Cottolene food is never greasy

Cottolene is a vegetable fat - made from the purest and choicest cotton oil. It contains not an ounce of hog fat.

Cottolene makes delicious pastry-crisp and flaky. For frying, it can be heated to a much higher temperature than butter or lard, and forms a coating which prevents the absorption of the fat.

Cottolene is every bit as good as, and much cheaper than butter for cooking. It is

far better than lard; it is richer, and will go onethird farther than either. It is the most economical cooking fat on the market.
