

2000 MINERS JOIN STRIKERS AT BINGHAM

Militia Likely to Be Called Out as Strikers Refuse to Permit Strikers to Enter Property, Which is in Their Possession.

Mine-owners Issue Statement Declining Arbitration and Asserting Freedom From Dictation.

SALT LAKE, Utah, Sept. 20.—Two thousand additional men joined the ranks of the striking miners at Bingham today, making a total of 6,000 men out, when the Magna and Arthur stamp mills closed down. Charles H. Moyer, president of the Western Federation of Miners, announced this number would probably be augmented before the end of the week, as a proposition to call a strike in the Nevada Consolidated and Chino Mines is under serious consideration.

Nearly 300 deputy sheriffs were on guard at the Bingham mines today. Although no disorders were reported up to noon, the miners are sullen and defiant and trouble is likely to come at any time. Up to a late hour this morning the 4,000 strikers have ignored orders to come from their mountain fastnesses, and any attempt to dislodge them may be followed by bloodshed.

It is regarded as almost certain this afternoon that Governor Spry will be forced to call out the state troops. The governor has notified the strikers that if they attack men attempting to fill their places in the mines, the militia will be rushed to the scene. The strikers insist they will not allow strikebreakers to go into the mines.

The attitude of the mine-owners toward arbitrating their differences with the men was shown here this afternoon, when General Manager Jaekling issued the following statement:

"We do not propose to let anyone dictate to our companies. We shall decide on whom we are to employ. When arrangements are complete to protect our employes work will be resumed."

SISTER ALOYSIUS' CHARACTER GOOD

TACOMA, Sept. 20.—Rather than allow what was termed the "most vicious attack against the character of Sister Aloysius by man or woman" to go to the jury unrepudiated, Attorney Kane in the case for \$40,000 against prominent Catholics declared today he would summon the entire town of Buckley to testify as to the character of the sister and her parents. Sister Aloysius with Bishop O'Dea, Father George C. Van Goethen, Mother Superior Camillus, and Attorney Louis L. Lefebvre is alleged by Mrs. Lizzie Magnuson, plaintiff, to have been instrumental in the kidnapping of her daughter, Marjorie Riemann.

Dr. John Sheets, for twenty-three years physician for the family of Michael McHugh, father of sister Aloysius, whose true name is Agnes McHugh, said the character and reputation of both parents and child in the community of Buckley had always been very good.

FACTIONAL FIGHT SPLITS DEMOCRACY IN GOLDEN STATE

SACRAMENTO, Cal., Sept. 20.—That William J. Bryan's visit to the California democratic convention here next Wednesday will fall short of its purpose unless the fight for the chairmanship of the gathering is settled early next week, is the opinion of prominent democrats here today. State Senator Antony Caminetti is the choice of the progressives of the party for the position, but his candidacy is opposed by Theodore A. Bell, who fought against Bryan at the Baltimore convention. Bell favors Senator Cartwright or Senator Juillard for chairman, and friends of Caminetti assert that Bell is promoting the candidacy of both men, hoping thereby to split the convention into three factions.

Progressive democrats openly charge that Bell is a reactionary, and that if either of his candidates is chosen the convention will adopt a platform with reactionary tendencies and one that will conflict with the views of Bryan, Wilson, Caminetti and the progressive element generally.

NO ADMIRATION FOR NOGI'S SUICIDE AMONG JAPANESE

TOKIO, Sept. 20.—"These expressions by Japanese statesmen of admiration for the spirit which prompted General Nogi's suicide are all rubbish," was the comment here today of a prominent American resident here, who has spent years in Japan and is a deep student of the Japanese character.

"The Japanese governing class," he said, "appreciate the general's suicide exceedingly. It could not have been more useful to the new Mikado if he had made it to order. But educated Japanese regard the old warrior as just what he was—the victim of a superstition, which the government has been instilling into the people for about a generation.

"The spirit of 'Bushido' advertised as centuries old, really never was heard of until forty or fifty years ago. Neither was the blind patriotism of the Japanese. Because it was thought it would be a government asset the cultivation of the present day system of exaggerated devotion to the ruler began comparatively recently. Nogi's suicide shows how well, at least in many cases, the work was done."
