Risk Lives Daily In Fight With the Plague

PLAGUE FIGHTERS AT MEETING IN CENTER, DR. ZABOLOTNY, SECOND ON DR., ZABOLOTNY'S RIGHT, DR. WU LIEN-TEH.

PEKIN, April 12.—"The only certain diagnostician in this disease is death," remarked an eminent physician who has been in the midst of the fight on the plague in the north.

He meant that in many cases the physicians have been in doubt whether a man under observation had or had not the plague up to the moment that death proved that he had.

This uncertainty is probably responsible for the lack of that specific information concerning symptoms desired by the medical world.

COLORADO TO KEEP TAB ON CONSUMPTION

DENVER, Col., April 14.—Tubercular patients coming to Denver after today must report to the state health authorities as a result of the Hasty bill for the regulation of persons suffering with tuberculosis which passed final reading in the house.

The measure calls for physicians to report all tubercular patients to the health authorities and landlords must report all tubercular tenants. Health officers are given sweeping powers regarding the disinfection of premises occupied by tubercular persons.

Realizing how utterly impossible it would be to reach each one personally I am desirous of expressing the heartfelt thanks and gratitude of myself and my little family to all our friends for their expression of sympathy and regard at our terrible loss. Truly the heart of Medford is large.
