A very pretty home wedding took place Wednesday afternoon, January 24, when Miss Julia Whitney became the bride of Mont E. Briggs, says the Ashland Tidings. The ceremony was performed by Rev. William Lucas, rector of Trinity Episcopal church, the bride being given away by her brother, Don Whitney. The full Episcopal marriage service was used.

The rooms were tastefully decorated with ferns and violets, and a fine three-course luncheon was served. The bride was daintily gowned in white crepe de chine over muslin and carried a bouquet of narcissus. The bride is the second daughter of Mrs. Mary Whitney and the late P. Bradstreet Whitney, who for 20 years was traveling freight and passenger agent for the Southern Pacific railroad.

VALUE OF MASSAGE

When the tanner finds creases in a piece of leather he wishes to use, which is no more than a piece of skin, he immediately rubs across the crease or wrinkle with oils. The leather absorbs the oils and the wrinkle disappears. Remember this point—he rubs across the wrinkle and not over it lengthwise. The same point holds good in facial massage and every woman who attempts to massage her own face must understand something about it or she will do more harm than good.

Since massage is of first importance in preserving facial beauty, I will here give you some simple movements which are the basis of all the complicated ones. A hurried or jerky massage should never be performed. It should be done leisurely and the pressure of the fingers should be firm but gentle. Undue pressure only bruises and over stimulates the delicate tissues.

In facial massage only a pure skin food should be used. Cold cream is not a tissue builder, neither should it be used as a cleanser, because it requires too much massaging, which is very harmful. A liquid cleanser of pure almond oil made into an emulsion should be used by pouring it on a soft Turkish cloth. Remove the dirt by gently rubbing upward. Cold cream is meant for sunburn or irritation of any sort because of its healing and cooling effect.

The movement of massage cannot be learned in two or three lessons. It is a study that requires both time and practice, so I will ask my paper friends to read the directions carefully and have perseverance, then the reward is yours. Reading directions are never altogether satisfactory for nothing can be told quite so well as it can be shown.

After placing only a sufficient amount of cream on the face the movement should begin on the forehead. First, place the tips of the first, second and third fingers of both hands in perpendicular line in the middle of the forehead. Move the finger tips up and down, crossing each others' path and all the while toward the left temple. When the temple is reached come back to the middle and proceed to the right temple. Do this several times. Begin the circular movement in the middle, the tips moving in opposite direction with large circles growing smaller toward the temples.

Second—Scowling lines between the eyes. Place the tips of both middle fingers on the lines so that the tip of one will meet the first knuckle of the other. Play over the lines by moving both tips one around the other, never passing beyond the first knuckle. Then play the tips by moving them side by side instead of going around.

Third—The nose. With the tips of the middle fingers begin at the small part of the nose and with circular movement proceed to the corners circling there several times.

Fourth—For the line leading from the nose to or near the corner of the mouth place the tip of the first left finger on the upper lip directly under the nose and the tip of the second left finger on the right cheek bone. With the tip of the second right finger rub from the right corner of the mouth or end of line in circles to the corner of the nose. If there are lines from the mouth downward the same movement is used.

Fifth—The cheeks. With the tips of the first, second and third fingers rub from the corners of the mouth outward and upward in circles to the temples. The same movement from the middle of the lower jaw to the temple and from the bridge of nose to the temple. Circle about the ear from base to front for lines in front of the ear.

Sixth—The eyes. I must emphasize here the extreme necessity of gentleness and a light touch. Place the tip of the left thumb on the cheek bone directly under the right eye, and the tip of the left first finger a little above the temple. With the tip of the second right finger
