

A REAL OPPORTUNITY

CHOICE OCEAN FRONT LOTS

Lying Between WOOLEYPORT and CRESCENT CITY

Through our energetic work we are enabled to offer this splendid ocean front addition to the public. This addition is covered with pine trees, lies high and dry, and is the making of ideal summer homes, where fishing and game are abundant.

This locality is the only logical and geographical outlet to the coast from all southern Oregon.

Do not overlook this opportunity.

Each of these ocean front lots are worth twice the value we ask.

The great growth of this coast country will many times multiply in value and population before the opening of the Panama Canal.

The lots we are offering for sale, lay adjoining to the best harbor facilities between San Francisco and the Columbia River harbor, a distance of 650 miles.

Choice ocean front lots near this great harbor are limited.

We are offering these lots from ninety to two hundred and fifty dollars on terms.

Three-fourths of these lots range in price from ninety to one hundred and fifteen dollars.

Do not postpone to take advantage of this splendid opportunity at once.

The opening of the Panama Canal will mean an enormous increase in business for the Pacific Coast deep water ports, where cargoes may be shipped with the utmost economy. Trade relations will be established here in such proportions that it will make this point of world-wide importance.

Take advantage of the opportunity to be gained by the railroad, the opening of the Panama Canal, and the increase that is sure to follow the growth and population of the Pacific Coast.

Make money by buying in advance, thereby realizing a profit from the increase in values on this ocean frontage.

The time to buy is now, while a dollar means ten to a hundred later on.

Portland to the north, San Francisco to the south, 777 miles of distance, with no large city or accessible harbor for large ships between, both these cities growing rapidly.

Population increasing in all the Pacific Coast states, a fortune to be made in ocean frontage, a new empire developing, an ocean outlet to southern Oregon products where the largest ocean vessels may go out or in.

A fresh water harbor for maintaining the coming necessity of large warships on the Pacific Ocean.

Fresh water anchor is of inestimable value for Naval purposes and saves all dry docking.

Between Portland and San Francisco, is too great a distance without a distributing center, there must be a great city midway, and this is the geographical center.

No one thinks for a moment that Medford will be the terminal point for the Hill lines. They must and will have an outlet to the ocean to carry on their vast trade.

Call at our office, Medford Hotel, examine maps and get full information on this ocean frontage. These lots will be put on sale at once. Office ground floor Hotel Medford; telephone 901
