The art exhibit which had been open to the public during the day, made a charming decoration for the rooms, while the manual training and sewing exhibit brought forth many pleased and surprised remarks from the visitors.

Mrs. Billings, the president of the Parent-Teachers' circle, suggested the formation of a "fathers' club," which should bring the fathers more actively in touch with the children, especially the boys. Mr. Hanby spoke briefly, favoring the plan from the teachers' standpoint, because, he said, the greatest need of the schools is a closer co-operation between the parents and teachers. Judge Kelly heartily approved such an organization and spoke of the improvement in the schools since the organization of the Parent-Teachers' circles. He said that he believed that a fathers' club would be of great service in the juvenile court. Most of the delinquent children, he affirmed, could easily be traced to homes where there was a lack of interest in the children. With such a club to whom the children could be paroled many of the delinquent ones might be reclaimed to useful and honorable citizenship. Dr. Rickert expressed his approval of the plan and hoped that through an organization the school buildings might be opened not only to these meetings, but also for the free discussion of all subjects which have to do with the public welfare. After favorable remarks by other gentlemen, Mr. Hanby was appointed to name a committee in the near future who should formulate plans and call a meeting to perfect such an organization. It is planned to have similar clubs organized in the different sections of the city which shall work together for the betterment of the children, especially the boys.

Miss Florence Traubridge then sang a very pleasing solo. Mrs. Hawkins added to the pleasure by reading "The Jiners."

The principal speaker of the evening was Dr. Rickert, who spoke upon "the care of the eyes and when glasses should be worn." He said that brain training and eye saving went together, and that much awkwardness and dullness among children were due to defective sight, unknown to parents and teachers. That this would cause severe strain on other parts of the body because, the child expended two or three times the amount of nervous force to learn his lessons that he would need to if his vision were normal.

After a very careful and instructive explanation of the structural defects of the eye by means of diagrams, he showed how the lenses used would overcome the trouble. He said that glasses should be worn whenever there is a lack of acute vision and brought forcibly before us that eye strain used much nervous force which should go to other work, causing diseases in remote parts of the body. If this strain is removed, then nature of her own accord will heal the body. This entertaining and instructive evening was brought to a close by a violin solo skillfully played by Miss Aileen Perl.

The Verdict

—convincingly and overwhelmingly for Goodrich.

This company alone through the daily press of January 31st gave to the consuming public the most sweeping reduction ever made in tire prices. This established the only genuine Fair-List in existence on non-skid tires today.

Goodrich prices were dated February 1st in ordinary course. Other tires were reduced in prices a few days later and the reduction dated back to February 1st.

Every real price-reduction on tires has followed the lead of Goodrich.

As always, Goodrich policy and Goodrich methods first gave the tire user the benefit of reduced prices.

We lowered tire cost for every tire user when we did that.

We were more than content to await the verdict

And that verdict is overwhelmingly and convincingly in favor of Goodrich Tires and of Goodrich Fair-List prices.

We knew that the tire user was buying mileage-service—he was buying what the tires would do for him, rather than so much bulk rubber and fabric.

We knew what our long years of rubber manufacture and tire-making had taught us.

We knew we were making tires which had exactly the right amount of rubber and the right quantity of fabric to deliver exactly the right kind of service.

We knew that too much rubber and too much fabric would be as detrimental to the service of the tires as too little.

The tire user knows that Goodrich led in putting tire prices on their just and proper level.

Only 5% PLUS for the Best Non-Skid

Note the following table of comparative prices on non-skid tires. Columns headed "A," "B," "C" and "D" represent four highly advertised tires and be sure to note Goodrich Safety Treads cost from 5% to 45% less than others shown below:
