WONDERS.

THE ATOM, only a little while ago, was the final analysis of science. Then radium came (discovered, with her husband, by a woman to whom membership in the French academy has been refused), and science had to change its whole idea of the constitution of the universe. WHAT TO TELL YOUR FRIENDS.

O PERSISTENT is the anvil chorus resounding in other sections of this state regarding Medford and the Rogue river valley, dinned daily into the ears of colonists headed this way, that The Mail Tribune called didate for the democratic nomination upon President William M.
