MODERN JEKYLL AND HYDE SENT TO SING SING

NEW YORK, April 9.—Edward Mendel, a prominent business man of Newark, N. J., was sentenced here today to serve 18 years in Sing Sing prison. The evidence showed he had lived a "Dr. Jekyll and Mr. Hyde" existence for years.

Mendel's wife and two children were in court and they collapsed when sentence was pronounced. Mendel was convicted on a charge of assault preferred by Mrs. Pauline Koetzle. They met several months ago, she said, at a banquet at the Woolworth Cafe.

"After several drinks," said Mrs. Koetzle, "Mendel led me to the railroad yards and attempted to assault me. He was unsuccessful but took my rings and ear-rings and escaped."

District Attorney Whitman told the court that ten women had identified Mendel as a man who had robbed them in a similar manner.

Mrs. Mendel declared Mendel was a model husband and a regular church goer.

PROHIBS PREDICTING A "DRY" CHICAGO

CHICAGO, April 9.—As a result of their sweeping victories in Tuesday's elections, prohibitionists today were predicting a dry Chicago in the near future. Though somewhat gloomy over their losses at the polls, "antis" laughed at this suggestion. Complete returns showed that 22 counties went dry Tuesday, giving the prohibitionists 52 out of 102 counties.

EARL HAMILTON JUMPS TO THE FEDERAL LEAGUE

ST. LOUIS, Mo., April 9.—Earl Hamilton of the St. Louis Americans jumped today to the Kansas City club of the Federal league. This was the first attempt by the Federals to secure a player already under contract and was believed here to mean that the war between organized baseball and the outlaws is on in earnest.

SOCIALIST TEACHER BOUND TO GRAND JURY FOR RIOTING

QUINCY, Or., April 9.—Mrs. Flora I. Foreman, former teacher in the Quincy school, dismissed because she is alleged to have inculcated socialist ideas into her pupils, and eight other socialists are bound over to the grand jury today on the charge of inciting to riot. They are alleged to have stormed the Quincy schoolhouse in an attempt to return Mrs. Foreman to her position as instructor.

BEAT ADOPTED SON WITH GARDEN HOSE

PASADENA, Cal., April 9.—Charged with beating his 14-year-old adopted son with a garden hose, Rev. Fred R. Mathews will be arrested today on a warrant sworn out by officers of the humane society.

Neighbors assert that Mathews, who is a retired minister, flogged the boy because he refused to say his prayers.

Weather Forecast

Oregon—Occasional rain, showers east portion tonight and Friday, easterly winds, increasing to moderate gale along the coast.

DRUG HABIT INCREASING

THAT the drug habit is making alarming strides in the United States is proven by statistics recently compiled. In fact, there are more dope fiends in the nation in proportion to population than in China. The proportion is given as 445 drug victims out of every 10,000 population, as against 410 in China.

Dr. Edward Huntington Williams in a recent issue of the Medical Record calls attention to the growth of the drug habit among the negroes and poor whites of the south. The number of drug-takers admitted to insane asylums in the south is from five to fifteen times greater than in the state of New York. Use of the drug has supplanted alcohol in those regions where it was hoped prohibition would reform the negro. Instead, however, it has provided a more deadly substitute for mild stimulants and beverages.

A large proportion of the wholesale lynchings of the south, Dr. Williams asserts, are the direct result of cocaine which the negro has become addicted to. An immense clandestine traffic in habit-forming drugs has grown up throughout the country.

There seems to be no way under the present tendency to stop the spread of the drug habit. We cannot cut off the heads of the victims as China is doing. Sumptuary laws which attempt to reform morals by legislation have only substituted worse evils. Instead of studying the history of older nations and profiting thereby, our religious enthusiasts and politicians must first exhaust themselves and the nation by their cure-alls—and then find a scientific and common-sense remedy.

REGISTER AT ONCE

REGISTRATION books for the primary election close on May 1. Persons not registered by that date are not entitled to vote at the primaries and exercise their right to help select party candidates.

Only about 40 per cent of the voters of Jackson county have thus far registered—less than 20 per cent of the women voters are enrolled. It is the duty of all good citizens to attend to this duty at once.

Any notary public can register the voter, providing he has the proper blanks. There are several places in every city where the voter can register—regardless of his residence.

Voters can register in Medford at the Postal Telegraph office, Jackson County Abstract company or Mail Tribune office. Register at once—don't delay.

The Electric Locomotive

The electric locomotive is like the steam locomotive in only one respect—it is used to haul passenger and freight cars. The steam locomotive is nothing more or less than a compact power house on wheels. The fuel is carried in a tender, the water in a tank. This coal is burned under a boiler which produces steam.

This steam is utilized, through the medium of a steam engine, to turn the driving wheels. The steam locomotive generates power enough to drive itself along and to haul a heavy load, if the grade is not too steep.

Now the electric locomotive is not a power house on wheels. It produces no electricity. It merely receives the electricity, from a third rail, or an overhead trolley wire, and transforms it into mechanical energy through the medium of electric motors. The actual power is produced at permanent power house

located miles away. Here the coal is burned to make the steam, the steam passed through huge steam turbine engines to produce the electrical energy. This electrical energy is sent out to the locomotives through the third rail or overhead trolley system.

The electric locomotive can be made more powerful and compact than the steam locomotive because it does not have to haul fuel and water and make its own power. The electric is merely a hollow shell housing several powerful electric motors which are geared to the driving wheels. The amount of electricity picked up from the third rail can be changed into driving energy with very little loss, whereas the steam locomotive is also equipped with air brake systems, with bell whistles, etc., just the same as the steam locomotive.

Have You a Little Husband in Your Home?

In the April American Magazine James Montgomery Flagg, the well-known artist and comic writer, does a funny piece in words and pictures entitled "The Care and Feeding of Husbands." He describes the American business husband, the traveling salesman husband, the English husband, the continental toy pediggreed husband, the idle rich husband and the artist or writer husband. Following is an extract from what he has to say about the American business husband:

"This animal is very popular and

justly so. He comes in a variety of colors, white, tan, deep red, mottled, brown and sometimes green. The white variety is generally desired. There is no animal known that will take the amount of abuse and neglect that this one does and still be devoted and affectionate. Hence his popularity. They are limited in intelligence, their one thought being the collecting of money. They will thrive on almost anything—scraps at the table, a few hot words or anything lying around the room that comes handy."

Potato Soils and Culture

WASHINGTON, D. C., April 8.—Fresh potatoes are one of the easiest and most profitable suburban crops. They may be grown on almost any type of soil which possesses sufficient moisture and plant food, though they thrive best on sandy loam or gravel loam soils, and it is on these types that maximum crops of high quality potatoes can be produced.

If the land which is to be planted to potatoes is not likely to wash in the winter, plow in the fall to a depth from nine to ten inches, if the character of the land will permit. Deep plowing insures a greater water-holding capacity. Spare no pains in fitting the land for planting. Thorough preparation is essential to large yields, advises the department of agriculture.

Should a poor soil land be selected for a potato bed, apply from 10000 to 15000 pounds of a fertilizer analyzing from 2 to 3 per cent of ammonia, 6 to 7 per cent of phosphoric acid and 7 to 8 per cent of potash. If a stubble or corn land is used increase the ammonia con-

tent to 3 1/2 or 4 per cent. Half the ammonia should be derived from dried blood, tankage or other organic forms, and the other half from nitrate of soda or ammonium sulphate.

Select a variety of seed potatoes which is known to do well in the locality. Some good varieties of the potato are Irish Cobbler, Early Ohio, Rose Four, for early potatoes, and Green Mountain and Peerless for late growth. The importance of good seed cannot be too strongly emphasized. In the first place, the seed should be free from varietal mixture and disease, and true to name and type. The tubers should be reasonably smooth and firm, with the first sprouts just starting into growth. Wilted and badly germinated seed is not desirable.

Plant these potatoes from three to six inches in depth, depending on the nature of the soil. Plant shallow on heavy clay soils and deep on light sandy or muck soils. Plant in rows from 30 to 36 inches and from 10 to 14 inches apart, depending on

CHAIRMAN OF CHILD LABOR CONFERENCE

Owen R. Lovejoy is the chairman of the National Child Labor Committee, which recently held its tenth annual conference in New Orleans.

variety grown and the fertility of the soil. Early varieties can be planted closer than late ones. Cover seed with at least three inches of soil. If planted as outlined 15 to 20 bushels of seed potatoes per acre will be required.

Give first tillage before plants push through the ground. The aim should be to keep the surface of the soil loose and free from weeds. Continue cultivations at frequent intervals, remembering to go shallower each time, and gradually narrowing the space tilled. Potato plants are generally sprayed to protect them against leaf-eating insect pests or fungus pests. Protection against these insects is usually secured by some form of arsenical poison such as the arsenate of lead or paris green. The potato plant may be protected against fungus diseases by keeping its foliage covered with Bordeaux mixture.

AMBASSADOR PAGE'S SPEECH CLOSED INCIDENT

WASHINGTON, April 9.—That the speech of American Ambassador Page, at London, in which references to the Panama canal were made that aroused much discussion and criticism of the ambassador, is a closed incident, was the statement of members of both the house and senate foreign committees today.

ASHES OF MURDERER ARRIVE AT SAN JOSE

STOCKTON, Cal., April 9.—The ashes of William A. Dorr, executed in Massachusetts March 24 for the murder of George E. Marsh, millionaire soap manufacturer of Lynn, arrived in Stockton and were interred today in the Dorr family plot in rural cemetery.

TO THE FARMERS AND ORCHARDISTS

Owing to the lateness of the plowing season, you should have a Caterpillar tractor, as it will enable you to get your spring plowing done much quicker and cheaper. H. C. Shireman of the Holt Manufacturing company is at the Medford hotel for a few days and will be glad to explain how and why you can do more and better work with the Caterpillar.

SALEM TO HOLD ITS ANNUAL CHERRY FAIR

SALEM, Or., April 9.—By practically unanimous vote of the Commercial club it is decided that Salem holds its annual cherry fair this year. There had been discussion as to whether the fair should be dropped.

SUCCESSFUL CAESARIAN OPERATION AT SALEM

SALEM, Or., April 9.—Mrs. A. C. Roda and baby are living today as the result of the first successful Caesarian operation ever performed in Salem.

WEST DEFENDS CONSERVATION AT DENVER MEETING

DENVER, Colo., April 9.—Governor Oswald West of Oregon is on record here today with a strong defense for conservation of natural resources. Speaking at yesterday's session of the governors' conference he declared that conservation and the forest service saved Oregon lumber from the hands of three powerful concerns.

"You who oppose conservation," said Governor West, "should consider the oil lands of Pennsylvania. You will find these are owned by the same individuals who are working most of the coal land in Colorado."

"When it comes to the conservation of coal and the leasing of coal lands, instead of selling, I want to say that God put the coal lands here for the same purpose that he put the air above—for common use. If this is socialism, it may make me unpopular but it is the truth."

"Whenever Rockefeller monopolizes our natural resources it is high time for the federal government to take control for the people."

Twelve federal agents from the department of the interior at Washington and 350 delegates from arid states also were present. The meeting was presided over by Assistant Secretary of the Interior Andrius Jones.

"We came here," said Jones, "to find out your difficulties, and together we will revive irrigation projects and settle arid land questions."

COURT HOUSE NEWS

SALTS IF BACKACHE AND KIDNEYS HURT

Drink lots of water and stop eating meat for a while if your Bladder troubles you.

When you wake up with backache and dull misery in the kidney region it generally means you have been eating too much meat, says a well-known authority. Meat forms uric acid which overworks the kidneys in their effort to filter it from the blood and they become sort of paralyzed and luggish. When your kidneys get sluggish and clog you must relieve them, like you relieve your bowels; removing all the body's urinous waste, else you have backache, sick headache, dizzy spells; your stomach sour, tongue is coated, and when the weather is bad you have rheumatic twinges. The urine is cloudy, full of sediment, channels often get sore, water scalds and you are obliged to seek relief two or three times during the night.

Either consult a good, reliable physician at once or get from your pharmacist about four ounces of Jad Salts; take a tablespoonful in a glass of water before breakfast for a few days and your kidneys will then set fine. This famous salt is made from the acid of grapes and lemon juice, combined with lithia, and has been used for generations to clean and stimulate sluggish kidneys, also to neutralize acids in the urine so it no longer irritates, thus ending bladder weakness.

Jad Salts is a life saver for regular meat eaters. It is inexpensive, cannot injure and makes a delightful, effervescent lithia-water drink.

Musterole, the Great Remedy for Rheumatism

It stops the twinges, loosens up those stiffened joints and muscles—makes you feel good all over.

Thousands who use MUSTEROLE will tell what relief it gives from Sore Throat, Bronchitis, Tonsillitis, Croup, Stiff Neck, Asthma, Neuralgia, Headache, Congestion, Pleurisy, Rheumatism, Lumbago, Pains and Aches of the Back or Joints, Sprains, Sore Muscles, Bruises, Chills, Frosted Feet and Colds (it prevents Pneumonia).

Doctors and nurses frankly recommend MUSTEROLE as a substitute for the old messy mustard plaster. Large hospitals use it.

At your druggist's, in 25c and 50c jars, a special large hospital size for \$2.50.

Accept no substitute. If your druggist cannot supply you, send 25c or 50c to the MUSTEROLE Company, Cleveland, Ohio, and we will mail you a jar, postage prepaid. (61) Joseph F. Swords, Sulphur, Okla., says: "Your Musterole is very efficacious. It has done away with my rheumatic pains and aches in a wonderfully short space of time."
