KAISER TO TREAT ALL ARMED SHIPS AS MEN OF WAR

BERLIN, Feb. 10 (by wireless to Sayville).—The German government is about to issue a memorandum to neutral governments announcing that hereafter armed merchantmen belonging to countries at war with Germany will be considered and treated as warships.

The government contends this measure is justified by explicit instructions issued by the British admiralty to merchantmen, a copy of which is said to have been obtained by the German authorities. These instructions, it is claimed, show that the merchantmen should carry guns and attack submarines on sight. It is also claimed the instructions have a counterpart in instructions issued by other countries at war with Germany.

WASHINGTON, Feb. 10.—Germany and Austria, through their embassies here, have notified the United States of their intention to treat armed merchantmen as warships after March 1. That date was fixed to give the entente allies time to signify their intention toward the recent note of the United States proposing the disarmament of all merchantmen.

DANIELS PLEADS FOR LARGER NAVY FOR BIGGER NATION

WASHINGTON, Feb. 10.—Secretary Daniels of the navy defended the administration naval increase program and advocated immediate building up of an adequate merchant marine in a speech here today before a session of the chamber of commerce of the United States devoted to discussion of national preparedness.

"We can no longer live unto ourselves," said Mr. Daniels. "On our farms we grow more than the republic can consume. We must feed much of the world. We have the right also to have a large share in clothing the world and supplying people in every clime with whatever is manufactured in our mills and factories. But how can we fill our larger mission? What avail teaching harvests and large production in factories without adequate and reasonable water transportation? The securing of an adequate merchant marine is a pressing problem and it is so tied up with the enlarging and strengthening of our navy that the two cannot be wisely separated."

The naval program offered by the administration is a constructive, progressive one, and if built according to the continuous five-year program, the first continuing program ever proposed by an administration.

WATCH SORE THROATS

because swollen glands or inflamed membranes often affect other tissues and lung trouble easily follows.

* As Nature's corrector of throat troubles the pure cod liver oil in Scott's Emulsion is speedily converted into germ-resisting tissue; its tested glycerine is curative and healing, while this wholesome emulsion relieves the trouble and upbuilds the forces to resist tubercular germs and avert the weakening influence which usually follows.

If any member of your family has a tender throat, get a bottle of Scott's Emulsion today. Physicians prescribe it to avert throat troubles, overcome bronchial disorders and strengthen the lungs. No alcohol or harmful drugs. Always insist on Scott's.

INEFFICIENCY DUE TO CASTE

(Continued from page one)

English army today is the lack of officers. Where are they to come from? When the titled and rich are killed off the supply is gone. France has demonstrated that the caste system is not necessary to discipline. Nor is it necessary to efficiency. The French army has both. And yet we go on raising officers in hundreds of nobility like Annapolis and West Point and perpetuating all the traditions of the British feudal system in the regular army and the militia of the United States.

Conscription Next.

Members of congress are beginning to believe that conscription is the next step in the United States. That the continental army plan will fail, they say is almost a foregone conclusion.

clusion; and that its failure will be the proof that conscription is imperative.

One of my respectable military informants recently said: "Many people probably do not realize the degradation imposed on the enlisted men in the United States army. He is to all intents and purposes a slave. He must black the officers' shoes or do any kind of menial work and he is insulted or abused into the bargain. If he objects he is jailed and if he quits he is a deserter and is hunted down and treated as a felon. If an officer has an own brother in the ranks he would not be permitted to treat him otherwise than as a servant, and if there were a blizzard on and the officer was in comfortable quarters he could not let his brother under the same roof. He would lose easily as an officer."
