Jack Morrill's Thoroughbred Berkshires Increase From Two to Seven While Enroute from the East to His Klamath Hog Ranch.

Jack Morrill, owner of the Greenfield farm, near the Ankeny place at Klamath Falls, will be surprised within the next few days when he receives a bunch of fine porkers in place of two which he has been expecting for some time. The Greenfield farm was purchased some time ago and Mr. Morrill announced that it was to be made a famous breeding place for fine animals, especially hogs. L. Kinnear was placed in charge of the farm and some time ago two fine sows were ordered from Brighton, Ohio. They are of the Berkshire stock and come with pedigrees which insure them to be pure blood and of the very best obtainable stock from one of the most noted breeders of fine hogs in the United States. These two pigs were started from Brighton some days ago by express, and their combined weight is 325 pounds, one weighing 160 and the other 165. One of the porkers has arrived and the other was held up in Sacramento, but will be sent along within a short time. The reason for the delay in the second one arriving at the same time as the first will be explained by the following letter received by Wells-Fargo's agent.

"Sacramento, April 18. "Agent, Klamath Falls, Or. "Dear Sir: In shipment of hogs to L. Kinnear one sow had a litter of five pigs, and we held her here, not wanting to take a chance for her to die on the road. Just as soon as the family is in condition to resume their journey we will start them to their destination. The sow is very ugly and does not want to let the pigs suck her. A. L. DILLON, "Depot Agent."

SAN FRANCISCO, April 22.—Charging that he was forced into marriage at the point of a revolver, Henry Clay Burris, of the wealthy banking family of that name of Santa Rosa, today asks an annulment of his marriage to Sarah Jane Burris, nee Duffy. In his complaint Burris charges that he was met at the ferry station by James Duffy, brother of Mrs. Burris, and George Joseph. He says he was forced into a taxi cab at the point of a revolver and driven to the Duffy home. There, he says, he was frightened into a marriage with Miss Duffy. Members of the Duffy family denied today all of the charges made by Burris and declared that the marriage was the culmination of a long courtship. ### FREE AIR AT ALL TIMES

To procure fresh air and keep it in circulation is a problem of particular interest to those who are compelled to be inside most of their time, and particularly to business men who conduct large stores, etc., where they look for public patronage. In many of the larger cities this fresh air problem has become a matter of business to see that all stores, halls, schools, churches, clubs, etc., are properly ventilated.

In the state of Massachusetts it is required by law that 18,000 cubic feet of air per hour (or 30 cubic feet per minute) be moved per occupant in every school. What about your fresh air supply? Have you ever given this important subject a thought? Are you interested? If so 'phone for our Ventilating Fan Man. Electric light is the only light which does not consume the life giving oxygen of air. It burns in an air-tight receptacle. It is safe, economical, and does not vitiate the air.
