THEY REFUSE TO EAT

At periods in most children's lives they fail to relish their meals and refuse to eat even the delicacies prepared to tempt their appetites.

They lack ambition, and growth seems impeded, which causes anxiety and worry.

To compel them to eat is a grave mistake, because nutrition is impaired. Healthful exercise in fresh air and sunshine is important, but equally important is a spoonful of Scott's Emulsion three times a day to feed the tissues and furnish food-energy to improve their blood, aid nutrition and sharpen their appetites.

The highly concentrated medicinal food in Scott's Emulsion supplies the very elements children need to build up their strength. They relish Scott's—it is like food.
