into believing that because a baking powder foamed up over the top of a glass when water was added, that it was a good, pure and strong baking powder?

It foams because it contains ALBUMEN (sometimes called the white of egg.)

ALBUMEN in baking powder is no help in the baking.

It does not make a stronger or better baking powder.

It deceives the consumer when she sees it foam in the glass.

State after state has ruled that baking powder mixed with ALBUMEN is illegal and has stopped the sale of the stuff.

United States Government authorities have declared that the water glass test is a fraud, and that albumen does not help the baking.

Food commissioners North, South, East and West have denounced the albumen fraud.

DO NOT LET FAKERS FOOL YOU.

The manufacturers of K C BAKING POWDER have never found it necessary to resort to such fraudulent methods.

K C BAKING POWDER Contains No Albumen

It is a pure food baking powder, sold at an honest price and no better can be bought at any price.
