

CHAMBERLAIN OFF TO VISIT OREGON BEFORE ELECTION

WASHINGTON, Oct. 12.—Senator Chamberlain left Saturday for Oregon. He will reach Portland Sunday, being scheduled to make several speeches in eastern Oregon en route.

With the best record for attendance of any senator, he finally yielded to persuasion by friends to enter personally into his campaign. He said: "Practically nothing remains to be done by congress except to pass the war revenue bill. This measure has passed the house and has been considered in detail by the democrats of the senate. As amended, it has been reported by the finance committee to the senate, and is now pending on the calendar. It will doubtless pass with some changes, and will then come to conference, where it will be placed in agreement, so that congress will doubtless pass it within the next ten days or two weeks. I have remained at my post here until all of the president's cherished policies have been crystallized into statute, and would remain now, except that the war revenue bill will pass without question, and on that I am paired with a senator who is opposed to it. I shall therefore leave this evening for Oregon to participate in the campaign."

The senate granted Chamberlain a leave of absence. Senator Kern, taking occasion to pay him a deserved tribute, said:

"Mr. President, I ask that the senior senator from Oregon (Mr. Chamberlain) be excused from attendance during the session. The senior senator from Oregon has been in constant attendance upon the senate since April of last year. While other senators have had brief vacations from time to time, the senator from Oregon has remained steadfastly at his post. As caucus chairman of the majority I urged him two weeks ago to return to his home state to look after his affairs there, but he declined, saying that he could not see his way clear to subordinate public interests to his own personal or political interests."

"But now that the labors of the senate are practically over and the end is in sight, there is no reason why he should neglect his interests further. In token of personal regard, and in appreciation of his faithful service, the senate will be glad to agree to this request."

The vice-president:

"Is there objection. The chair hears none, and the senator from Oregon is excused from further attendance on the senate during the present session."

QUEEN OF BELGIUM STILL IN OSTEND

LONDON, Oct. 12, 2 p. m.—Definite information has been received here that the queen of the Belgians, notwithstanding the report last week that she had reached England, has not left Ostend for London.

In the course of the operations around Antwerp last week King Albert proceeded to St. Nicholas, an important place on the railroad line between Antwerp and Ghent and beyond the outer range of the Antwerp forts. His majesty was at St. Nicholas as late as last Thursday morning. His subsequent journey westward was in company with Belgian troops whose withdrawal in that direction had been rendered necessary by the overwhelming forces opposed to them.

CARDINAL FERRATA'S BODY LIES IN STATE

ROME, via Paris Oct. 12, 5:10 a. m.—Thousands of persons, including cardinals, diplomats and high dignitaries of the church, yesterday viewed the body of Cardinal Ferrata, papal secretary of state, as it lay in state. After laying in state throughout today the body will be taken to the church of St. John of Lateran, where on Tuesday funeral services will be held. Burial will be in the family tomb in the diocese of Gradoli, near Viterbo.

GERMAN LOSS IS 45,000 AT ANTWERP

LONDON, Oct. 12, 10:26 a. m.—"It is stated that the Germans lost 45,000 men during the attack on the fortresses Waelhem and Wavre-St. Catherine at Antwerp," says a Central News dispatch from Amsterdam.

GERMAN SHELLS WONDERS OF WAR ASSERTS PRISONER

BERLIN, Oct. 12.—"Artillery is trump in this war," says a wounded German officer interviewed by the Tageblatt. He continues:

"Our shells are wonders. In addition to their destructive effect, the moral effect of their detonation is plainly to be observed. The enemy is not a little affected by the dull, unassuming noise. The showing of the field howitzers is a complete success. They are actually equal to the heaviest field pieces of the French, the Rimailho (15.5 centimeter) howitzers. The French shells are an effective projectile, except that they do not always explode.

"In our advances we have had opportunity to observe on the French dead and wounded the effect of our shells, and it was very great. At the beginning of the war the pressive point of our projectiles is said to have lain too high, and it is interesting to note that we first learned this from letters captured from the French.

"It must be said that the French cannoniers shoot extraordinarily well. They keep a sharp watch, open fire as soon as they see dust rising, even at great distances, where they can reckon only on moral effect. They must also have excellent information at their disposal. Their ammunition supply is well looked after. A cessation of fire because of lack of ammunition almost never occurs. This is the more remarkable because of their system of firing, in which they seek out an area in which they assume the enemy to be present and simply deluge it with their fire.

"Our heavy artillery has become the terror of the enemy, and the appearance of the 'growler' (the 16 4-5 inch mortar) is always joyfully welcomed by our troops. Its effect is fearful. I have seen two massive walls of a house penetrated by it. The detonation breaks all the windows in the vicinity. Where it strikes the enemy are thrown to the ground by the air pressure. The bodies are terribly mangled and covered with a grayish blue dust. Although our heavy artillery has no protective shield, it has repeatedly taken in battles with direct fire and played a decisive part.

"When our fire is effective, the French simply abandon their guns. If it is less effective one notices that the guns are pulled out of the line of fire, while the ammunition wagons are left standing. They often succeed in unlimbering with extraordinary quickness and getting into another position further back. The French field piece, both as regards effectiveness and the readiness with which it can be handled, must be considered good."

SURGEON DROWNS WHEN REVENUE CUTTER SWAMPS

WASHINGTON, D. C., Oct. 12.—A radiogram to the revenue cutter service today from Behring sea reported the drowning of Assistant Surgeon L. W. Jenkins and five other men when a boat from the cutter Manning swamped Saturday in Unalga Pass, off Cape Sariches.

END INDIGESTION OR STOMACH PAIN IN FIVE MINUTES

Time it! In five minutes all stomach distress will go. No indigestion, heartburn, sourness or belching of gas, acid, or eructations of undigested food, no dizziness, bloating, foul breath or headache.

Pape's Diapepsin is noted for its speed in regulating upset stomachs. It is the surest, quickest and most certain indigestion remedy in the whole world, and besides it is harmless.

Millions of men and women now eat their favorite foods without fear—they know Pape's Diapepsin will save them from any stomach misery.

Please, for your sake, get a large fifty-cent case of Pape's Diapepsin from any drug store and put your stomach right. Don't keep on being miserable—life is too short—you are not here long, so make your stay agreeable. Eat what you like and digest it; enjoy it, without dread of rebellion in the stomach.

Pape's Diapepsin belongs in your home anyway. Should one of the family eat something which don't agree with them, or in case of an attack of indigestion, dyspepsia, gastritis or stomach derangement at daytime or during the night, it is handy to give the quickest, surest relief known.—Adv.

SHEFFIELD STEEL MADE IN GERMANY SOLD TO GERMANS

BERLIN, Oct. 12.—Under the headline "Old Sins," the commercial supplement of the Berliner Tageblatt published the following:

"In a recent issue we published a note, according to which a German manufacturer maintained his offers of 'Sheffield Steel' notwithstanding the war between Germany and England, disclosing the fact that for years he had sold in Germany under the name of 'Sheffield Steel' a steel made in Germany. It now comes to light that in a similar way many other genuine English goods are sold on German markets. The smart English business man has long ago discovered the weak point of the Germans, and right away took advantage of their mania of giving everything foreign a preference. This applies especially to the sale of gloves. Big English houses received their 'English gloves' made in Saxony by German hands, after German methods and from German material. These gloves were shipped, whole cartloads full of England, and after being stamped with English trade marks, with English labels attached, were re-shipped, to Germany, where they were sold as 'genuine English' merchandise, with an additional commission for the English manufacturer of course.

"These manipulations swelled to great proportions in the cloth business. English firms would buy big quantities of German cloth at the textile centers in Saxonia, import the cloth to England, and then re-export it to Germany. These goods, having thoroughly become English, as proved by the shipping documents and the higher prices—found then a ready market in foreign loving Germany, under this disguise.

"The Frenchmen also learned to make use of this German peculiarity especially in millinery, fashions, and so on, where the Parisian taste was given preference by the German public. French manufacturers, for instance, frequently bought at Sebnitz, Saxony, artificial flowers and leaves, selling them afterwards to Berlin houses as 'Parisian Novelties.'"

AUSTRIAN ADVANCE RELIEVES PRZEMYSL

LONDON, Oct. 12, 10:35 a. m.—A dispatch from Amsterdam to Reuter's Telegram company says:

"A telegram from Vienna states it is officially announced that the Austrian rapid advance has relieved Przemyśl. The Austrians have entered the fortress at all points, and where the Russians attempted resistance they were beaten. The Russians fled in the direction of the river San, attempting to cross at Simiava and Lehayisk, where a great number were captured."

I'll Tell You This, Too, My Daughter

Will undoubtedly is like your father and all other normal men—he probably will want a mild stimulant occasionally.

Don't start your married life by being prudish. Beer is healthful and refreshing, and he will drink it moderately, for he knows the meaning of True Temperance. Don't tell him he can't drink it—be broad-minded and meet him half way. You'll have your ice cream soda frequently and Will will have his beer.

Your father and I soon will have our twenty-fifth wedding anniversary. In all those years he has drunk his beer whenever he wanted it. Look at him today—strong, robust, alert, no finer man on earth. Never once have I denied him the privilege of drinking moderately. I know the moderation with which he drinks does him a world of good. In fact, I enjoy seeing him safeguard his health.

It's when you seek to deprive a man of his liberty that he rebels. Let Will drink beer when he wants it, for he's too good a man to go beyond the bounds of moderation. You'll find that a little beer will increase his stock of cheerfulness. Choose the home of mirth and happiness, my dear, rather than the house of trouble and dissection.

PENDLETON TYPOS ENDORSE SMITH FOR GOVERNOR

PENDLETON, Oct. 12.—The Pendleton Typographical union is out with resolutions strongly endorsing Dr. C. J. Smith for governor. Incidentally, they take a fall out of Dr. Withycombe.

The resolutions are as follows:

"Whereas, the candidacy of Dr. C. J. Smith for governor of Oregon has features that appeal with force to workingmen who know him and who know his views on political, economic and social questions, and among the admirable qualities of Dr. Smith may be named: A true democratic disposition that makes him ready at all times to give ear and attention to the poor man as well as the rich; a spirit of fairness that causes him to look at the real merits of public questions and to decide issues justly; a broad intelligence that gives him faith in the common people and makes him the champion of such laws as the direct primary law; a high personal character that has always kept him aligned with the clean element which stands for honesty and decency in public affairs and for the enforcement of the law.

"Whereas, the candidacy of Dr. Smith should have special support from workingmen because his opponent in the race for governor is of the over-conservative type; has shown himself unfriendly to the direct primary law, and during this campaign has spoken in criticism of the policy of excluding Chinese labor from the United States.

"Therefore be it resolved, That the members of Pendleton Typographical union, No. 214, hereby endorse the candidacy of Dr. Smith for governor of Oregon and urge his election by the people November 3.

"Be it further resolved, That publicity be given this action.

"Signed, D. C. Brown, vice-president; Frank J. Deebach, secretary."

STOPS HEADACHE, PAIN, NEURALGIA

You can clear your head and relieve a dull, splitting or violent throbbing headache, in a moment with Dr. James' Headache Powder. This old-time headache relief acts almost magically. Send some one to the drug store now for a dime package and a few moments after you take a powder you will wonder what became of the headache, neuralgia and pain. Stop suffering—it's needless. Be sure you get what you ask for.—Adv.

Overland Model 80
\$965.00

It seats five adults comfortably without crowding. It has the famous OVERLAND 30 h. p. motor, of remarkable strength, durability, speed and economy, developing more power than you will ever require.

It is electrically started and electrically lighted. All electric switches are on instrument board of cowl dash. It has a high tension magneto. It has a full floating rear axle. It has demountable rims—one extra. It has rain vision ventilating type windshield. It has 106-inch wheel base. It has extra long underslung rear springs. It has 44x4 tires.

Though the price is lower than ever, the quality is maintained throughout. All materials, metals and workmanship are of the very best. All steels are accurately analyzed in the laboratories of the WILLYS-OVERLAND CO. and microscopically and mechanically tested for hardness and strength before production starts. It is as fine and as well finished internally as externally. In short, such a car cannot be produced with more precaution and precision. Its snappy, super and stylish lines are the work of master designers.

This car rides just beautifully. The improved underslung rear springs give maximum riding comfort. No jolting or jarring on the road—just absolute ease and smoothness at all times. Tires are 33x4 all around. Never before has a car at this price come equipped with such large tires. This is also the first car of its size, capacity, power and electrical equipment to sell below one thousand dollars.

Over the hills and through the vale,
Valleys and forest green,
Every day our Overland Car,
Regardless of sunshine or rain,
Lends joy untold to thousands
And happiness most complete.
Nothing compares with our Overland Car
