

SENATE NOT IN STAND PAT RANK

Progressives Force Deadlock—No Election as Yet of Presiding Officer—Bacon of Georgia is Proposed by Democrats.

WASHINGTON, May 22.—Republican control of the senate seems to be lost. Insurgent republicans have forced a deadlock and for seven ballots prevented the election of a successor to Senator W. P. Felt of Maine, who resigned as president pro tempore. In combination with the democrats the insurgents voted down the motion of Senator Cullom of Illinois, that when the senate adjourns it will be Monday. Later, to allow hearings on reciprocity to proceed, a motion to adjourn until Monday, made by Senator La Follette, was carried.

China Fast Rounding Her Armies Into Shape for Modern Warfare

DRILLING CHINESE SOLDIERS AT PAO-TING-FU.

An edict recently issued to the Chinese army by the minister of war, reminding them that military efficiency is China's only means of maintaining national and domestic security, seems to show that the Middle Kingdom is beginning to grasp the true inwardness of western civilization and that Ciesial projection against soldiers has given way to other ideas. China has now two armies, one numbering some five hundred thousand, that is ancient and inefficient, and another consisting of one hundred and sixty thousand well trained, effective men, schooled in up to date warfare and officered by men who have studied in military colleges abroad. These troops are armed with modern rifles and rapid fire artillery.

MEADE SHOWS RICH TIN ORE

Mine Near Grants Pass Gives Up Ore Which Runs About \$90 to the Ton in Tin—Assayers Have Difficulty in Naming Metal.

H. V. Meade, of the Meade Printing Company was in Grants Pass Sunday and is exhibiting several samples of ore which are thought to contain tin from his mine east of that place. The ore as assayed is 12 per cent pure and will run about \$90 to the ton.

Some difficulty was encountered in finding out what sort of mineral was in the rock, assayers differing on the subject. The same difficulty was encountered by another mining company who were taking what they thought to be gold from their property. Finally they sent samples to Chelsea England and received word that there was no mineral in the ore. They then tested the ore themselves and took the button found in it and sent it to the same firm getting an answer to the effect that there was lead in it.

GAS COMPANY IS VERY BUSY

Twenty-eight Carloads of Material is Now on the Way for Development of Southern Oregon Field—Gas Lights to Be Shown.

With twenty-eight carloads of material on the way and sites already selected for plants at Grants Pass and Roseburg, the reorganized Rogue River Valley Gas Company, now the Oregon Gas & Electric company, is entering upon a very busy summer. It is doubtful if any one concern in Southern Oregon is at present shipping such a large freight order.

The new firm style will be placed on the office window this week and the complete. The new double are street lamp put up by the company in front of their office is an innovation to Medford and many merchants have been figuring on having similar "blazes of light" erected in front of their places of business.

W. F. Boardman of San Francisco, is president of the new Oregon Gas & Electric Company and T. D. Fitch is vice president.
