

# Opening Up Oregon

The Pacific & Eastern (Hill System) is now completed from Medford to Butte Falls, in the heart of the Cascade timber district (the largest sugar pine belt in the world) containing over eight billion feet of merchantable timber, principally sugar and yellow pine. Here lie the greatest opportunities in the country for lumber manufacturers--a local market in the Rogue River Valley for upwards of thirty million feet a year of building material, and the greatest fruit country in the world to supply with fruit boxes.

## Butte Falls

Offers unlimited water power. Situated on Big Butte Creek, in the midst of the forest primeval.

Fine opportunities for Sash and Door and Furniture manufactur-ies, Paper Mills, Turpentine and other factories.

## Eagle Point

Center of rich farming, horticultural and stockraising district. Eagle Point apples won sweepstakes at International Apple Show. Berries and garden produce of all kinds. Fine opportunity for cannery and manufacturing enterprises.

The Pacific & Eastern opens up a virgin country to settlement and development.

Opportunity awaits the Enterprising in all lines along the new railroad.

## Pacific & Eastern Railroad Co.
