

WATSON PET OF VAN CLEAVE SAYS MULHALL

Manufacturers' Association Thought More of Indiana Candidate Than of President—Sought Place in Cabinet for Him Alleges Lobbyist.

Anti-Trust League Secretary Praises Lamar as Public Spirited and Alleges Lovett Lobbied.

WASHINGTON, July 2.—Twenty-thousand letters, telegrams and other reports will have to be waded through by the senate "insidious lobby" probers in connection with the sensational lobby charges advanced by Martin Mulhall of Baltimore, formerly in the employ of the National Association of Manufacturers.

Mulhall's latest revelations refer to the alleged activity of officials of the Manufacturers' Association in the campaign of former Representative James Watson for the governorship of Indiana in 1908.

On January 12, 1909, Mulhall asserts that he wrote to D. M. Parry, then president of the Manufacturers' organization, saying Watson was a candidate for the office of secretary of commerce and labor. He then submitted two letters purporting to have been signed by Parry, one dated January 25, saying:

"I certainly hope Watson will land the commerce and labor secretaryship, as I have been doing all I could for him for some time past. I know he would satisfy the manufacturers generally. Personally I would feel just as safe with Watson in that job as for either VanCleave or myself to have the chair."

Henry B. Martin, secretary of the National Anti-Trust League told the lobby investigating committee today that he and David Lamar, who testified yesterday, were the authors of the original resolution authorizing the Stanley Steel Trust probe, declaring that Lamar's draft was passed "substantially as drawn."

The witness caused a sensation when he charged that Judge Lovett, chairman of the executive board of the Union Pacific railroad, and Paul Cravath were engaged last week in "lobbying" with Attorney General McReynolds. He insisted these officials had been "convicted under the laws," yet they were granted the privilege of lobbying.

ICE PLANTS ASK INJUNCTION; HUNT FEDERAL INQUIRY

CINCINNATI, Ohio, July 3.—Nine ice plants under municipal supervision today started manufacturing ice for Cincinnati residents. The plants were seized because no hope of a settlement of industrial differences between ice manufacturers and their employers appeared in sight.

The manufacturers are expected to apply for injunctions this afternoon. If this is done Attorney General Hoggan probably will be asked to investigate whether the ice manufacturers' organizations are violating the Sherman anti-trust law.

The Cincinnati Ice company, owner of several of the ice plants seized by the city, this afternoon asked for an injunction. Simultaneously Mayor Hunt wired Attorney General McReynolds asking for a federal grand jury to investigate the Middle State Ice Producers' Exchange, alleging that it violates the Sherman anti-trust law.

LABOR SECTIONS TARIFF ALTERED

WASHINGTON, July 3.—The majority members of the senate finance department practically emasculated the convict labor and child labor amendments to the Underwood tariff bill suggested by Senator Hughes of New Jersey. The amendments prohibit the entry into America of goods made in countries where the laws do not prohibit the employment of children in factories or where convicts compete with free labor.

Senator Simmons, of North Carolina, chairman of the committee, insists that the amendments would affect most of the important nations.

California house democrats head-representative Raker this afternoon appealed to the senate finance committee in behalf of California sweet wine growers who urge that the existing duties on wines be retained.

MARKETS DEPRESSED BY BALKAN WAR

NEW YORK, July 3.—The first dealings in the stock market today were of a slight downward trend. The heaviest losses were sustained by copper shares, but these were less than a point.

THE CORNISH, NEW HAMPSHIRE, HOME TO BE OCCUPIED AS THE SUMMER WHITE HOUSE BY THE PRESIDENT ON HIS VACATION

HIGHWAY SURVEY AUTHORIZED BY COUNTY COURT

The Jackson county court Thursday made an order authorizing State Highway Engineer H. L. Bowby to make a survey of roads in Jackson county for improvement under the proposed highway bond issue. The order includes the proposed Siskiyou grade, but does not interfere with the survey now being made by Engineers Howard and Rhodes, who will work with Mr. Bowby, except that it will be more complete than at first planned.

The order for a bond election will probably be made Saturday, and will probably provide for the improvement only of the main highway through the county, from the California line to the Josephine county line, a distance of 55 miles, as there is not sufficient money to construct laterals. This will permit money received from the state for construction next year to be spent on the laterals. Only as much of the bond issue will be sold as needed for the highway, which will be constructed under specifications prepared by and under the direction of the state highway commission.

LAUNDRY MARK MAY LEAD TO MURDERER

CHICAGO, July 3.—A laundry marked collar found here today may lead to discovery of the identity of the slayer of the comely middle-aged woman found murdered here early yesterday on a blood spattered platform in the rear of Smythe's installment store on Chicago's West Side. The collar was found in the alley wherein the murder occurred.

Although alleged friends yesterday identified the body as that of Mrs. Marc Hunter, the police today refused to accept the identification as authentic and continued their search for relatives of missing women.

The report, which was read by the Rev. Oscar F. Davis of New Richmond, Wis., chairman of the commission, made the following recommendations:

1. "That the department of justice (federal) make a prompt investigation of the commercial investments, alliances and monopolies of the Mormon church, and if results of such an investigation warrant, follow the same with a rigorous prosecution of its property trusteeship, as organized in violation of the Sherman law.

2. "That the postmaster general be urged to deny all privileges of the mails to the Mormon church authorities so long as they continue to practice treason or in any way maintain a treasonable attitude in their teaching."
