The subject is one of vital concern to all portions of the state, especially the undeveloped central and eastern arid regions, but it is no less important to the development of the Rogue River valley, as it offers the solution of our Louisiana, the Lamson to South Carirrigation problems.

There is no reason why state credit should not be loaned to the various districts, thereby enabling the financing of development projects. Backed by the credit of the state, it becomes an easy matter to finance needed projects from principally by naval reserve men with which capital runs away.

To the Editor: If you would permit me to use . little of your valuable space I would like to say a new words about the miserable walks lending to the Jackson school mentioned in locals and personals in Mail Tribune of Feruary 11.

Now permit me to say that since the city has spread gravel along the walk it is absolutely unnecessary for the children to get their feet wet and muddy, but if this juvenile court will want to protect these children's fogt against setting well and keep hem from catching colds and turn ing into pneumonia, etc., and call on ohn Perl or Fred Weeks to put them real if will be necessary to plank small orchard of about an acre and piece of vineyard about the same

ire, belonging to the writer, which is mud and water: in fact, a regular leli luffy, plow deep, and those same children will insist on going crass lots through this orchard and vine yard even against my strenuous protest. And the same conditions exist all over this part of the city, as there are large tracts of vacant ground all full of pot holes.

Now if this juvenile court will fr to remedy this condition they will have to put out an army of luvenile officers to keep the children on the sidewalk. If any one wishes to learn more about this condition let them come ont here about school closing time and take notice and they will not blame the city or school officials for their children having wet fest. Respectfully yours,

J. L. DEMMER. Feb. 12, 1916.
