JOLTS AND JINGLES By Ad Brown

Among others who are happy over for his Wilson editorials.

It Had to Come In the southland where the trees

Bear a crop of juleps rare, All the votes went democratic As they always do down there. In the east where men of millions

Hold aloof from common herd,

T. R. ran a blamed poor second While Bill Taft pulled out a third.

In the north where lakes are frozen

There's no doubt about the voting

SEEKING A MONOPOLY.

CASE of great importance to the future of the valley. A has been heard by the board of control during the past month. It is the claim of the California-Oregon Power company to the absolute monopoly of the waters of the Rogue river and its tributaries from Gold Ray to their source.

The power company claims that it is entitled to all the water above Gold Ray, because it is using all the water of the stream at low stage for its power plant at Gold Ray. It is disputing the water rights of the ranchers who are using water for irrigation purposes. It is understood, owever, that it is willing to make a secret stipulation recognizing these existing rights providing its title to all the water is officially recognized.

The effect of this recognition, would be to give the power company the monopoly of the river, stop the use of all water for irrigation purposes except as the right was sold or recognized by the power company, and effect-ually check the development of the country which is largely dependant upon more or less extensive use of this water in Sams Valley and other districts needing irrigation.

The power company also asserts that it is entitled to the use of all the water at Prospect, because its Prospect plant is now using a small part of the water, but stands ready to use it all were a market for its power available. This claim is disputed both on technical and other grounds by another power concern which asserts that it stands ready to install a rival plant if its claim is recognized.

Capital is entitled to a fair return upon investment. But the California-Oregon Power company has floated a toffice receipts for year ending ten million dollar bond issue upon its properties, including to the home of her mother. Mrs. Amos its rights on the Rogue, Klamath and other streams, which indicates that its securities are largely watered—in other however, refuses to see Geraghty and words, it has discounted the future growth and earning capacity of the country to make the consumers pay interest on uncarned increment.

Monopoly, in any form, is intolerable-and it is the Geraghty, a Newport chauffeur, and power company's aim to establish a complete monopoly on the wonderful power and irrigation resources of the DA Rogne, a stream from which more power can be developed TAKE than at Niagara Falls. Of course this power will not be needed for years to come, will not be developed until needed-but the company seeks to bottle up this resource for all futurity.

The Gold Ray plant has been used principally as an Wilson's vicitory is Norman Hap- emergency plant since the Prospect plant was installed. good who was shoved out of Collier's It generates but 3500 horse-power, whereas the Prospect of the Washington school held itplant generates 8,000 H. P. and can be increased to 40,000, regular meeting Friday afternoon which shows that save for emergency purposes, the Gold Ray plant is useless. The claim that because this plant's "the afternoon was opened by a capacity is all of the water at low stage, it is entitled to all the water above, is preposterous. Its recognition to this right would be a blight on the valley.

The Rogue river is almost the only stream flowing always attractive to the mothers. through a valley needing irrigation, whose waters are not used generally for development of the valley by irrigation. After the business hour a highly when children have no appetter, was carried out, with Mrs. E. E. and irritable; when they are continually provise Until this water is so used, the valley will be comparatively Gore as the leader. the worth where lakes are frozen And where sleigh bells ring out clear, here's no doubt about the voting Wilson got them all—that's clear. In the west where festive cowboys the way. Yet it is apparently short-sighted enough to fol- ame Montessori in her Houses of child is so troubled at some time and Are supposed to shoot and drink, low a dog in the manger policy. The claim of the power company except at Prospect, has been contested only by the present users of water in the small ditches now in existence. The water that will be needed in the future has no claimants at present-therefore no contest is made except for a small fraction of the water. Should these present small users be recognized as they probably will be, the only other claimant, the power company, will probably be confirmed in its claimsagain turn our attention to Tehatal- which would be disastrous for the community.

HEIRESS TO MILLIONS FORGIVEN BY FAMILY CARE OF STORM

The storm water situation in Medford was discussed at some length by the city dads Friday night, in special session, and as a result the city engineer will go over the field carefully and make a report covering it completely. On West Second street the situation is said to be particularly bad and immediate steps will be taken to correct the fault.

An ordinance was passed ordering in a sewer through the alley in block 54. Chelgren Bros, were awarded a

contract for the construction of water main on Apple street. A quit claim deed to a small block

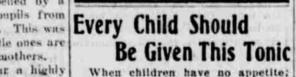

of land in Bear creek was made to Dr. F. C. Page. This is land owned by Dr. Page, deeded to the city for bridge purposes and later not needed. A sidewalk was ordered in on the outh side of West Third street.
