"You can't get away from the law of averages, any more than you can escape the first of the month."

—Mister Squeegie

Now and then even a tail-end baseball team will play a wonderful game.

The pitcher will have everything on the ball, everybody will bat well and field faultlessly, and luck will break right all the way.

But the good games that come once or twice a month are not the ones on which the standing of the cellar champions is figured.

The team that stays up in the first division must play well day after day.

So it is with tires. Their excellence is not based on the extraordinary mileage that the occasional one gives.

It is the general average of service that must be considered in estimating tire values.

Diamond Squeegie Tread Tires are in favor, not because of the performance of an occasional one, but because of the superior merits of more than 99% of them.
