MISS TO WED BISHOP'S SON

EDA BRUNA. Charles Samuel Fallows, a lawyer, son of Bishop Fallows, of Chicago, surprised his New York friends by obtaining a license to wed Miss Eda Bruna, a beautiful actress. Bishop Fallows will perform the ceremony.

STATE BOARD TO MEET HERE SOON

Hanley Slinger Water Controversy Will be Argued Before Board of Control Next Week—Meet This Week at Pass.

The state board of water control will meet in this city next week for the purpose of hearing arguments in the Hanley-Slinger water controversy regarding rights on Little Butte creek and Long canyon. The case has attracted much attention owing to the principle involved and will be bitterly contested.

The board will meet this week at Grants Pass where arguments will be heard in contests over water rights on Sucker and Althouse creeks.

Woodford appointed executor.

AX-GRINDING

A Science With Some Dealers—Done at the Expense of the Public. There is nothing "just as good" as Newbro's Herpicide. Some dealers will even go so far as to tell you they have something better. That dealer has an axe to grind. You can't stop his grinding, but you can prevent him grinding it at your expense. There's one sure, swift way to do it. Go where you can get what you ask for. You won't be obliged to do this very often, as fortunately the majority of druggists are honest and conscientious. Newbro's Herpicide has been so long and favorably known as the original dandruff germ destroyer that no one should be deceived. When you need a hair remedy, you don't want one which merely promises to kill the dandruff germ and prevent the hair from falling. You want one that will do it. Herpicide does it. The hair becomes soft and lustrous. There's a life, snap and beauty where formerly the hair was dead, dull and brittle. Newbro's Herpicide is sold and guaranteed by all druggists. Applications of this wonderful prophylactic may be obtained at the best barber shops and hair dressing parlors. Send ten cents in postage or silver to The Herpicide Co., Dept. R., Detroit, Mich., for a nice sample of Herpicide and a booklet telling all about the hair. Medford Pharmacy, Special Agents, Near P. O. Night or Day. Look for the "help wanted" ad that seems like a "prospect"—and answer it promptly.

For Sale

Luman N. Judd, exclusive agent.

Luman N. Judd TALENT, OREGON

Human Life Is Progressive

Always toward some better thing—some high state of civilization. It is the constant yearning for better things which characterizes and sets apart the human race from the brute creation. What would we think of a human being today who, in the midst of civilization, persisted in living in a cave, clothed with rude skins, shunning society, and conducting himself as a savage? You are ready and willing to adopt any new thing in your home which can be proved a source of additional comfort, and cheer and health. We want you to think about a few facts regarding Electricity which we believe entitles it to your earnest consideration. We realize that if you once knew what Electricity will do to make your home more homelike, more cheerful, more charming, you will need no persuasion—you will insist on Electricity. We know that if we can show you where Electricity will lighten your burdens and make your life more livable, you will need no urging to adopt it. In the first place, let us talk to you about Light. Are you aware that every other form of artificial illumination excepting electric light eats up the oxygen in the air and robs your lungs—and your family's lungs of the most essential and life-giving element of which the air we breathe today is composed? Did you ever think of that? An oil flame, burning in your room, is consuming as much oxygen as four adult persons. That means that if there are six people in your parlor in the evening, and three burners (gas or oil) are alight, the result on the air is the same in the room as if there were eighteen people there. Ever go out in the evening to a card party, or some similar affair, and stay for several hours in a room in which twenty or thirty people were congregated—and that room lighted with gas or oil? Remember what a long, relishing draught of pure night air your poor lungs breathed in when you left the house? Remember what a relief it was? An oil flame cannot burn a minute in the air from which the oxygen has been extracted. An electric light burns in a vacuum enclosed in and air-tight bulb. Catch the point? Now, when you install Electric light in your home, you are just chasing so much unsanitariness out of your home. Is ELECTRIC LIGHT more expensive when you consider this? Would you consider buying, at however cheap a price, a piece of furniture, or drapery, which was under suspicion that it harbored disease germs? Do you consider that there is any economy in buying and using any form of light (no matter how cheaply it may be bought) that vitiate the atmosphere, and tends toward sickness or discomfort? Truly, there is none. Another point. Electric Light is eminently safer than any other kind of light. No matches are required. And—matches cause more fires than anything else in the wide world. Is Electric Light more expensive than oil lamps when you consider this? Once more. Oil is explosive—a little neglect, a little absent-mindedness—a trifling act of thoughtlessness—and you and your family are in imminent danger of tragic, sudden death. Ever think of that? Is Electric Lighting more expensive than oil lamps when you think it over? Besides—if there weren't these real and tremendous arguments in favor of Electric Light in the home—what light is there that compares with it in quality for a moment? Think of its brilliancy, its steadiness, its convenience, its absolute perfection of quality! No flickering uncertainties! No stale, unpleasant odor! No coal oil can in the kitchen! No lamp chimneys to clean! No lamps to fill! No wicks to trim! And—we could go on for a long time yet! t, we'll leave it to your own good sense to complete the list, and see the point. We know it won't take long. Time was, in the early days of Electric Lighting, when Electric Fixtures were somewhat crude and unsightly affairs. But—today it's a different story. Very different. You can get the most artistic and beautiful fixtures for every room and nook and corner in the house. Side brackets of exquisite design for the parlor, lovely ceiling pendants, Piano lamps of elegant design. Reading lamps for the library, den or living room, perfect dreams of beauty! Hanging lamps for the dining room to hang low over the table, and rich in color and beadwork, to cast that half-mysterious and altogether delightful radiance upon the festive board. Turn-down lamps for the sick room, the bed chamber, the nursery, the corridor, the hall. Lamps for the hitherto poky, temper trying clothes closet, ask the man! Bracket lamps for my lady's dressing table—perfect light, perfect convenience. And the beauty of them all is—a twist of the wrist—a twitch of the switch—and there you have it. Radiant, effulgent, beautiful light—the next thing to daylight itself. But this is not all! Electricity once in your home for lighting purposes, and numberless other avenues of luxurious comfort are opened to you. Special wall or baseboard sockets may be wired for in your house to provide for the connecting plugs attached to numerous labor-saving devices and temper-preservers which will appeal strongly to the busy housewife and every member of the family. There is the small motor for the kitchen and sewing room. By the mere inserting of a plug in your kitchen this wonderful little motor will serve you by saving many weary hours of backache and hard manual labor of the most exhaustive kind. It'll turn the coffee grinder, the meat chopper, the washing machine, the wringer, the ice-cream freezer—and you can read a book and smile at it. Makes itself generally useful in fact. In the sewing room you can attach one to your machine—no more pedaling. Who says it isn't a wonderful age we live in? Then there's the long list of heating devices: The Electric flatiron saves fuss and fumes over the stove. You can get it just "so hot" and keep it there. While the current's on, it stays just hot enough as long as you want it. Think you'd spoil as much linen or lace with an iron like that as you do now? Of course not. You couldn't. The Electric Curling Iron heater's another friend-maker with the up-to-date American woman. Just place the irons in the heater—they'll always get just the right heat. No holding over a flickering gas flame! No burnt fingers! No spoiled fringes! The Electric Hot Water Heater, for the man that shaves himself. Quick, handy, no matches, no spirit lamps, no fumes. Same with the Electric Baby's Food Warmer. Same with the Electric Hot Water Bag. Same with the Electric Chafing Dish (all the rage in society—these are.) These facts can be proven by irrefutable figures, y the use of the one clean, safe, brilliant and healthful illumination—Electricity. Will you let us do it? Brighten your home and lighten your work b

Rogue River Electric Co.
