**S.S.S. CURES OLD SORES**

If an old sore existed simply because the flesh was diseased at that particular spot, it would be an easy matter to apply some remedy directly to the place that would kill the germs; or the diseased flesh might be removed by a surgical operation and a cure effected. But the very fact that old sores resist every form of local or external treatment, and even return after being cut away, shows that back of them is a morbid cause which must be removed before a cure can result. Just as long as the pollution continues in the blood, the ulcer remains an open cesspool for the deposit of impurities which the circulation throws off. S.S.S. cures Old Sores by purifying the blood. It removes every trace of impurity and taint from the circulation, and thus completely does away with the cause. When S.S.S. has cleansed the blood, the sore begins to heal, and it is not a surface cure, but the healing process begins at the bottom; soon the discharge ceases, the inflammation leaves, and the place fills in with firm, healthy flesh. Under the purifying and tonic effects of S.S.S. the system is built up, and those whose health has been impaired by the drain and worry of an old sore will be doubly benefited by its use. **WIND SHAKES COMICE AND BOSC PEARS OFF TREES**

Comice and Bosc pears suffered considerably through the valley Thursday afternoon owing to the wind which prevailed for several hours. The pears being heavy, and ready for harvesting next week fell before the rush of the wind although it was not very heavy.

Hillcrest, near Creek, Burro, Randall and other orchards containing Bosc and Comice suffered, the only one to escape being the A. C. Allen grove which is protected by a large stand of timber. D'Anjou suffered somewhat but this was minimized by the fact that harvest of d'Anjou has been in progress for several days. The loss caused by the wind will shorten the output from the valley somewhat, the latest estimate of 200 cars being cut from 5 to 10 cars.

The present rain has proved but a blessing to date although it is now beginning to take on a serious aspect owing to its duration. Grain will suffer somewhat as much of it is stacked in the fields waiting for the threshers. In connection with the fruit it has delayed harvesting but has not injured the fruit.

During the storm nearly an inch of rain has fallen. The normal for the month of September is .37.

To date 150 cars of pears have been shipped. Nearly 50 cars remain to go forward.
