OLD NICODEMUS NIMBLE-AT THE FRONT GERMANY NOT BEING STARVED NOR CAN SHE BE

Charles Edward Russell Shows Why Germany Can Feed Herself and Prolong War Indefinitely-Strugale Financed by Paper Money-Increased Acreage in Foodstuffs.

BY CHARLES EDWARD BUSSELL (Noted newspaper editor and cronomist, who has just returned from the war zone.)

Germany isn't being starved.

A great many persons in the l'nited States and elsewhere think she is, but that is merely one of the prize halucinations about the war. So far, as starving is concerned, we can withhold the ready tear. Germany isn't being starved and can't be.

The food that before the war Germany was in the habit of importing wasn't imported of sheer necessity, hul for convenience and profits.

Can Feed Herself

Germany can feed herself. If you could cut off every pound of food supplies from abroad you could not starve Germany-so long as the German farm was on the job. It grows everything necessary to sustain the German people. What it doesn't grow they can get along without.

This year the produce of the German farm will probably exceed all records. It was supposed by some persons, mostly of the type of the over-sanguine and ill-informed Briton, that so many men had gone to the war that Germany would be unable this year to plant her crops; or if partly planted, there would be nobody to harvest them. That was another dream.

All the women were left at home: also the boys and the old men. In ordinary times these did about fourfifths of the farm work, so what was the difference? Also the dreaming ones forgot the prisoners of war. What was lacking otherwise when seed time came around these handily supplied,

Never Looked So Blooming

The result is an increased acreage. and Germany never looked so blooming. People have turned their dooryards and waste spaces into vegetable gardens. Everybody that has any land is growing something to eat -potatoes, cabhages or carrots.

The grain harvest, of course, is diver matter. The labor usually

RUSSIA FLOATING HALF BILLION LOAN to play another inning, when T Rock got over the winning run.

PETROGRAD, July 3 .- The official journal today publishes an imperial edict authorizing the Russian minister of finance to make two issues of treasury obligations of \$250,000,000 each. The issue is to be in the shape der, Mrs. Middlehusher, at Trail jast of five per cent short term notes, free from income tax.

The issue will be in denominations from \$50 upward. This low denomination is expected to give the loan a popular aspect and to appeal to foreign as well as Russian investors. The issue is to run for six months beginning today.

imported from Russia will be missed a little when that time comes, but there are more than a million prisoners of war in Germany, and they will get in the harvest.

The cost of food has risen, that is true, about 55 per cent; but it will not rise any more. The government has attended to that. It has taken over control of the staple supplies and blocked the speculators,

Early in the winter the government issued an order that all bread must contain a certain percentage of potato flour, and this was taken elsewhere to mean a shortage of wheat and a sign of impending famine. As a matter of fact, the government was only playing safety for the army. It was determined that it should have an assured supply of bread for the soldiers, and so it conserved the wheat supply against the next harvest. Experience has shown that under present conditions one wheat bayvestime will last until the next, so that there is no longer the least danger of inadequate supply-
