

If use of this lot is continued, it should be macadamized,
so that a farmer will not go over his shoe tops and a horse
over his ankles in mud. More racks should also be pro-
vided.

This one space is not large enough. Additional ground
should be secured, macadamized and racked. Part of the
railroad right-of-way might be obtained, or other idle land
near the business section.

This is a subject of vital interest to the country dweller,
and it is up to the city council and the merchants associa-
tion to see that this needed convenience is provided.

S. P. TO SPEND
\$150,000,000

During the Next Five Years This Im-
mense Sum Will Be Expended by
the Harriman Lines in Double
Tracking and Other Improvements.

NEW YORK, Feb. 21.—It de-
veloped recently that instead of spend-
ing \$75,000,000 for improvements on
the Union Pacific and Southern Pacific
railroads, controlled by the Harriman
interests, a sum of almost
twice that amount is to be expended
by both roads in the next five years.
President Lovett of both roads, ad-
mitted that \$75,000,000 would be
spent for double tracking. His sec-
retary, Alexander Millar, has ac-
knowledged that both roads would
spend many millions besides for
branch lines and extensions.

"We have spent millions for this
purpose in the past few years and
intend to continue these expendi-
tures," said Mr. Millar.

"Most of this work has been done
in Mexico and Oregon on the South-
ern Pacific but will be carried on in
other territories. The total amount
for extensions and other improve-
ments may reach \$150,000,000 in
the next five years."

KAISER RECOVERED
FROM HIS ILLNESS

BERLIN, Feb. 21.—To counteract
rumors that his health is seriously
impaired Kaiser Wilhelm is showing
himself in public as much as possible.
He has so far recovered from his
recent illness that today he worked
with a show of his old energy and
enthusiasm. His physicians take
every precaution to prevent a return
of the fever, cough and catarrhal
trouble.

Throughout the empire reports
that the Kaiser was in a very ser-
ious condition have been persistent.

DUKE COMING TO
VISIT MISS ELKINS

LONDON, Feb. 21.—The Home
secretary of the Duke reported
that the Duke of Abruzzi has ob-
tained a leave of absence from his
command and will spend a month or
more in the United States visiting the
family of the late Senator Elkins of
West Virginia. It is reported in
Rome that the Duke and Miss Kath-
arine Elkins have been reunited and
that their old renewed engagement
may soon be formally announced.

The poultry house will be an incen-
dive to exercise if grain is scattered
on a few minutes.

HARRIMAN LINES
ADVERTISE MORE

Meeting of Board of Directors Held
Recently in Chicago Results in Set-
tling Aside of \$1,250,000 for Ad-
vertising This Year.

One and a quarter million dollars
for advertising the resources of 10,
000 miles of railroad in one year is
the answer of the directors of the
Union Pacific and Southern Pacific
systems to the calamity howler. This
remarkable appropriation, the largest
yet in the history of railroad ad-
vertising, spells prosperity in cap-
ital letters for the United States in
the next twelve months, for this stand
in favor of aggressive but judicious
advertising has not been taken with-
out careful and conscientious weigh-
ing of the business, the crops, the
emigration, the rate decision and all
kindred problems which have direct
bearing upon railroad and incidentally,
upon national prosperity.

The passenger representatives of
the Union and Southern Pacific sys-
tems and the Oregon Short Line met
in Chicago yesterday afternoon and
decided upon the expenditure of
\$1,250,000 in advertising the facili-
ties offered by these railroad sys-
tems and the industrial opportunities
offered by the communities and
country they serve during the present
year.

"The \$1,250,000 that will be spent
for advertising," said one of the high
officials of the Union Pacific yester-
day, "will be divided between the
Union and Southern Pacific, the latter
getting three-fifths and the former
two-fifths of the amount. A
large share of it will be devoted to
new paper advertising. Most of it,
of course, will be spent in the United
States, but a considerable sum will
be used in showing the people of other
countries the advantages of living
in the western part of these United
States."

The advertising for each of the
lines, composing the systems will be
handled from their respective gen-
eral offices and the railroads will co-
operate with local boards of trade
and commercial clubs, and will cover
not only agriculture, but all lines of
industry which will be helpful to
the community.

Cricket Champion Dead.

MELBOURNE, Feb. 21.—George
Wardlock, famous cricket player of
Australia is dead here today. While
dining with his team mates he was
stricken by an epileptic fit and died
in a few minutes.

NEW POMOLOGIST
FOR CORVALLIS

Victor R. Gardner, Head of Depart-
ment of Horticulture at University
of Maine, Succeeds Prof. C. A.
Cole at State Agricultural College.

OREGON AGRICULTURAL COL-
LEGE, CORVALLIS, Ore., Feb. 21.—
Victor R. Gardner, head of the depart-
ment of horticulture at the Uni-
versity of Maine agricultural college,
has just been appointed professor of
pomology at O. A. C., to succeed
Prof. C. A. Cole, resigned, and will
arrive in Corvallis March 11 to take
up his instructional duties.

Prof. Gardner has had his train-
ing under three of the five best au-
thorities on horticulture, having had
his bachelor's degree from Michi-
gan Agricultural college in 1905, un-
der U. P. Hedrick, author of the best
omnigraph on grapes ever pub-
lished; his master's degree at the
Iowa State Agricultural college at
Ames, in 1907, under S. A. Beach,
author of "The Apples of New York,"
considered a masterpiece of his kind;
and also considerable work under S.
W. Fletcher of the Virginia agricul-
tural experiment station, one of the
best known horticulturalists of Amer-
ica.

At Ames, during his graduate
study, Mr. Gardner was instructor in
horticulture, a position which he later
occupied at the Macdonald college at
Quebec, Canada. In 1908 he was
called to Maine as assistant profes-
sor, and the year following was
given a full professorship and the
acting deanship of the college. He
has therefore had wide experience
in instructional work, opportunity
to prove his executive ability, and fre-
quent chance to show his powers as
a lecturer in his addresses to grange
meetings, farmers' institutes, and
fruitgrowers' association meetings.

Prof. C. I. Lewis, head of the O.
A. C. horticulture department, in dis-
cussing the appointment of Prof.
Gardner, expressed the opinion that
the northwest is peculiarly fortunate
in being able to interest men of such
calibre and to draw them to Oregon
to give their ability toward build-
ing up the horticultural interests of
the state.

HOW TO STOP DRINKING.

Give Orline and Destroy All Desire
for Whisky and Beer—Can Be
Given Secretly—Try It
at Our Expense.

We are in earnest when we ask
you to try ORRINE at our expense.
We will give you money back, if
after a trial you fail to get results
from ORRINE. This is a very gen-
erous offer. It gives the wine and
mothers of those who drink to ex-
cess an opportunity to try the OR-
RINE treatment. It also shows our
confidence in the merits of ORRINE.
ORRINE is recognized as the best
and most successful remedy the
world has ever known for drunken-
ness or the so-called Liquor Habit.
It is a very simple treatment, can be
given in the home without publicity
or loss of time from business, and
at a small price. Read the follow-
ing letter from Dr. Nolte, 8th and
Race Sts., Philadelphia. It will tell
you about some of the wonderful
results from the ORRINE treatment:

"I have had a remarkable case of
inebriety under my personal observa-
tion. The patient drank heavily for
15 years and reached a degraded
condition, which caused the break-
ing up of his family and separation from
his wife. Every hope was given up
of ever saving the man from his
strong desire for drink, and only a
mother's interest finally persuaded
him to voluntarily take treatment for
his diseased condition. It was my
pleasure to recommend ORRINE
your liquor habit cure, and the treat-
ment was taken faithfully. This was
two years ago and the patient is now
in a healthy condition and still an-
noyance from the use of stimulants.
I have sold ORRINE for a number
of years and have always found it
to be satisfactory. I believe you
have an exceptionally good treatment
for this disease."

ORRINE is prepared in two forms.
No. 1, secret treatment, a powder,
absolutely tasteless and odorless,
given secretly in food or drink, OR-
RINE No. 2, in pill form, is for
those who desire to take voluntary
treatment. ORRINE costs only \$1
a box. Write for Five ORRINE
Booklets mailed in plain sealed en-
velopes to ORRINE CO., 632 Orrine
Building, Washington, D. C. ORRINE
is recommended and is for sale in
this city by Leon B. Haskins, Med-
ford, Or.

Rebecca's Attention!

All members are urged to be present
at lodge hall tonight. Regular
meeting will be followed by a ban-
quet, a good time is assured all. Come
and enjoy a social evening.
