'Soy elan observed Washin' ton's birthday by not workin'. There's only 364 other birthdays that Soy observes in this fashion.'

LAUGHS

On the Wrong Mission: 'We played under your window last night,' said the spokesman of the band.

'Well, and what do you want?' 'We've come for our little gratuity.'

'Come for a gratuity, have you? Bless me! I thought you had come to apologize!'

A Miniature Moo

A month-old Jersey calf was nibbling in the yard of a certain country friend of mine when the 'summer boarder' arrived—a young college maiden from a Boston suburb.

Candid

A lawyer had a horse that always stopped and refused to cross the mill-dam bridge leading out of the city.

'To be sold, for no other reason than that the owner wants to go out of town.'

Feeling the Way

'Well, well,' said Dr. Bigbill, as he met a former patient on the street.

'First, doctor,' said Mr. Brown, cautiously, 'does it cost anything to tell you?'

A Makeshift

A little boy of five was invited to a children's party. The next day he was giving an account of the fun, and said that each of the little visitors had contributed either a song, a recitation, or music for the pleasure of the rest.

'Oh, poor little Jack!' said his mother, 'how very unfortunate you could do nothing.'

'Yes, I could, mother,' replied the young hopeful. 'I stood up and said my prayers!'

Walls Have Ears

'Sash, this is a gossipy place.' 'Sash, why?' 'Sash, even the rooms communicate with one another!'

'Twas Ever Thus

'Here's a fellow patents a contrivance to keep girls from falling out of hammocks.' 'More machinery displacing men.'

Thrown Out

Golfer—Confound you, boy; you made me miss that putt! Caddie—I didn't do nothin', sir. Golfer—Yes, you did; it was your blooming hiccup.

Gets Results

Salesman—Here's an alarm clock that's guaranteed positively to make a fellow jump out of bed.

A TRAVESTY ON JUSTICE

THE popular myth that courts exist for the administration of justice, law for the protection of society and peace officers for the enforcement of the law, received a tremendous jolt when Loris Martin was acquitted by a jury of his "peers" of the murder of Game Warden A. S. Hubbard.

The verdict is a travesty on justice. It is a reward of honor for a premeditated and often-threatened murder of a faithful, fearless officer in the discharge of his duty by a notorious law-breaker. It is no longer a crime to slay a man in Jackson county. It is open season on game wardens.

Like the Kentucky moonshiner, the Oregon poacher holds it as his inalienable right to conduct his operations in defiance of the law. As the moonshiner who slays an officer becomes a hero in his native mountains, so has the murderous Jackson county poacher been crowned with a tinsel gore-spattered wreath.

The trial itself deserves to be staged as a scene in "Pud-den-Head Wilson." The disreputable old courthouse, crowded with friends of the prisoner, swept by maudlin hysteria for the accused; the sheriff's office, sworn to uphold the law, actively aiding in its nullification as star witnesses for the law's transgressor; the clever, carefully prepared defense with its black thread of perjury; the intoxicated witness and his inimitable buffoonery; the unflinching support by the court of the contentions of the defense—all these and many more incidents helped transform a tragedy into a farce, to the shame of Jackson county.

State Game Warden Finley is right in refusing to appoint a successor to Martin's victim. Why risk another life in enforcing laws when the law itself affords no protection to the law enforcer? The Martin verdict has made a joke of justice, shattered the game code and disgraced Jackson county. It is an outrage.

Loris Martin goes forth a free man, receiving congratulations for breaking the commandment of the Lord and the laws of man, but all the acquittals in the world will not wipe from his soul the scarlet stain of the blood he has shed—a damned spot that will not cleanse.

LOCAL ORCHARD IN CHICAGO TRADE

CHICAGO, March 10.—The Douglas Park Auditorium property, at the northwest corner of Ogden and Kedzie avenues, with 75 by 136 feet of ground, has been bought by Eva A. Wilson Bailey of Portland, Or., from Joseph P. Peurrung of Cincinnati, for an intricate consideration of \$250,000. The property has an income of \$130,000. The purchaser paid \$60,000 for the equity, according to the amount of revenue stamps attached to the deed, and gave back the purchase money mortgage for \$60,000.

LOCAL ORCHARD IN CHICAGO TRADE

The improvements comprise a four-story building, containing five lodge halls, five stores, an auditorium with a seating capacity of 1700 and a large banquet hall, said to have an aggregated yearly rental of more than \$30,000. In part payment Mr. Peurrung obtained an apple orchard in Rogue River valley, Oregon.

Got to Go Deep to Cure Rheumatism

Liniments Help Locally, But the Disease is Way Down Inside.

To get at the source of rheumatic pains it requires the deep, searching liniment of S. S. S. the famous blood purifier. Rheumatism is primarily a blood disease that, since it is in this vital fluid that rheumatic tendencies are carried, lodges in the joints and muscles, there to irritate the nerves and produce pain. And in order to drive out these pain-inflicting poisons it requires S. S. S. to sink deep into the tiny glands imbedded in the innermost tissues. S. S. S. travels wherever the blood goes and never loses its medicinal influence. This explains why it overcomes the most chronic forms of rheumatism, why it dissolves those hard deposits that thicken the joints, for it acts as a solvent and assists the blood to provide in the tissues the natural elements for which the body-building process continually craves and must have.

Sulphur Most Valuable Alfalfa Fertilizer

(By F. C. Reimer, Experiment Station, Talent, Ore.)

(Continued from Yesterday.)

Lime Sulphur Spray a Fertilizer Since announcing our results last summer several fruit growers in this valley and also at Hood River, and some sections of Idaho, have told us that they had observed that the alfalfa directly under the fruit trees which had been sprayed with lime sulphur was usually larger, more robust and darker green than that growing just beyond the spray drippings. It was thought that this was probably due to the lime in the spray solution. We now know that so far as this valley is concerned it was due to the sulphur and not the lime.

Experiments in Progress These experiments are now being repeated on many farms, representing all the important alfalfa soil types in this valley. We are using sulphur in many different forms. These experiments will determine what soils need applications of sulphur, the best form of sulphur to use, the most profitable amount to apply, the most economical source of sulphur, and also whether applications of phosphorus in addition to the sulphur are needed.

How Sulphur Enters Plant The alfalfa plant cannot utilize sulphur as pure sulphur. The sulphur must first combine in the soil with certain other elements to form sulphates. It readily combines with lime and forms calcium sulphate or land plaster, in which form it is readily used by the plant; or it may combine with magnesium, or with potassium, or other elements, to form acceptable sulphates. This is indeed fortunate for the alfalfa grower in this valley, since his soils are so abundantly supplied with lime, magnesium and potassium, that when sulphur is added to his soil it is readily transformed into the desirable sulphates.

Attention should again be called to the fact that the soils, so far as they have been analyzed, are, with the exception of the expensive sulphur, almost ideal for the growth of alfalfa—so far as plant food is concerned. These soils contain potash, magnesium and lime—the very essences of the alfalfa plant—sufficient to grow abundant crops for several hundred years. In addition to this, the alfalfa plant being a legume, has the highly desirable power of satisfying its enormous demands for nitrogen by absorbing it, with the aid of bacteria on its roots, from the inexhaustible supply in the air. Wherever the soils are of sufficient depth they should produce fabulous yields of alfalfa for generations by simply supplying the necessary amount of sulphur and an abundance of moisture.

(To Be Continued.)

KEEP A JAR OF MUSTEROLE HANDY

It Quickly Loosens Up Coughs and Colds in Throat or Chest

Just a little Musterole rubbed on your sore, tight chest before you go to bed will loosen up congestion and break up most severe colds and coughs.

Musterole is a clean white ointment made with oil of mustard. Simply rub it on. No plaster necessary. Better than mustard plaster and does not blister.

Thousands who use Musterole will tell what relief it gives from Sore Throat, Bronchitis, Tonsillitis, Headache, Congestion, Pleurisy, Rheumatism, Lumbago, Pains and Aches of the Back or Joints, Sprains, Sore Muscles, Bruises, Chills, Frost, Feet and Colds, (it often prevents Pneumonia).

At your druggist's in 25c and 50c jars, and a special large hospital size for \$2.50.

Be sure you get the genuine Musterole. Refuse imitations—get what you ask for. The Musterole Company, Cleveland, Ohio.
