WINTER AND FISH

WINTER is the season of discontent for the ardent angler. Winter and the early spring is the spawn-Office Mail Tribuce Building, 25-27-29 ing season of native trout, and real sportsmen practice protecting the fish just as they feed the game birds when snow threatens extermination. Moreover, the fish cannot be taken by the fair means of artificial fly, but only by the official Paper of the City of Modford. There was not better angling in the Rogue river the previous season.

Meeford, Oregon, under the act of March 1, 1878.

There was commercial fishing at the mouth, and it is natural to place the entire blame upon the commercial farmers of this valley. The copper Full leased wire Associated Press disheavy penalties are provided for the taking of steelhead this material to a depth of thirty to trout, game wardens are vigilant, the trout cannot be sold, firty feet. It appears to be free of canned or utilized, and incentive is lacking for violation. now being analyzed by the state ex-Moreover, with the exception of the two years the river periment station at Talent. It is bewas closed, for thirty years there has been commercial lieved that some wonderful results * fishing at the mouth, and until the past few years there have already been obtained, but I am were no restrictions against taking stealheads commercially, and both salmon and steelheads were taken indiscrim- for analysis was too coarse for use inately. During some of these years there was the best on the soil in that form. Most of it angling on record—so there must be some other causes.

One cause, of course, is the great increase in the number of anglers. There are a hundred on the river through- 35 miles away, is known to every I never had my heart in my mouth out the fishing season now where there were only half a person who has any knowledge of the but I've had san up my sleeve hon- dozen a decade or so ago. This depletion can be overcome formation of the surface of that Imonly by hatchery work on a large scale.

That the stage of the water in the river has more or less to do with the quantity of fish seems more than probable, terial can be shipped into this valley after a study of stream conditions. Records published by at a nominal cost and cheaply made the state engineer in "Water Resources of Oregon," show available for use all over the valley. the flow of Rogue river for the past ten years. The stream Sir: On Christman eve I said to discharge for the season is given at Gold Ray in second my neighbor over the 'phone, "I feet (the senson being computed from October I to October element is practicularly valuable in

Any angler who consults his diary will find that the HEAD AND NOSTRILS old lady with crumpled horns. . best fishing years were 1907, 1909, 1910 and 1912, while 1908 and 1913 were fair years, and 1911, the year of forest fires, the first year the stream was closed, 1914 and 1915 afforded poor angling, the latter the poorest on record.

Consulting the above tablel, it is apparent that wet years, years of flood water and high average flow, were the best fishing years, and dry years the poorest; that the quantity of fish varied with the height of water in the

The steelhead is an anadromous fish—that is, one that hours until three doses are taken. During his school days Colonel ascends from the sea at regular intervals, and the volume of discharge of the fresh water probably governs its ettractiveness. With low water, the waters of the stream ning, relieves sick headache, adultbecome warm, and repels rather than attracts the fish, ness, feverishness, sore throat, When Greece, her knee in suppliance which delay ascent until spawning time.

The year 1915 was the dryest on record in southern Oregon. The mean discharge of the Rogue was but 53 per bing head-acthing else in the world cent of the average flow of the nine years previous. It gives such prompt relief as "Paper "Greece her knee-" the teacher re- was but 62 per cent of the flow of the preceding year, also Cold Compound." which costs only 2 marked, "Grease her knee a little a dry one. The same conditions prevailed in other coast cents at any drug store. It acts with more, then she ii go eas- streams, and the steelhead and silverside runs were failures in all streams.

While the stage of the water may not have all to do -A girl has horse sense when she with the quantity of fish, it is apparent that it has something to do with it, and as this season is thus far dryer than even the previous one, it is up to the anglers to pray

Mid-Winter Term Begins January 3. Day and Evening Sessions

By Mrs. Janet

McKenzie Hil

Our instructions to the famous editor of the Boston Canking School Magazine were: "Get up a bank of recipes of the things people like best.

Find the best way to make and bake each one. Then write it out so plainly

nated, many of them were improved upon, and all were personally tested by

this best known authority on cooking in America, and she tells so clearly how

the recipes are all thoroughly practical and call for no expensive and unusual ingredients. In addition to telling how to make them, the book is beautifully

illustrated in colors showing how to arrange and serve the dishes appetizingly.
