WORKERS THROW MATTRESS AWAY SAYS EMPLOYER

SEATTLE, Wash., Aug. 13.—Sharp exchanges between Commissioner Garretson and Paul Page, a Buelley Wash., lumber dealer, marked today's session of the federal industrial relations commission. Mr. Page frequently criticized the commissioner's question, characterizing one as "bunk" and declaring again that Mr. Garretson was "talking through his hat."

Mr. Page sought to refute testimony given yesterday to the effect that working conditions in logging camps were bad. He insisted that the men were well fed and housed and paid as liberally as the business would admit.

"We have a peculiar class of men to deal with," he said, "and this should be remembered. For instance, we sometimes have men who will throw mattresses out of the bunkhouse windows and insist on sleeping on the floor."

Attorney General McReynolds at once replied to the president as follows:

McReynolds Replies The head of our special agents has been instructed to give directions to his men throughout the country to begin investigations in order to ascertain the real facts, and I am sending the various district attorneys similar instructions. This should enable us to secure some definite in-

formation in respect to true conditions. "May I take the liberty of suggesting that perhaps the agents of the department of commerce could render valuable assistance along the lines indicated?"

"When we have become somewhat more familiar with the exact situation I hope to be able to make you some suggestions in respect of legal proceedings or appropriate legislation."

A Hint for Coming Maternity

In a little book designed for expectant mothers, complete instruction is given in the use of "Mother's Friend."

This is an external emmenagogue applied to the abdominal muscles for the purpose of reducing the strain on ligaments, cords and tendons.

It serves to ease the mind, indirectly the nervous system and thousands of women have delightedly told how they were freed of nausea, had no morning sickness and went through the ordeal with most remarkable success.

"Mother's Friend" has been growing in popular favor for more than forty years. In almost every community are grandmothers who used it themselves, their daughters have used it and they certainly must know what a blessing it is when they recommend it so warmly. It is used very successfully to prevent taking of breast.

"Mother's Friend" has been prepared in the laboratory of Bradfield Regulator Co., 284 Lamar Bldg., Atlanta, Ga., for more than two generations and can be had of almost any druggist from coast to coast. Write to-day for the little book.
