**SECOND POLO GAME IS SCHEDULED FOR TODAY**

MEADOWBROOK, L. I., June 6.—The second game of the international polo match between British and American teams was scheduled to start at 4:30 this afternoon. It was announced today that there would be no changes in either team.

The members of the English team, who are assigned to duty under Lord Kitchener must sail from New York not later than June 14 in order to be present at the coronation in London.

**MORE PAYROLLS NEEDED.**  
 MEDFORD needs more manufactories, more payrolls. The Rogue River valley is specially favored with more latent undeveloped resources than any other section of the world.

There is an abundance of cheap electric power to operate factories of all kinds.

All that is needed is for Medford to make the proper inducements to get factories of all kinds to locate here. In the vicinity of Medford there are thousands of gold quartz and placer mines, with a surface showing so promising and so extensive that if they were located in Alaska or some far distant country they would cause a stampede of gold miners unprecedented.

What is the trouble? Why are these prospective mines not developed and operated? There is only one answer and that is they are unknown and unheard of, and that they are in unemotional Oregon.

Extensive publicity and advertising is necessary. A public corporation is now being formed in Medford to be known as the Medford Mining and Realty bureau; capital stock \$10,000; shares, \$10 each.

It is desired that every business man and every citizen in Medford interested in its prosperity, subscribe for one share each.

The money is to be used in advertising mining and other resources of Medford and the Rogue River valley with a view of getting new capital for the development and operation of mining and other resources and the building and operation of factories of various kinds.

If this movement is supported by the business men and citizens of Medford, it will make this city a mining and manufacturing center and will double the population of Medford within five years.

It is expected that the stockholders will get their money back through commissions on the sale of mines and real estate.

With a view of making an inducement for factories to locate here, the Rogue River Electric company offers free electric power for one year; provided the factories so started do not compete with the factories already in operation here.

The factories and industries already located here should be patronized and promoted by every citizen, as their prosperity means the prosperity of every citizen in Medford and the Rogue River valley.

**"REASONABLE" LYING PERMISSIBLE.**

THE United States supreme court has sustained quacks in making lying assertions on the labels of their nostrums, holding the part of the pure food and drug law which reads, " . . . the term 'misbranded' shall apply to all drugs . . . the package or label of which shall bear any statement . . . which shall be false or misleading in any particular," means that the consumer is only protected against falsehoods regarding the composition of nostrums and not against falsehoods concerning their curative value.

This is evidently another case where the court has modified the law and where the court remakes the laws enacted by congress to suit itself. The court acknowledged that the claims made in the particular instance cited—a fake cancer cure—were false, but inasmuch as no false analysis of the composition was made, the law did not apply. Thus the doors are open for the selling of all sorts of fakes labeled "cures," and no protection is afforded the public.

"Reasonable" lying is now permissible. Justice Harlan, who dissented from the majority of the justices in this decision, as well as in oil and tobacco trust decisions, asked in the former case: "Why was it necessary to make an elaborate argument to show that according to the 'rule of reason' the (anti-trust) act as passed by congress should be interpreted as if it contained the word 'unreasonable' or the word 'undue' restraint of trade?"

It might also be asked why "judicial legislation" is also found necessary for the patent medicine trust as well as for the oil and tobacco trusts, and why false statements can be held lawful when against the spirit and intent of the law.

**GREEN ELECTED TO FILL SMITH'S PLACE**

COUNCIL BLUFFS, Iowa, June 6.—Completer returns today from yesterday's special congressional election in the Ninth Iowa district show that Judge W. R. Green, progressive republican, was elected over W. F. Cleveland, democrat, by a plurality of 1192 votes. This is 700 votes less than the plurality of Walter I. Smith, standpatter, in the regular election last year. Smith recently was appointed United States district judge by President Taft. The Ninth district is normally 4000 republican.

Only about 50 per cent of the voters went to the polls yesterday. Although Judge Green had opposed reciprocity with Canada, he was endorsed by President Taft. Cleveland was an avowed advocate of the proposed treaty. It is believed many democratic farmers voted for Green, and that many standpatters remained away from the polls, preferring to take advantage of the fine plowing weather.

**CONCERT POSTPONED.**  
 Owing to unavoidable circumstances, the concert which was advertised to be given at the First M. E. church of this city on the evening of June 7th has been postponed to a future date. Other notices will appear later.

**CONEY ISLAND MAY BE A MUNICIPAL RESORT**

NEW YORK, June 6.—A proposition is on foot in New York city to acquire Coney Island and make it into a municipal pleasure and recreation resort. Alexander S. Drescher, chairman of the aldermanic committee on parks, proposes to introduce a resolution at today's session of the board of aldermen, providing for the purchase of the area recently burned over. He estimates that it will not cost in excess of \$1,000,000.

**START PROBE OF SUGAR SOON**

Special House Committee Investigating Trust Will Be Ready for Work Soon—Department of Justice to Co-operate.

WASHINGTON, D. C., June 6.—The sugar trust will be investigated next week, and the probe will probably begin next week, according to representative Hardwick today. Hardwick is chairman of the special house committee investigating the trust. He said the committee intended to pay particular attention to the cash settlement by the government with the sugar trust after the discovery of the famous "short weight" frauds, by which millions of pounds of sugar was entered into the United States without payment of duty.

All data regarding the trust now in the possession of the executive department of the government will be handed over to the committee to aid in their investigation.

**COMMUNICATIONS.**

To the Editor: While I have no faith in trades unions whatever as advocated by Mr. Young, as a remedy for the many existing evils, I would like to ask Mr. D. L. Edwards what his remedy would be and what would be the results if applied. Unions as they are today have caused more misery in this world than the good they have done. If I was convinced that the present existing conditions were to be permanent I would favor a union industriously organized. No matter how high the trades unionists boost their scale of wages the bosses boost theirs accordingly and the result is the poor unorganized under-dog, the mucker for instance, who's wages is always on the decline, are forced to buy the necessities of life at an increased price on account of the increased demands of the organized trades. No matter how high a craftsman's scale may go the bosses' profits remain the same and it is up to the unorganized to stand the pressure.

Now Mr. Edwards, why do you add confusion by asking Mr. Young to answer your questions. If he is wrong and you are right why do you ask him to repeat. Why not drop the wrong and tell us what is right as there is no reason for digging up an argument about it. I'm afraid Mr. Edwards, you haven't much confidence in your own remedy, but nevertheless I for one would like to know what it is. Hoping this may come under your notice, for I really want to learn. JOSEPH A. RODGERS.

**WILEY ITALIAN ESCAPES FOR SECOND TIME**

NELSON, B. C., June 6.—Madura, the Italian prisoner, who made a sensational escape last week while on his way to Nelson jail by leaping through the window of an express train, was arrested at Bonner's Ferry, Idaho, by Immigration Inspector Davis, but is once more at large. After having breakfast he managed to escape from the lockup and has not yet been recaptured.

**CENTRAL POINT EXTENDS SEWERS**

Lets Contract for Additional Mains to C. E. Bade—Little City Will Have Splendid Drainage System in Near Future.

CENTRAL POINT, June 6.—Central Point's city council Monday night let the contract for extension of the city water distributing system to C. E. Bade. Twenty thousand additional feet of 4, 6 and 8 inch mains are to be laid at a cost of \$14,000.

Only one other bid was received beside that of the successful one, and that at a price far in excess of the contract one.

Rapid progress is being made upon the Central Point sewer system. In order to keep the grade in the trunk sewer, a tunnel, 700 feet long is being driven through the east end of the city at an average depth of 25 feet from the surface by Contractor Bade.

Both sewer and water systems will be complete by fall.
