Mrs. Perl stated that there was a lack of social life in the schools and that it should be encouraged because it raised humanity to a higher plane. She also spoke of the educational value that well directed games are to every child for they cause them to be alert and that as a nation we do not value the significance of recreation. She closed by telling what an influence parents have in guiding their children.

Mrs. Hanley then took up the subject of theatres and moving pictures. She stated that since children get knowledge by seeing and hearing it is very necessary that the parents not only visit such forms of amusement themselves and insist on good clean drama and moving pictures but that they also select something which is adapted to the age of the child. She made it very plain that theatres and moving pictures had a very great educational value but that children could not be expected to do good school work if they attended these regularly on school nights.
