

BAR LIVESTOCK SHIPMENTS FROM CANADIAN POINTS

WASHINGTON, Nov. 9.—All shipments of livestock from Canada to the United States will be barred by a quarantine order reported today at the department of agriculture. There is no evidence of foot and mouth disease in the Dominion, but infected cattle cars have been sent over the border and the order is to prevent their return.

Delaware was added to the list of quarantined states today because of discovery of the disease at Wilmington. This brings the number of quarantined states up to twelve.

CHICAGO, Nov. 9.—Control of foot and mouth disease at the Chicago stockyards, placed under quarantine last Saturday, has been brought about, federal and state authorities announced today.

With the exception of seventy-five cases among 800 prize dairy cattle quarantined in the isolation hospital, there is not a trace of the disease within the mile square yard. These cases, it was said, were mild, and the infected animals were responding speedily to treatment.

For the first time in forty-nine years since the organization of the yards not a living cow, steer, hog or sheep was in the enclosure today.

PITTSBURG, Pa., Nov. 9.—Federal and state authorities have discovered here 119 dairy cows affected with the foot and mouth disease. They will be killed.

WELSH TO MEET WHITE TONIGHT

MILWAUKEE, Wis., Nov. 9.—Freddie Welsh of Wales, lightweight champion of the world, was a 2 to 1 favorite in the betting today for his ten-round no-decision contest with Charlie White of Chicago here tonight.

The champion, it was figured, would have a weight advantage of three to four and a half pounds over White, as the Chicagoan was reported under the 135-pound mark. As the boxers have agreed to scale 135 pounds at 3 o'clock, Welsh, it was believed will take on two pounds before being called into the ring.

It will be the Englishman's second appearance in this country since he won the lightweight title from Willie Ritchie, and it will be White's second contest with a champion within a few months, for last May he gave Ritchie, then holder of the title, a terrific fight.

DEMOCRATIC CLAN IS ONE OF HATRED?

An article headed "Booth a Victor It Love Counted Instead of Votes," appeared in the Mail Tribune of Friday, November 6th. In this article the Tribune unwittingly stumbled onto a great truth. In a half humorous, half serious vein the Tribune chides us for using the word love in our telegram to Mr. Booth. Now it is a cliché that the democrats would never use the word love in any connection. It is not in their political vocabulary. There is a party of hatred.

Over a period of almost 60 years they have hated the things that we as a nation have most dearly loved. They hated the Union and tried to disrupt it. They hated the abolitionists with a bitter and consuming hatred and tried in every conceivable way to keep the shackles on four millions of human beings. They have hated sound money and in their checkered career have championed all sorts of currency from unlimited fiat to free silver. They have hated the republican policy of protection to American labor and American industry under which this nation has grown great and prosperous. They hated Lincoln with a hatred that bordered on the rabid. They hated Grant and Logan and McKinley. In fact in the past 60 years the people have not met a great cause nor a great leader that has not been blackened and belittled and belied by democratic hatred and they are the same to day that they have been always. It is as true today as when it was uttered that "a democrat is a democrat because he hates something and a republican is a republican because he loves something."

Wamsley and James Jordan to fill the vacancies. They also made out the town budget fixing the levy at 11 mills. Roy Ashpole tendered his resignation as town treasurer but the council could not act until his books had been gone over and passed on by the auditing committee. They also took steps to have the notices posted calling for a town election in December to elect new councilmen, etc.

Well our election is over and we are trying to settle down to normal state again but there is quite an element that are so jubilant over the returns all over the coast on the wet and dry question that it is hard work for them to quiet down.

BENEFITS OF ROADS TO NON-ABUTTING LAND OWNERS

WASHINGTON, D. C., Nov. 9.—The road building specialists of the department of agriculture, in Bulletin No. 136, entitled "Highway Roads," have the following to say about the benefit of a well constructed highway to property owners whose property is not directly on the road to be improved:

In planning the highway system or the main market roads, it will be found necessary to omit many roads the improvement of which is greatly desired by abutting land owners. The fact that such property holders must pay a tax for the bond issue is only an apparent injustice, for if the highway system is well planned the entire country will feel the benefits of the improvement. As a rule, main market roads reach the majority of producing areas, and when they are improved all land values tend to increase.

The fact that cities and larger towns are frequently taxed for bond issues to build highways outside of their own limits is sometimes made a point of debate in bond elections. It is argued that because a large part of the county wealth is within the corporate limits of such cities and towns, highway bond money should also be used to construct their streets.

It is even urged that the expenditure should be made proportionate to the assessed valuation within the city limits. If the proceeds of highway bond issues were distributed in this way, their purpose in many cases would be defeated. The primary object of the county highway bond issue is to build county market roads and not to improve city streets, although a high percentage of the assessed valuation may be city property.

It is now known that the expenditure of city taxes on county roads is a sound principle and that it is one of the best features of state aid for highways. In Massachusetts the city of Boston pays possibly 40 per cent of the total state highway fund, but not a mile of state aid highway has been built within its limits. New York City also pays about 60 per cent of the cost of the state highway bonds. Some state laws prohibit the expenditure of proceeds of state highway bonds within corporate limits of cities or towns.

The improvement of market roads results in improved marketing conditions which benefit the city. Most cities are essentially dependent upon the surrounding country for their prosperity and development. The development of suburban property for residence purposes is also dependent upon highway conditions and it is becoming evident yearly that what ever makes for an increase in rural population must be encouraged. Since the introduction of motor traffic, country highways are used to an increasing extent by city residents. In fact, the cost of maintaining many country highways has been greatly increased by the presence of city-owned motor vehicles. The general advance in facilities for doing country business from town headquarters which are improved is no inconsiderable factor in the commercial life of the community.
