METEOR SHOWER NEXT WEEK REMAINS OF OLDEST COMET

ST. LOUIS, Aug. 6.—Father Martin S. Brennan, professor of astronomy at Kenrick seminary tonight predicted a shower of meteors will be visible Monday and Tuesday nights.

Father Brennan said the display is known as the Perseids and will last throughout the nights in the vicinity of Polar star. The meteors are the remnants of a comet known as Cymel 3, 1862, which is thought by scientists to be the oldest comet in the solar system.

This comet "died of old age" according to Father Brennan and lost its compact nucleus, and finally became attenuated through the length of its orbit. Each year this planet passes through its orbit.

Brother Hubert, professor of astronomy at Christian Brothers college, on the strength of predictions made from large sun spots now visible, predicted severe electrical and rain storms for Friday, August 13.

There are two great arguments against war," said Dr. Jordan, "first it is fundamentally wicked. War is murder and robbery systematized. The second reason is that the strongest men are chosen for the slaughter and the men who are left after a war are men too weak in personality to think or act."

Dr. Jordan expressed the view that more than one of the nations now involved would be glad enough to make peace if they could "save their faces"

PROGRESSIVES OF NEW YORK PLAN NEXT CAMPAIGN

ALBANY, N. Y., Aug. 6.—Sound- ing a rallying cry for progressives to stand by their party, George W. Perkins told 25 up-state leaders in an executive committee meeting here today that the progressive party was the only party that stood prepared for peace as well as for war.

"Every thoughtful man knows that if the war were to stop tomorrow, widespread industrial depression immediately would gather in this country," said Mr. Perkins.

As to national candidates, Mr. Perkins said that he had no idea what the future would bring forth. He declined to say whether he believed Col. Roosevelt again would be a candidate for president, or if he would support Governor Hiram Johnson of California for the presidency.

PEACE, IF THEY COULD SAVE THEIR FACE, BELIEF

SAN FRANCISCO, Aug. 6.—Dr. David Starr Jordan, chancellor of Stanford university characterized war as a "great mollycoddle factory" in an address on "Eugenics and War" before the national conference on Race Betterment today. His view was based on the fact that the strongest and best men, physically go to war leaving only the unfit, the defectives behind as forebears of the renewing race.
