

LOCAL AND PERSONAL

Lester McDonald, of the Walker garage, made a hurried run to Ashland on business yesterday evening. H. Chelmev, of Santa Cruz, California, is in the city on business. He is acquiring information on the subject of the cost of producing a 200-pound hog in this valley and getting it to market as cured meat; also the cost of raising 100 chickens to full weight for the market. These figures will be used in comparison with those obtained in a similar way in the district about Santa Cruz. Although that is not particularly a hog country, Mr. Chelmev says he believes they raise a greater number of hogs there to the 40 acres than they do in this valley. They have a considerable advantage in the cost of shipment to a market. San Francisco is also a better market for those two country products than is Portland.

Coming Monday to the Pans, "Re-generation." A few Chinese pheasants have become quite tame in this district since the snow began to fall and cover the ground for two or three days at a time. Near Phoenix they have begun to feed in the morning with the baryard chickens. A few of those who know their value as "wild game" and the sport of gunning for them in season have undertaken to feed them wherever they have appeared. The snow, however, has not yet been deep enough or remained on the ground long enough to embarrass their quest for feed very much in this valley. It has served to drive them from the foothills, however. Mrs. Leach, Abdo-Support Bareley surgical corset, 226 N. Hartlett. The snow is said to be six feet deep in the Blue-Ledge mining district.

"If your valley had general irrigation," said Mr. Sturgis yesterday, "you would enjoy a great influx of home-makers this year. I hear the Rogue river country mentioned favorably in many places I have visited lately. People who know something about it like its climate, its location, the great mining region about it, which must soon or later be developed, and your immense timber resources which must soon be utilized. Encouraging reports come from outside districts concerning the interest in the proposed poultry show to be held in this city. A great many people in the valley are interested in the poultry business; but, there being no organized effort to develop it along commercial lines, each has been waiting for some one else to make a start in the matter of organization. It is pleasing to the few who advocated the show proposition as a means of introducing a revival of concern in the chicken industry that so much interest is at once manifested.

WHY CHILLY WEATHER BRINGS RHEUMATISM

Says skin pores are closed and uric acid remains in blood. Rheumatism is no respecter of ages, color or rank. If not the most dangerous of human afflictions it is one of the most painful. Those subject to rheumatism should eat less meat, dress as warmly as possible, avoid any undue exposure and, above all, drink lots of pure water. Rheumatism is caused by uric acid which is generated in the bowels and absorbed into the blood. It is the function of the kidneys to filter this acid from the blood and cast it out in the urine; the pores of the skin are also a means of freeing the blood of this impurity. In damp and chilly, cold weather the skin pores are closed thus forcing the kidneys to do double work; they become weak and sluggish and fail to eliminate this uric acid which keeps accumulating and circulating through the system, eventually settling in the joints and muscles causing stiffness, soreness and pain called rheumatism. At the first twinge of rheumatism get from any pharmacy about four ounces of Jad Salts; put a tablespoonful in a glass of water and drink before breakfast each morning for a week. This is said to eliminate uric acid by stimulating the kidneys to normal action, thus ridding the blood of these impurities. Jad Salts is inexpensive, harmless and is made from the acid of grapes and lemon juice, combined with lithia and is used with excellent results by thousands of folks who are subject to rheumatism. Here you have a pleasant, effervescent lithia-water drink which overcomes uric acid and is beneficial to your kidneys as well.
